

## INDEX

<b>I. Introduction.....</b>	<b>1</b>
1.1. Valorization of marine biomass.....	3
1.2. Main compounds of interest in macroalgae.....	6
1.2.1. Phycocolloids.....	6
1.2.1.1. Alginate.....	6
1.2.1.2. Carrageenan.....	7
1.2.1.3. Agar.....	9
1.2.2. Cellulose.....	10
1.2.3. Other bioactive compounds.....	12
1.3. Industrial applications.....	15
1.3.1. Texture modifiers.....	15
1.3.2. Bio-based packaging.....	16
1.3.3. Food products.....	17
1.3.4. Other industrial applications.....	18
1.4. Scientific and technological challenges.....	20
<b>II. Objectives.....</b>	<b>31</b>
<b>III. Results.....</b>	<b>35</b>
3.1. Chapter 1.....	39
Introduction to Chapter 1.....	41
3.1.1. Characterization of the invasive macroalgae <i>Rugulopteryx okamurae</i> for potential biomass valorization.....	43
3.1.2. Sustainable bio-based materials from minimally processed red seaweeds: Effect of composition and cell wall structure.....	67
3.1.3. <i>In vitro</i> digestibility of proteins from red seaweeds: Impact of cell wall structure and processing methods.....	101

## Index

3.2. Chapter 2.....	141
Introduction to Chapter 2.....	143
3.2.1. Agar-based packaging films produced by melt mixing: Study of their retrogradation upon storage.....	145
3.2.2. Exploring alternative red seaweed species for the production of agar-based hydrogels for food applications.....	173
3.3. Chapter 3.....	209
Introduction to Chapter 3.....	211
3.3.1. Valorization of alginate-extracted seaweed biomass for the development of cellulose-based packaging films.....	213
<b>IV. General discussion.....</b>	<b>259</b>
<b>V. Conclusions.....</b>	<b>269</b>
<b>VI. Annexes.....</b>	<b>275</b>
Annex A. List of publications included in this thesis.....	277
Annex B. List of additional publications.....	283
