

# Table of Contents

Abstract	II
Acknowledgements	VII
Table of Contents	VIII
List of Figures	XI
List of Tables	XIV
Nomenclature	XV
1 Introduction .....	2
<i>References</i>	
2 Impact of a new heat carrier fluid on a borehole heat exchanger .....	14
2.1 Introduction .....	15
2.2 Geometry and boundary conditions .....	17
2.3 Thermo-physical properties and studied factors .....	20
2.4 Mesh topology and validation .....	22
2.5 Results and discussion .....	24
2.5.1 Comparing various types of hybrid nanofluid .....	24
2.5.2 Impact of volume fraction of hybrid nanofluid .....	29
2.5.3 Impact of Reynolds number of hybrid nanofluid .....	33
2.6 Conclusions .....	38
<i>References</i>	
3 Impact of a novel backfill material on a borehole heat exchanger .....	45
3.1 Introduction .....	46
3.2 Computational fluid dynamics model and simulation conditions .....	48
3.3 Mathematical formulation .....	51
3.4 Verification .....	53
3.5 Results and discussion .....	54
3.5.1 Impact of nano-enhanced phase change material type .....	55

3.5.2	Impact of nano-enhanced phase change material volume fraction ( $\phi$ ) .....	60
3.5.3	Impact of nano-enhanced phase change material shape factor (n) .....	63
3.6	Conclusions and future scope .....	67

*References*

4	Innovative research methodology for borehole heat exchangers .....	74
4.1	Introduction .....	75
4.2	Methodology.....	75
4.3	Conclusions .....	76

*References*

5	Investigation on developed grouting materials for borehole heat exchangers (BHE) and borehole thermal energy storage (BTES) systems.....	79
5.1	Introduction .....	80
5.2	Laboratory test.....	81
5.2.1	Description of the laboratory test .....	81
5.2.2	Mixing, casting, and curing of the developed grouting materials .....	83
5.2.3	Single-column test .....	84
5.2.4	Four-column test.....	87
5.3	Numerical simulation .....	89
5.3.1	Governing equations.....	89
5.3.2	Grid independence test .....	90
5.4	Results and discussion.....	92
5.4.1	Single-column test (Verification) .....	92
5.4.2	Four-column test (Comparison).....	93
5.5	Conclusions .....	100

*References*

6	Discussion .....	106
6.1	Heat carrier fluid influence.....	106
6.2	Backfill/grout materials influence .....	107
6.2.1	Nano-enhanced PCM.....	107
6.2.2	MPCM, SSPCM, and thermally-enhanced grout .....	107
6.2.3	Field test study and CFD modeling .....	108
6.2.3.1.	Field test study .....	108
6.2.3.2.	CFD modeling.....	110
6.3	Borehole thermal resistance ( $R_b$ ).....	116

*References*

7 Conclusions ..... 120  
7.1 Works in progress and future scope ..... 122

*References*

8 Appendix ..... 126  
8.1 A ..... 126  
8.2 B ..... 135
