|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction</b>   | <b>1</b>  |
| 1.1      | Motivation . . . . .  | 1         |
| 1.1.1    | Affective computing . . . . .   | 1         |
| 1.1.2    | Emotion modelling . . . . .   | 2         |
| 1.1.3    | Emotion recognition . . . . .   | 4         |
| 1.1.3.1  | Implicit measures . . . . .   | 5         |
| 1.1.3.2  | Eye-tracking . . . . .  | 6         |
| 1.1.3.3  | Electrodermal activity . . . . .  | 8         |
| 1.1.3.4  | Artificial intelligence in emotion recognition . . . . .  | 9         |
| 1.1.4    | Emotion elicitation . . . . .   | 9         |
| 1.1.4.1  | Virtual reality . . . . .   | 10        |
| 1.1.4.2  | Virtual humans . . . . .  | 12        |
| 1.1.5    | Applications of affective computing in virtual reality . . . . .  | 16        |
| 1.1.6    | Depression . . . . .  | 17        |
| 1.2      | Objectives . . . . .  | 18        |
| 1.3      | Thesis structure . . . . .  | 18        |
| <b>2</b> | <b>Development and calibration of an eye-tracking fixation identification algorithm for immersive virtual reality</b> | <b>21</b> |
| 2.1      | Introduction . . . . .  | 22        |
| 2.2      | Materials and Methods . . . . .   | 25        |
| 2.2.1    | Participants . . . . .  | 25        |
| 2.2.2    | Virtual Environment and Data Collection . . . . .   | 25        |
| 2.2.3    | Fixation identification algorithm . . . . .   | 28        |
| 2.2.4    | Calibration criteria . . . . .  | 30        |
| 2.3      | Results . . . . .   | 32        |

|          |   |           |
|----------|---|-----------|
| 2.3.1    | Frequency analysis . . . . .  | 32        |
| 2.3.2    | Algorithm calibration . . . . .   | 33        |
| 2.4      | Discussion . . . . .  | 37        |
| 2.5      | Conclusion . . . . .  | 40        |
| <b>3</b> | <b>Automatic Artifact Recognition and Correction for Electrodermal Activity based on LSTM-CNN models</b>      | <b>41</b> |
| 3.1      | Introduction . . . . .  | 42        |
| 3.1.1    | Realted work . . . . .  | 45        |
| 3.1.2    | Objectives . . . . .  | 48        |
| 3.2      | Materials and Methods . . . . .   | 49        |
| 3.2.1    | Participants . . . . .  | 49        |
| 3.2.2    | Data collection: EDABE dataset . . . . .  | 49        |
| 3.2.3    | Methodology overview . . . . .  | 50        |
| 3.2.4    | Expert artifact correction . . . . .  | 51        |
| 3.2.5    | Artifact recognition models . . . . .   | 52        |
| 3.2.5.1  | Taylor et al. model . . . . .   | 52        |
| 3.2.5.2  | Hossain et al. model . . . . .  | 53        |
| 3.2.5.3  | LSTM-1D CNN . . . . .   | 54        |
| 3.2.5.4  | Spectrogram and 2D CNN . . . . .  | 55        |
| 3.2.6    | Artifact correction . . . . .   | 57        |
| 3.3      | Results . . . . .   | 58        |
| 3.3.1    | Signal and artifact description . . . . .   | 58        |
| 3.3.2    | Artifact recognition . . . . .  | 59        |
| 3.3.3    | Artifact correction . . . . .   | 60        |
| 3.4      | Discussion . . . . .  | 61        |
| 3.5      | Conclusion . . . . .  | 66        |
| <b>4</b> | <b>Developing conversational virtual humans for social emotion recognition based on large language models</b> | <b>69</b> |
| 4.1      | Introduction . . . . .  | 70        |
| 4.2      | Materials and methods . . . . .   | 75        |
| 4.2.1    | Participants . . . . .  | 75        |
| 4.2.2    | Instrumentation . . . . .   | 76        |
| 4.2.3    | VH: General scheme . . . . .  | 77        |
| 4.2.4    | VH Body: Actions . . . . .  | 78        |

|          |   |            |
|----------|---|------------|
| 4.2.4.1  | Avatar . . . . .  | 78         |
| 4.2.4.2  | Facial Expressions and Body Movement . . . . .                                  | 79         |
| 4.2.4.3  | Lip Synchronization . . . . .   | 80         |
| 4.2.4.4  | Voice synthesizer . . . . .   | 80         |
| 4.2.5    | VH Body: Senses . . . . .   | 81         |
| 4.2.5.1  | Silence Detection . . . . .   | 81         |
| 4.2.5.2  | Audio Transcription . . . . .   | 81         |
| 4.2.6    | VH Mind . . . . .   | 81         |
| 4.2.6.1  | Life-history, context, attitudes, mood and motivations .                        | 82         |
| 4.2.6.2  | Conversational module . . . . .   | 82         |
| 4.2.6.3  | Large Language Model . . . . .  | 83         |
| 4.2.6.4  | Memory . . . . .  | 84         |
| 4.2.7    | Experimental procedure . . . . .  | 84         |
| 4.2.8    | Data analysis . . . . .   | 86         |
| 4.3      | Results . . . . .   | 88         |
| 4.3.1    | Technical performance . . . . .   | 88         |
| 4.3.2    | Human-machine interaction . . . . .   | 88         |
| 4.3.3    | Naturalness and realism . . . . .   | 91         |
| 4.3.4    | Emotion elicitation . . . . .   | 92         |
| 4.3.5    | Emotion identification . . . . .  | 94         |
| 4.4      | Discussion . . . . .  | 96         |
| 4.4.1    | Virtual Human architecture . . . . .  | 97         |
| 4.4.2    | Technical performance . . . . .   | 98         |
| 4.4.3    | Human-machine interaction . . . . .   | 99         |
| 4.4.4    | Naturalness and realism . . . . .   | 101        |
| 4.4.5    | Emotion elicitation . . . . .   | 101        |
| 4.4.6    | Emotion identification . . . . .  | 102        |
| 4.4.7    | Future of virtual humans . . . . .  | 102        |
| 4.4.8    | Limitations and future research . . . . .                                       | 104        |
| 4.5      | Conclusion . . . . .  | 105        |
| <b>5</b> | <b>Emotion and depression recognition through conversational Virtual Humans</b> | <b>107</b> |
| 5.1      | Introduction . . . . .  | 108        |
| 5.2      | Materials and methods . . . . .   | 114        |
