

# INDEX

<b>CHAPTER 1: INTRODUCTION .....</b>	<b>1</b>
<b>1.1. Prospects and challenges in the current economy and society .....</b>	<b>3</b>
1.1.1. Trends in the energetic sector: the energy transition .....	4
1.1.2. Trends in the chemical industry: past, present and future .....	6
1.1.2.1. <i>Chemical industry: a hard-to-abate sector.</i> .....	6
1.1.2.2. <i>Opportunities in the chemical industry towards decarbonization</i> .....	8
1.1.2.3. <i>Development of more efficient processes: heterogeneous</i> <i>catalysis in the chemical industry</i> .....	11
<b>1.2. Ethylene (C<sub>2</sub>=): a top-5 building block .....</b>	<b>13</b>
1.2.1. Current infrastructure of the ethylene industry .....	14
1.2.1.1. <i>Ethylene chemistry: role as platform chemical</i> .....	14
1.2.1.2. <i>Current status of ethylene production technologies</i> .....	17
1.2.2. Emerging trends in the ethylene industry .....	18
1.2.2.1. <i>Alternative ethylene production technologies</i> .....	18
1.2.2.2. <i>Opportunities and challenges in the C<sub>2</sub>= industry</i> .....	21
<b>1.3. C<sub>2</sub>= to C<sub>3</sub>= selective chain propagation .....</b>	<b>22</b>
1.3.1. Propylene in the current chemical industry .....	22
1.3.1.1. <i>Propylene as a platform chemical</i> .....	22
1.3.1.2. <i>Large-volume propylene production processes</i> .....	23
1.3.1.3. <i>Industrial on-purpose C<sub>3</sub>= production technologies</i> .....	24
1.3.2. Direct conversion of ethylene to propylene .....	26
1.3.2.1. <i>Ethylene dimerization</i> .....	29
1.3.2.2. <i>Olefin metathesis</i> .....	31
<b>1.4. Selective conversion of C<sub>2</sub>= to high-added value C<sub>3</sub> oxygenates via</b> <b>hydroformylation .....</b>	<b>35</b>
1.4.1. Olefin hydroformylation: current status .....	36
1.4.1.1. <i>Significance of oxo-chemicals</i> .....	37
1.4.1.2. <i>Industrial hydroformylation processes: a sector commanded by</i> <i>homogeneous catalysis</i> .....	39
1.4.2. Chemistry of hydroformylation .....	43

1.4.2.1. Active sites formation and role of ligands .....	43
1.4.2.2. Heck-Breslow mechanism .....	44
1.4.3. Opportunities in the oxo-chemicals industry.....	46
<b>1.5. Tandem catalysis.....</b>	<b>48</b>
1.5.1. Advantages of tandem catalytic processes .....	48
1.5.2 State-of-the-art and limitations .....	50
<b>1.6. References .....</b>	<b>52</b>
<b>CHAPTER 2: OBJECTIVES.....</b>	<b>65</b>
<b>CHAPTER 3: EXPERIMENTAL METHODS .....</b>	<b>67</b>
<b>3.1. Materials synthesis .....</b>	<b>69</b>
3.1.1. Synthesis of Rh-based HF catalysts .....	69
3.1.1.1. Synthesis of metal oxide supports .....	69
3.1.1.2. Synthesis of supported Rh Single-Atom Catalysts.....	69
3.1.1.3. Synthesis of supported polynuclear Rh catalysts.....	70
3.1.1.4. Synthesis of supported Rh oxo-aggregates.....	70
3.1.1.5. Synthesis of P-promoted supported Rh catalysts .....	71
3.1.2. Synthesis of selective hydrogenation catalysts .....	72
3.1.2.1. Synthesis of Rh/Pt Single-Atom catalysts supported on $In_2O_3$ .....	72
3.1.2.2. Synthesis of supported Ag hydrogenation catalyst 5-Ag/SiO <sub>2</sub> .....	73
3.1.2.3. Synthesis of the supported Pt hydrogenation catalyst 2-Pt/SiO <sub>2</sub> .....	73
3.1.2.4. Synthesis of the supported Ag-Pt hydrogenation catalysts 5- Ag <sub>100-x</sub> Pt <sub>x</sub> /SiO <sub>2</sub> (-R) .....	73
3.1.2.5. Synthesis of the supported Ag-Pt hydrogenation catalysts 20- Ag <sub>100-x</sub> Pt <sub>x</sub> /SiO <sub>2</sub> (-R) .....	74
3.1.2.6. Synthesis of the composite material c-Rh <sub>1</sub> /SnO <sub>2</sub> +20- Ag <sub>96</sub> Pt <sub>4</sub> /SiO <sub>2</sub> .....	75
3.1.2.7. Synthesis of the Rh-Ag-Pt/SnO <sub>2</sub> catalyst .....	75
3.1.3. Synthesis of ethylene dimerization catalysts .....	75
3.1.4. Synthesis of olefin metathesis catalysts.....	76
3.1.5. Synthesis of auxiliary functional components.....	77
3.1.5.1. CoFe <sub>2</sub> O <sub>4</sub> @SiO <sub>2</sub> nanosusceptor function .....	77

