

## TABLE OF CONTENTS

ABSTRACT	V
Resumen	VII
RESUM IX	
TABLE OF CONTENTS	XI
LIST OF FIGURES	XVIII
LIST OF TABLES	XXII
List of Algorithms	XXIII
Chapter 1: INTRODUCTION	1
1.1 Background and Motivation	1
1.1.1 The Emergence of Crowd Sensing in Urban Environments	1
1.1.2 Accurate Crowd Density Estimation	3
1.2 Evolution of Opportunistic Sensing Technologies	4
1.3 Heterogeneous Data Integration	5
1.4 Computational Methods for Social Analysis	5
1.5 Mobile Network	6
1.6 Statement of the Problem	8
1.6.1 Defining Crowd Density Estimation Challenges	8
1.6.2 Limitations of Existing Methodologies	8
1.6.3 Need for a New Algorithmic Approach	9
1.6.4 Challenges in Opportunistic Environments	9
1.6.5 Role of Synthetic and Real-world Data	9
1.7 Research Objectives	10
1.7.1 Primary Goal: Development of the DUCSIM Algorithm	10
1.7.2 Objective 1: Validation with Synthetic Data	10
1.7.3 1.3.3 Objective 2: Comparative Analysis with MOBILE Data	10
1.7.4 Objective 3: Algorithm Generalization Using Multiple Data Sources	10
1.7.5 Objective 4: Real-world Applications and Implications	11
1.8 Research Scope and Limitations	11
1.8.1 Scope of the Study: Data Types and Sources	11
1.8.2 Technological and Methodological Boundaries	11

1.8.3	Geographical and Temporal Scope	12
1.8.4	Limitations in Data Availability and Quality	12
1.8.5	Ethical Considerations and Privacy Concerns	12
1.9	Methodological Framework and Innovations	13
1.10	Expected Contributions to the Field	14
1.11	Significance for Future Research	15
1.12	Thesis Structure and Contribution	16
1.13	Conclusion	17
Chapter 2: LITERATURE REVIEW 18		
2.1.1	Overview of Crowd Density Estimation	18
2.1.2	Historical Evolution	19
2.1.3	Theoretical Foundations and Key Definitions	19
2.1.4	Traditional Methods vs. Contemporary Approaches	20
2.1.5	Challenges and Advancements in Current Techniques	21
2.2	Opportunistic Environments in Crowd Sensing	22
2.2.1	Defining Opportunistic Sensing Environments	22
2.2.2	The Role of Opportunistic Data Collection in Crowd Estimation	23
2.2.3	Technologies Enabling Opportunistic Sensing	23
2.2.4	Analysis of Data Quality and Reliability in Opportunistic Settings	24
2.2.5	Case Studies: Crowd Sensing in Opportunistic Environments	25
2.3	Advances in Synthetic and Real-world Data Utilization	26
2.3.1	Comparative Analysis: Synthetic Data in Opportunistic Contexts	26
2.3.2	Real-world Data Challenges in Opportunistic Environments	27
2.3.3	Methodologies for Data Generation and Validation	27
2.3.4	Successes and Limitations in Data Utilization	28
2.3.5	Future Trends in Data Acquisition and Analysis	28
2.4	Social Network Analysis in Opportunistic Crowded Environments	29
2.4.1	Fundamentals and Role of SNA in Opportunistic Settings	29
2.4.2	Integrating SNA with Opportunistic Crowd Sensing	30
2.4.3	Case Studies and Applications	30
2.4.4	Ethical Considerations and Data Privacy in SNA	31

