|--|-------------|
| Acknowledgements | v |
| Abstract | ix |
| Resumen | xi |
| Resum | xiii |
| 1 Introduction and objectives | 1 |
| 1.1 Objectives | 3 |
| 1.2 Structure of the thesis | 4 |
| 2 Phase and amplitude of electromagnetic scattering | 7 |
| 2.1 Introduction | 7 |
| 2.2 Interaction of a particle with electromagnetic radiation | 8 |
| 2.3 Effective propagation constant of a medium containing multiples spheres . | 11 |
| 2.3.1 Multiple scattering theories | 13 |
| 3 Terahertz Time Domain Spectroscopy as a tool for probing the spectrum of scattering media | 17 |
| 3.1 Introduction | 17 |
| 3.1.1 Continuous wave | 18 |
| 3.1.2 Pulsed wave | 20 |
| 3.2 THz-TDS principles of operation and measurement | 24 |
| 3.2.1 General operation | 24 |
| 3.2.2 THz optics configuration | 25 |
| 3.2.3 Data treatment | 25 |
| 3.2.4 Optical parameter extraction | 28 |
| 3.3 System improvements through time trace stitching | 31 |
| 3.3.1 Stitching algorithm | 32 |
| 3.3.2 Results and discussion | 35 |

| | | |
|----------|--|-----------|
| 4 | Particle size inversion from spectrally resolved full-field forward scattering | 41 |
| 4.1 | Introduction | 41 |
| 4.2 | Methods | 43 |
| 4.2.1 | Full-field forward model | 43 |
| 4.2.2 | Inversion of the particle size distribution | 45 |
| 4.2.3 | THz measurements | 49 |
| 4.2.4 | Sample preparation | 50 |
| 4.3 | Results | 51 |
| 4.3.1 | Simulation validation | 51 |
| 4.3.2 | Experimental validation | 54 |
| 4.4 | Discussion | 56 |
| 5 | Non Kramers-Kronig dispersion relations of the effective refractive index of some heterogeneous materials | 59 |
| 5.1 | Introduction | 59 |
| 5.2 | Delay of orthogonal modes in scattering | 61 |
| 5.3 | Causality of transmission functions in scattering | 63 |
| 5.4 | Kramers-Kronig relations for anticausal systems | 65 |
| 5.5 | Effective refractive index of an heterogeneous dielectric slab | 68 |
| 5.6 | Inverse design of optical parameters | 73 |
| 5.7 | Discussion | 75 |
| 6 | Conclusions | 77 |
| 6.1 | General conclusions | 77 |
| 6.2 | Future work | 79 |
| 6.3 | Concluding remarks | 80 |
| | Appendix A Scattering simulations | 83 |
| A.1 | T-matrix simulations | 83 |
| A.2 | FEFD simulations | 86 |
| A.3 | Mie and QCD simulations | 86 |
| | Appendix B Quadrature decomposition of a Fredholm integral | 89 |
| | Appendix C Kramers-Kronig relations in anticausal media | 91 |
| C.1 | Derivation of Kramers-Kronig relations for an anticausal system | 91 |
| C.1.1 | Derivation from Schwarz reflection principle | 91 |
| C.1.2 | System theory derivation | 92 |
| C.1.3 | Contour integral derivation | 93 |
| C.2 | Titchmarsh theorem for anticausal systems | 95 |