3.1.5.2. $Y_2O_3:Tb:Eu@SiO_2$ thermometric function .....	78
3.1.5.3. $\alpha-Al_2O_3:Cr$ thermometric function.....	79
3.1.6. Multifunctional catalyst assembly.....	79
3.1.6.1. Multifunctional “hot” ethylene dimerization catalyst.....	79
3.1.6.2. Multifunctional “cold” olefin metathesis catalyst.....	80
<b>3.2. Materials characterization.....</b>	<b>80</b>
3.2.1. Inductively coupled plasma optical-emission spectroscopy (ICP-OES).....	80
3.2.2. X-Ray diffraction (XRD).....	80
3.2.3. $N_2$ Physisorption.....	82
3.2.4. Electron Microscopy techniques.....	83
3.2.5. X-Ray Absorption Spectroscopy (XAS).....	86
3.2.5.1. XAS fundamentals.....	86
3.2.5.2. Rh-K edge measurements.....	89
3.2.5.3. Pt-L3 edge measurements .....	92
3.2.5.4. Ni-K and Re-L3 edge measurements .....	92
3.2.6. X-Ray Photoelectron Spectroscopy (XPS).....	93
3.2.7. Fourier Transform Infrared Spectroscopy (FTIR) .....	94
3.2.8. Raman Spectroscopy.....	98
3.2.9. Magnetic properties characterization .....	98
3.2.10. Heating capacity of magnetic susceptors .....	100
<b>3.3. Operando Luminescence thermometry .....</b>	<b>100</b>
<b>3.4. Density Functional Theory (DFT) calculations.....</b>	<b>104</b>
3.4.1. Fundamental background .....	104
3.4.2. DFT calculations methodology .....	105
3.4.2.1. DFT calculations on supported Rh Single-atom systems.....	105
3.4.2.2. DFT calculations on Ag-Pt systems.....	107
<b>3.5. XAS fitting to dft-optimized structural models .....</b>	<b>109</b>
<b>3.6. CFD heat transfer simulations.....</b>	<b>111</b>
3.6.1. CFD fundamentals .....	111
3.6.2. Experimental methodology for the simulations.....	112

3.6.2.1. <i>Geometry, model and boundary conditions</i> .....	112
3.6.2.2. <i>Properties and operational parameters considered</i> .....	115
3.6.2.3. <i>Sensitivity studies and average temperature gradient determination</i> .....	115
<b>3.7. Catalytic testing</b> .....	<b>116</b>
3.7.1. High pressure experimental set-up .....	116
3.7.1.1. <i>Reactor design</i> .....	116
3.7.1.2. <i>Analytics description and quantification procedure</i> .....	119
3.7.1.3. <i>Ethylene hydroformylation catalytic tests</i> .....	121
3.7.1.4. <i>Selective propanal hydrogenation tests</i> .....	122
3.7.1.5. <i>Ethylene reductive hydroformylation tests</i> .....	123
3.7.2. Atmospheric pressure induction heating setup .....	123
3.7.2.1. <i>Reactor design</i> .....	123
3.7.2.2. <i>Analytics description and quantification procedure</i> .....	125
3.7.2.3. <i>Ethylene dimerization tests</i> .....	127
3.7.2.4. <i>Olefin metathesis tests</i> .....	127
3.7.2.5. <i>Tandem dimerization-metathesis tests</i> .....	127
3.7.3. Catalyst deactivation assessment .....	128
3.7.3.1. <i>Deactivation in ethylene hydroformylation systems</i> .....	128
3.7.3.2. <i>Deactivation in olefin metathesis systems</i> .....	129
<b>3.8. Thermodynamic data simulations</b> .....	<b>130</b>
<b>3.9. References</b> .....	<b>131</b>

**CHAPTER 4: SELECTIVE GAS-SOLID ETHYLENE HYDROFORMYLATION VIA MODULATION OF OXIDE SUPPORT EFFECTS IN RH SINGLE-ATOM CATALYSTS** .....

<b>4.1. Introduction</b> .....	<b>137</b>
4.1.1. Benchmark olefin hydroformylation catalysts .....	137
4.1.2. Current limitations of state-of-the-art solid catalysts .....	139
4.1.3. Single Atom Catalysts (SACs) .....	141
4.1.4. Metal Oxide support effects on SACs .....	143
<b>4.2. Approach</b> .....	<b>144</b>
<b>4.3. Results and discussion</b> .....	<b>145</b>

