

Table of Contents

Summaries and Glossary	13
1. General Introduction	23
1.1. Aquaculture	24
1.2. Omics	44
2. Aims, outline, and institutional support	79
2.1. Aims	80
2.2. Outline	81
2.3. Institutional support	85
3. Transcriptomic profiling of Gh/Igf system reveals a prompted tissue-specific differentiation and novel hypoxia responsive genes in gilthead sea bream	87
Abstract	88
3.1. Introduction	89
3.2. Results	91
3.3. Discussion	98
3.4. Methods	104
Supplementary Material	108
4. Targeting the Mild-Hypoxia Driving Force for Metabolic and Muscle Transcriptional Reprogramming of Gilthead Sea Bream (<i>Sparus aurata</i>) Juveniles	117
Simple summary	118
Abstract	118
4.1. Introduction	119
4.2. Material and Methods	120
4.3. Results	126
4.4. Discussion	138
4.5. Conclusions	143
Supplementary material	146
5. Broodstock nutritional programming differentially affects the hepatic transcriptome and genome-wide DNA methylome of farmed gilthead sea bream (<i>Sparus aurata</i>) depending on genetic background	159
Abstract	160
5.1. Background	161
5.2. Results	163
5.3. Discussion	177
5.4. Conclusions	182
5.5. Methods	182
Supplementary material	192

6. Genetic selection for growth drives differences in intestinal microbiota composition and parasite disease resistance in gilthead sea bream	203
Abstract	204
6.1. Background	205
6.2. Results	207
6.3. Discussion	218
6.4. Conclusions	223
6.5. Methods	223
Supplementary Material	230
7. Diet and Host Genetics Drive the Bacterial and Fungal Intestinal Metatranscriptome of Gilthead Sea Bream	243
Abstract	244
7.1. Introduction	245
7.2. Results	247
7.3. Discussion	258
7.4. Materials and Methods	264
Supplementary Material	270
8. Genetics and Nutrition Drive the Gut Microbiota Succession and Host-Transcriptome Interactions through the Gilthead Sea Bream (<i>Sparus aurata</i>) Production Cycle	285
Simple summary	286
Abstract	286
8.1. Introduction	286
8.2. Materials and Methods	288
8.3. Results	289
8.4. Discussion	294
8.5. Conclusions	308
Supplementary Material	314
9. Can the genetic background modulate the effects of feed additives? Answers from gut microbiome and transcriptome interactions in farmed gilthead sea bream (<i>Sparus aurata</i>)	333
Abstract	334
9.1. Introduction	335
9.2. Materials and methods	337
9.3. Results	344
9.4. Discussion	360
9.5. Conclusions	365
Supplementary Material	368
10. General Discussion	379
11. Conclusions	411