2.4.5	Opportunities and Challenges in SNA for Opportunistic Environments	32
2.5	The Role of Ubiquitous Computing in Opportunistic Crowd Sensing	32
2.5.1	Emergence of Ubiquitous Technologies in Opportunistic Settings	33
2.5.2	Impact of IoT and Mobile Devices on Opportunistic Crowd Sensing	34
2.5.3	Challenges in Ubiquitous Data Collection and Analysis	34
2.5.4	Future Directions and Innovations	35
2.5.5	Case Studies: Ubiquitous Computing in Dynamic Environments	36
2.6	Existing Models and Algorithms for Opportunistic Crowd Density Estimation	37
2.6.1	Comparative Analysis of Algorithms	38
2.6.2	Identifying Gaps and Potential Areas for Future Research	40
2.7	Conclusion	42
Chapter 3: Theoretical Framework		43
3.1	Conceptual Framework of the Study	43
3.1.1	Definition and Scope of Opportunistic Environments	43
3.1.2	Role of Opportunistic Sensing in Crowd Density Estimation	44
3.1.3	Various Data Sources in Opportunistic Settings	45
3.1.4	Framework for Analysing and Interpreting Data	46
3.2	Theories of Crowd Dynamics in Opportunistic Environments	47
3.2.1	Fundamental Theories Underpinning Crowd Behaviour	47
3.2.2	Modelling Crowd Dynamics in Unstructured Environments	48
3.2.3	Impact of Opportunistic Data on Crowd Dynamics	49
3.2.4	Comparative Analysis of Models	51
3.2.5	Application of Theories in Diverse Crowd Scenarios	53
3.3	Principles of Synthetic Data Generation and Validation in Opportunistic Contexts	54
3.3.1	Rationale for Using Synthetic Data in Opportunistic Environments	54
3.3.2	Methodologies for Creating Realistic Synthetic Data	55
3.3.3	Validating Synthetic Data Against Real-world Opportunistic Data	55
3.3.4	Challenges and Solutions in Synthetic Data Generation	56
3.3.5	Synthetic Data in Algorithm Development and Testing	57
3.4	Theoretical Concept: Mobile Crowd Density Estimation	58
3.5	Mathematical Foundations of Crowd Density Estimation in Opportunistic Environments	59

3.5.1	Initialization: Locations and Mobile Towers	60
3.5.2	Crowd Count Arrays	63
3.5.3	Threshold Arrays	65
3.5.4	Quartile Arrays	67
3.5.5	Time Tracking Variables	70
3.5.6	Data Collection for Each Hour and Each Day	71
3.5.7	Calculating Daily and Weekly Threshold Values (Median-of-Median)	73
3.5.8	Quartile Classification for Crowd Density (With Threshold)	74
3.6	Social Network Mobility Process	76
3.6.1	Individual Tracking	76
3.6.2	Location Mapping	78
3.6.3	Analysis of Urban Dynamics	80
3.6.4	Mobility Pattern Analysis	80
3.6.5	Analysis of Mobility Patterns	81
3.6.6	Identifying Groups and Relationships	81
3.6.7	Relationship Inference	82
3.6.8	Time and Location Analysis for Relationships	83
3.6.9	Integration with Crowd Density Analysis	83
3.6.10	Predictive Modelling for Social Dynamics and Crowd Movement	84
3.7	Conclusion	84
Chapter 4: PROPOSED Methodology		85
4.1	Proposed Framework	86
4.2	Data Collection and Sources	87
4.3	Synthetic Data Generation	89
4.3.1	Generation Process of Cumulative Count Synthetic Data	89
4.3.2	Generation of Individual Mobility Scenario	93
4.3.3	Utility of Synthetic Data in Crowd Density Estimation	98
4.4	MOBILE Data Collection	98
4.4.1	MOBILE Data Details	100
4.5	Data Preprocessing Techniques	102
4.5.1	Data Distribution Assessment:	102