4.3.1. Characterization of the as-prepared Rh-SACs supported on MO <sub>x</sub>	145
4.3.1.1. MO <sub>x</sub> support effect on the dispersion of Rh species	146
4.3.1.2. Influence of the MO <sub>x</sub> on the oxidation state and Rh species reducibility	153
4.3.2. Catalytic performance testing	156
4.3.2.1. Effect of the support and metal nuclearity on catalytic behavior	156
4.3.2.2. Resting state of Rh species after exposure to HF conditions	158
4.3.2.3. Study of the catalytic properties at other temperatures	162
4.3.3. DFT calculations for Rh <sub>1</sub> /SnO <sub>2</sub>	165
4.3.3.1. Surface reduction assessment under HF conditions	165
4.3.3.2. Mechanistic studies for ethylene HF on Rh <sub>1</sub> /SnO <sub>2</sub>	167
4.3.4. Study of the deactivation mechanism of Rh <sub>1</sub> /SnO <sub>2</sub>	170
4.3.4.1. Surface spectroscopic investigations on Rh <sub>1</sub> /SnO <sub>2</sub>	170
4.3.4.2. Reversibility of the deactivation of Rh <sub>1</sub> /SnO <sub>2</sub>	176
<b>4.4. Significance</b>	<b>177</b>
<b>4.5. Conclusions</b>	<b>179</b>
<b>4.6. References</b>	<b>181</b>
<b>CHAPTER 5: SELECTIVE ETHYLENE TO 1-PROPANOL DIRECT CONVERSION VIA SOLID-CATALYZED GAS-PHASE REDUCTIVE HYDROFORMYLATION</b>	<b>187</b>
<b>5.1. Introduction</b>	<b>189</b>
5.1.1. Opportunities in the context of olefin hydroformylation	189
5.1.2. Alcohols production technologies	191
5.1.3. State-of-the-art of reductive hydroformylation processes	193
5.1.4. Design of selective hydrogenation catalysts for a gas-phase ethylene RedHF process: initial considerations	195
<b>5.2. Approach</b>	<b>197</b>
<b>5.3. Results and discussion</b>	<b>198</b>
5.3.1. Preliminary screening of potential reductive hydroformylation systems	198

5.3.1.1 Reductive hydroformylation of ethylene on phosphor-modified solid Rh catalysts .....	198
5.3.1.2 Reductive hydroformylation of ethylene based on Rh <sub>1</sub> /SnO <sub>2</sub> and different selective hydrogenation catalysts .....	202
5.3.2. Selective hydrogenation catalysts based on Ag-Pt/SiO <sub>2</sub> bimetallic catalysts .....	205
5.3.2.1. First principles assessment of diluted Ag-Pt alloys as selective hydrogenation catalysts.....	205
5.3.2.2. Synthesis and characterization of Ag-Pt/SiO <sub>2</sub> hydrogenation catalysts.....	210
5.3.2.2. Selective hydrogenation of propanal on Ag-Pt/SiO <sub>2</sub> bimetallic catalysts.....	215
5.3.3. Optimization of the tandem ethylene RedHF process .....	218
5.3.3.1. Effect of intercatalyst transport distances in the Rh <sub>1</sub> /SnO <sub>2</sub> +Ag-Pt/SiO <sub>2</sub> tandem system .....	219
5.3.3.2. Effect of process variables on the performance of the Rh <sub>1</sub> /SnO <sub>2</sub> + 20-Ag <sub>99</sub> Pt <sub>1</sub> /SiO <sub>2</sub> -R tandem system in the reductive hydroformylation of ethylene .....	221
<b>5.4. Significance .....</b>	<b>224</b>
<b>5.5. Conclusions .....</b>	<b>226</b>
<b>5.6.References .....</b>	<b>227</b>
<b>CHAPTER 6: DIRECT CONVERSION OF ETHYLENE TO PROPYLENE: CATALYST-SPECIFIC HEATING AND THERMOMETRY FOR TANDEM CATALYSIS.....</b>	<b>231</b>
<b>6.1. Introduction.....</b>	<b>233</b>
6.1.1. State-of-the-art of tandem catalytic processes .....	233
6.1.2. Induction heating as a selective heating method.....	235
6.1.3. Temperature sensing via luminescence thermometry.....	239
6.1.4. Ethylene-to-propylene process as a showcase .....	241
<b>6.2. Approach.....</b>	<b>244</b>
<b>6.3. Results and discussion.....</b>	<b>246</b>
6.3.1. Assessing the feasibility of the concept via CFD simulations .....	246
6.3.2. Multifunctional materials design .....	251
6.3.2.1. Magnetic susception functionalities .....	252
6.3.2.2 Thermometric functionalities.....	255

6.3.2.3 Catalytic functionalities design.....	260
6.3.2.4 Multifunctional composite materials assembly.....	265
6.3.3. Catalytic performance .....	267
6.3.4. Validation of the proposed process .....	269
<b>6.4. Significance .....</b>	<b>270</b>
<b>6.5. Conclusions .....</b>	<b>271</b>
<b>6.6. References .....</b>	<b>272</b>
<b>CHAPTER 7: GENERAL CONCLUSIONS .....</b>	<b>275</b>
<b>APPENDIXES.....</b>	<b>279</b>
<b>Appendix I: List of figures and tables.....</b>	<b>281</b>
<b>Appendix II: List of symbols and acronyms.....</b>	<b>291</b>
<b>Appendix III: Supporting material chapter 3 .....</b>	<b>295</b>
<b>Appendix IV: Supporting material chapter 4.....</b>	<b>299</b>
<b>Appendix V: Supporting material chapter 6.....</b>	<b>319</b>
