

Table of Contents

| | |
|--|-------------|
| Abstract | <i>I-VI</i> |
| Chapter 1. Introduction | 2 |
| 1.1. General Considerations..... | 2 |
| 1.2. Photocatalysis..... | 11 |
| 1.3. Photocatalysis for solar fuels..... | 17 |
| 1.4. Modification of TiO ₂ for solar photocatalysis..... | 24 |
| 1.5. Photocatalysts other than TiO ₂ | 30 |
| 1.6. Photoinduced charge separation versus photothermal pathways..... | 41 |
| 1.7. Solar Fuels..... | 44 |
| References..... | 54 |
| Chapter 2. Objectives | 77 |
| Chapter 3. Fe clusters embedded on N-doped graphene as a photothermal catalyst for selective CO₂ hydrogenation | 81 |
| 3.1. Introduction..... | 81 |
| 3.2. Materials preparation and characterization..... | 84 |
| 3.3. Photocatalytic Results..... | 89 |
| 3.4. Mechanistic Investigation..... | 92 |
| 3.5. Conclusions..... | 98 |
| References..... | 99 |
| Chapter 4. Co-doped hydroxyapatite as photothermal catalyst for selective CO₂ hydrogenation | 104 |

| | |
|--|-----|
| 4.1. Introduction..... | 104 |
| 4.2. Material preparation and characterization..... | 106 |
| 4.3. Light-assisted CO ₂ hydrogenation tests..... | 116 |
| 4.4. Mechanistic Investigation..... | 126 |
| 4.5. Conclusions..... | 130 |
| References..... | 131 |

Chapter 5. Ru supported photocatalyst for CO₂ hydrogenation: 137

Effect of irradiation power on CO and CH₄ products distribution...

| | |
|--|-----|
| 5.1. Introduction..... | 137 |
| 5.2. Materials preparation and characterization..... | 140 |
| 5.3. Photocatalytic results..... | 143 |
| 5.4. Changing the product selectivity..... | 149 |
| 5.5. Conclusions..... | 151 |
| References..... | 152 |

Chapter 6. Visible-light-driven photocatalytic overall water 159

splitting promoted by porphyrin sensitized Zn-substituted potassium poly(heptazine imide).....

| | |
|--|-----|
| 6.1. Introduction..... | 159 |
| 6.2. Materials preparation and characterization..... | 163 |
| 6.3. Photocatalytic results..... | 170 |
| 6.4. Reaction mechanism..... | 179 |
| 6.5. Conclusions..... | 187 |
| References..... | 188 |

| | |
|--|------------|
| Chapter 7. Photocatalytic O₂ reduction to H₂O₂ employing polymeric triazine/heptazine heterojunctions..... | 194 |
| 7.1. Introduction..... | 194 |
| 7.2. Materials preparation and characterization..... | 195 |
| 7.3. Photocatalytic H ₂ O ₂ evolution..... | 204 |
| 7.4. Reaction mechanism..... | 211 |
| 7.5. Photocatalytic flow reactions..... | 221 |
| 7.6. Conclusions..... | 223 |
| References..... | 224 |
| | |
| Chapter 8. Conclusions..... | 233 |
| | |
| Chapter 9. Experimental..... | 237 |
| 9.1. Material synthesis..... | 237 |
| 9.1.1. Employed Chemicals..... | 237 |
| 9.1.2. Synthesis of Fe/Co@NG catalysts..... | 238 |
| 9.1.3. Synthesis of Co _x HAP photocatalysts..... | 238 |
| 9.1.4. Synthesis of Ru(2.5 wt.%)@STO photocatalyst..... | 239 |
| 9.1.5. Synthesis of K ⁺ PHI ⁻ | 239 |
| 9.1.6. Synthesis of the TCPP(X wt. %)(Zn/K)PHI photocatalyst..... | 240 |
| 9.1.7. Synthesis of PTI/Li ⁺ Cl ⁻ photocatalyst..... | 240 |
| 9.1.8. Synthesis of graphitic carbon nitride g-CN photocatalyst..... | 241 |
| 9.1.9. Synthesis of mesoporous graphitic carbon nitride mpg-CN photocatalyst..... | 241 |
| 9.1.10. Synthesis of Na ⁺ PHI ⁻ and H ⁺ PHI ⁻ photocatalysts..... | 241 |
| 9.1.11. Synthesis of H heterojunction photocatalysts..... | 242 |
| 9.2. Experimental set-ups and procedures for photocatalytic reactions..... | 242 |

| | |
|---|-----|
| 9.2.1. Light-assisted CO ₂ hydrogenation under batch conditions | 242 |
| 9.2.2. Light-assisted CO ₂ hydrogenation under continuous flow regime (with external heating)..... | 243 |
| 9.2.3. Light-assisted CO ₂ hydrogenation under continuous flow regime (with no external heating) under high flux irradiation..... | 244 |
| 9.2.4. Light-assisted CO ₂ hydrogenation (batch) under high flux irradiation..... | 245 |
| 9.2.5. Light-assisted CH ₄ wet reforming (batch) under high flux irradiation..... | 246 |
| 9.2.6. Light-assisted CH ₄ dry reforming (batch) under high flux irradiation..... | 246 |
| 9.2.7. Photocatalytic water splitting tests..... | 247 |
| 9.2.8. Photocatalytic O ₂ reduction to H ₂ O ₂ in batch..... | 247 |
| 9.2.9. Photocatalytic O ₂ reduction to H ₂ O ₂ under continuous flow regime..... | 248 |
| 9.3. Characterization techniques..... | 252 |
| 9.3.1. Powder X-ray Diffraction (PXRD)..... | 252 |
| 9.3.2. Elemental Analysis (EA)..... | 252 |
| 9.3.3. Inductively Coupled Plasma Optical Emission Spectroscopy (ICP- OES)..... | 253 |
| 9.3.4. Diffuse Reflectance UV-VIS Spectroscopy (UV-VIS DR)..... | 253 |
| 9.3.5. Raman spectroscopy..... | 254 |
| 9.3.6. MAS ¹³ C NMR spectroscopy..... | 254 |
| 9.3.7. X-ray Photoemission spectroscopy (XPS)..... | 254 |
| 9.3.8. Transmission electron microscopy (TEM)..... | 255 |
| 9.3.9. Isothermal N ₂ absorption..... | 255 |
| 9.3.10. Transient Absorption Spectroscopy (TAS)..... | 255 |
| 9.3.11. Photoelectrochemical Characterization..... | 256 |

| | |
|---|------------|
| 9.4. Other methods..... | 257 |
| 9.4.1. H ₂ TCP quantification..... | 257 |
| 9.4.2. Calculation of Apparent Quantum Yields (AQY %)..... | 258 |
| 9.4.3. Calculation of the solar to hydrogen efficiency (STH %)..... | 259 |
| References..... | 259 |
| | |
| Dissemination..... | 261 |
