## SUPPLEMENTARY FILE

### DOCUMENTOS COMPLEMENTARIOS

#### 1. General information

This file presents the relevant information for the 258 sites used in this study. Table S1 below lists their full name, the calculated time from coast to the site in minutes (Path Cost), their general region and whether the site is located on the immediate coast (SOIC: Site on immediate coast). Then the table lists what the function of the site was according to the academic literature.

“HAB” denotes habitational centre (above 0.8 ha), “IND” represents sites that likely had a purely industrial/production function (and therefore not habitation), “HAM” represents smaller habitational sites such as hamlets or farmsteads (i.e. below 0.8 ha), “SHR” represents a site whose primary function is as a shrine or ritual space, while “BUR” denotes a site used for burial. These classifications can sometimes overlap at the same site over time when the space takes on a new function.

The table then lists the chronological periods relevant to this study (FN–LH IIIA), before presenting the reference from a survey project and general additional literature concerning the site. The additional references are not intended to be comprehensive, rather may guide the reader in the right direction.<sup>1</sup>

The file also contains Table S2 and Table S3, which present the mean (average) values for the Coastal Proximity Analysis (CPA), as well as the percentage change in the mean. Also presented is the R script that the analysis is based upon.

<sup>1</sup> Abbreviations: Chronology as Table S1: main text. GAC: Gazetteer of Aegean Civilisation (Hope Simpson & Dickinson 1979). SAS: Southern Argolid Survey (Jameson et al. 1994).

MSP: Methana Survey Project (Mee & Forbes 1997). BLP: Berbati-Limnes Project (Wells et al. 1996).

SUPPLEMENTARY FILE

**Table S2.** The mean (average) values for the results of the Coastal Proximity Analysis undertaken during this study, divided by site type and chronology. Note: the values are rounded to the nearest whole number.

Type	FN- EH I	EH II	EH III	MH	MH III- LH I	LH II	LH IIIA
Habitation Centres	70	76	47	71	63	67	68
Hamlets	86	70	59	54	44	51	83
Burial	58	41	21	65	67	49	80
All	75	68	54	64	49	53	80

**Table S3.** The percentage change in the mean (average) values for the results of the Coastal Proximity Analysis undertaken during this study, divided by site type and chronology. Green represents a land-ward shift and blue represents a coast-ward shift. Note: the values are rounded to the nearest whole number.

Type	FN- EH I	EH II	EH III	MH	MH III- LH I	LH II	LH IIIA
Habitation Centres	NA	+8 %	-39 %	+52 %	-11 %	+6 %	+2 %
Hamlets	NA	-18 %	-17 %	-7 %	-18 %	+15 %	+62 %
Burial sites	NA	-28 %	-50 %	+210 %	+4 %	-27 %	+64 %
All	NA	-10 %	-21 %	+18 %	-24 %	+10 %	+49 %

Below is the R Script used in the Analysis. The user must ensure that all files are in the same Project Coordinate Reference System (CRS). In this analysis, EPSG: 2100 (Greek Grid) was used. Sections in green describe the actions and can be removed from the script.