4.5.2	Spatio-Temporal Analysis	102
4.5.3	Outlier Identification	103
4.5.4	Non-Normalization Justification	103
4.5.5	Algorithmic Adaptation to Raw Data	103
4.6	Evolution of Threshold Algorithm	103
4.6.1	Threshold Algorithm 1: Threshold Computation	103
4.6.2	Threshold Algorithm 2: Daily & Weekly Threshold Array	107
4.6.3	Threshold Algorithm 3: Median-of-Median Threshold Computation	111
4.7	Validation Median Vs. Average	114
4.7.1	Mathematical and Statistical Perspective	115
4.7.2	Diagrammatic Comparison of Median vs Mean	116
4.7.3	Logical and Practical Perspective	117
4.8	Evolution of Proposed DUCSIM Crowd Density Algorithm	118
4.8.1	Proposed Algorithm 1: Quartile Classification for Crowd Density	118
4.8.2	Proposed Algorithm 2: Historical Threshold-Based Crowd Density Classification	122
4.8.3	Proposed Algorithm 3: Crowd Density Classification with Median Threshold	126
4.8.4	Proposed Algorithm 4: Social Mobility of Crowd – Individual & Group	130
4.8.5	Proposed Algorithm 5: Integrated Model for Urban Crowd Dynamics and Social Interaction Analysis	134
4.8.6	Proposed Algorithm 6: DUCSIM Algorithm with Self-Learning Module	139
4.8.7	Proposed Algorithm 7: Dynamic Urban Crowd and Social Interaction Model (DUCSIM) With Median of Median Threshold	145
4.9	Evolution stages of DUCSIM Algorithm	150
4.9.1	Algorithm 4-6: Multivariate Crowd Density Analytical Framework (CD_AF)	150
4.9.2	Algorithm 4-7: Proactive Crowd Management Paradigm (PCMP)	150
4.9.3	Algorithm 4-8: Streamlined Crowd Density Taxonomy (SCDT) (Median Threshold)	150
4.9.4	Algorithm 4-9: Individual and Social Dynamics Integration (ISDI)	151
4.9.5	Algorithm 4-10: Dynamic Urban Crowd and Social Interaction Model (DUCSIM)	151
4.9.6	Algorithm 4-11: Comprehensive Mobility and Social Interaction Model with Enhanced DUCSIM (CMSIM-EDUCSIM)	151
4.9.7	Algorithm 4-12: Adaptive Learning and Customized Predictive Analytics (ALCPA) With DUCSIM-TM-o-M	151

4.10	Proposed Algorithm 6: Real-Time Crowd Density and Mobility Prediction (Opportunistic Environment)	153
4.11	Proposed Algorithm 7: Self-Learning Crowd Density Estimation Algorithm with Median-of-Median Threshold (Integrated Version)	157
4.12	Algorithm 8: Heterogeneous Opportunistic DUCSIM with Enhanced Crowd Density Analysis	160
4.13	Comparison & Validation of DUCSIM Algorithm	164
4.14	Conclusion	165
Chapter 5: Cumulative Crowd Density Result		167
5.1	Synthetic Data Details	168
5.2	Nature of Dataset	169
5.2.1	Descriptive Statistics:	169
5.3	Data Distribution	170
5.4	Median Threshold: Reference Count & Current Count	172
5.5	Time Series of Current Count	173
5.6	Grouped Histogram	174
5.7	Outlier Computation	176
5.8	Threshold Results	178
5.8.1	Threshold Algorithm 1 Results	178
5.9	Median Vs. Mean Results	181
5.9.1	Threshold – Median & Median-Of-Median	183
5.10	Retrospective Crowd Density Results	185
5.10.1	Crowd Overview Heatmap	186
5.10.2	Crowd Assessment – Granular Level	186
5.11	Cumulative Distribution – All Regions	199
5.12	Algorithm 6: Multivariate Crowd Density Analytical Framework (CD_AF) Results	200
5.12.1	Threshold Current_Count	200
5.12.2	Crowd Classification	201
5.12.3	Crowd Density Heatmaps	203
5.13	Algorithm 7: Proactive Crowd Management Paradigm (PCMP) Results	206
5.13.1	Historical Threshold	206
5.13.2	Crowd Density Classification	207

5.14	Algorithm 8: Results of Streamlined Crowd Density Taxonomy (SCDT) (Median Threshold)	209
5.14.1	Median Threshold Results	209
5.14.2	Crowd Density Distribution	210
5.14.3	Crowd Density Granular Distribution	211
5.15	Conclusion	212
Chapter 6: Algorithm 14: Integrated Crowd Density Estimation (SYNTHETIC vs Real MOBILE)		213
6.1	Real-World MOBILE Data Details	213
6.2	Input Data Format	214
6.3	Descriptive Analysis (Real MOBILE Data)	215
6.4	Outliers (Real MOBILE)	218
6.5	Algorithm 14: Insights & Comparison (Synthetic vs Real MOBILE)	219
6.6	Median-of-Median Threshold (Synthetic vs Real)	220
6.7	Classification (Synthetic vs Real MOBILE)	221
6.8	Datasets (Synthetic vs Real)	222
6.9	Conclusion	223
Chapter 7: Individual AND Group Mobility Results		224
7.1	Individual Mobility Dataset	224
7.2	Data Distribution	225
7.3	Structure of Data	226
7.4	Algorithm 9: Individual and Social Dynamics Integration (ISDI)	226
7.4.1	Threshold – Median	227
7.4.2	Individual Network Connection	227
7.4.3	Individual & Group Visit	228
7.4.4	Prediction Model	229
7.5	Algorithm 10: Dynamic Urban Crowd and Social Interaction Model (DUCSIM)	231
7.5.1	Hourly Crowd Density Thresholds	232
7.5.2	Crowd Count Heatmap	232
7.5.3	Social Ties Network	233
7.5.4	Simplified Social Ties Network	234
7.6	Algorithm 11: Comprehensive Mobility and Social Interaction Model with Enhanced DUCSIM	236

7.6.1	Median Thresholds Across Sites by Hour	236
7.6.2	Heatmap of Density Estimation at Sites by Hour	237
7.6.3	Macroscopic Crowd Density by Site and Hour	238
7.6.4	Density Scatter Plot for Group Mobility Analysis	238
7.6.5	Density Scatter Plot for Individual Mobility Patterns	239
7.6.6	Prediction of Crowd Mobility	240
7.7	Algorithm 12: Adaptive Learning and Customized Predictive Analytics With DUCSIM-TM-o-M	241
7.7.1	Median of Median Crowd Count Per Hour	241
7.7.2	Crowd Count Distribution	242
7.7.3	Social Interaction	243
7.7.4	Individual Strong Connections with Notations	243
7.7.5	Prediction for the Next Hour	244
7.8	Conclusion	245
Chapter 8: HETEROGENEOUS Opportunistic Environment Result		
8.1	Input / Simulation Parameters	246
8.2	Crowd Density	247
8.3	Density Flow Metrics	248
8.4	Rideshare Interactions	249
8.5	Twitter Interaction	250
8.6	Sentiment Distribution	250
8.7	Prediction Distribution	251
8.8	Conclusion	252
Chapter 9: Algorithm 6: Application: Smart City Crowd Management Using MOBILE Data Analysis		
		253
9.1	Introduction	253
9.2	Objective	253
9.3	Overview of Approach	254
9.4	Methodology	254
9.4.1	Data Simulation	254
9.4.2	Results and Discussion	256
9.5	Applications and Implications	258

9.6	Future Prospects	259
9.7	Conclusion	260
Chapter 10: Conclusion 261		
10.1	Summary of Findings	261
10.2	Contributions of the Research	262
10.3	Reflection on Enhanced DUCSIM's Journey	263
10.3.1	Comprehensive Data Integration	263
10.3.2	Dual Analysis: Macroscopic and Microscopic	263
10.3.3	Predictive Modelling: A Leap into the Future	264
10.3.4	Practical Applications and Broader Implications	264
10.3.5	Navigating Challenges and Ethical Considerations	264
10.4	Future Directions: Scalability, Adaptability, and Technological Integration	264
10.5	List of Publication	267
10.5.1	Patents	267
10.5.2	Other Network Patents	268
10.5.3	Papers	269
10.5.4	Conference	269
10.5.5	Book chapter	269
