<b>List of figures .....</b>	12
<b>List of tables .....</b>	19
<b>List of equations .....</b>	20
<b>Abstract .....</b>	21
<b>Resumen.....</b>	23
<b>Resum.....</b>	25
<b>Glossary .....</b>	27
<b>State of the art.....</b>	30
<b>1. Liver structure and functionality .....</b>	30
1.1. Liver cells .....	31
1.2. Liver extracellular matrix .....	34
<b>2. Liver disease .....</b>	36
2.1. Liver disease treatment.....	38
<b>3. Current <i>in vitro</i> models for liver tissue engineering .....</b>	39
3.1. Monoculture .....	43
3.2. Co-Culture of hepatic cells .....	44
3.3. Hepatic organoids .....	45
3.4. Microfluidic devices .....	46
<b>4. Hydrogels .....</b>	47
4.1. Polymers for hydrogels .....	48
4.1.1. Natural polymers.....	48
4.1.2. Synthetic polymers.....	50
4.2. Hydrogels for liver tissue engineering .....	51
4.3. Scaffolds for liver tissue engineering. ....	51
<b>5. Bioprinting .....</b>	53
5.1. Bioprinting technologies and main printing parameters .....	53
5.2. Bioprinting parameters for cell culture .....	56
5.3. Design and bioprinting of platforms for liver tissue engineering. ....	57
5.3.1. Bioprinting for studying drug-induced liver injury .....	58

5.3.2. Bioprinting for liver disease modelling .....	59
5.4. Current limitations on extrusion-based bioprinting.....	59
<b>Hypothesis .....</b>	<b>62</b>
<b>Objectives.....</b>	<b>63</b>
<b>Materials .....</b>	<b>64</b>
<b>Methods .....</b>	<b>66</b>
<b>1. Synthesis of tyramine conjugates.....</b>	<b>66</b>
1.1. Gelatin tyramine conjugate (Gel-tyr) .....	66
1.2. Hyaluronic acid tyramine conjugate (HA-tyr) .....	67
1.3. UV-spectrophotometry for quantitative tyramine grafting evaluation... ...	68
1.4. Attenuated total reflectance Fourier transformed infrared (ATR-FTIR) spectroscopy for qualitative evaluation of tyramine grafting and hydrogel forming.....	69
1.5. Gel-HA hydrogel preparation .....	69
1.6. Gel-HA scaffold preparation.....	70
<b>2. Physicochemical properties of Gel-HA hydrogels .....</b>	<b>70</b>
2.1. Rheology.....	70
2.1.1. Mechanical properties and viscosity of Gel-HA hydrogels.....	70
2.1.2. Mechanical properties of Gel-HA scaffolds by rheology evaluation.....	71
2.1.3. Viscosity of Gel-HA inks and mechanical properties of printed hydrogels.	
71	
2.2. Equilibrium water content.....	72
2.3. Crosslinking density of Gel-HA hydrogels.....	72
2.4. Scaffold porosity .....	73
2.5. Estimation of Young's moduli of hydrogels in the swollen state. ....	73
<b>3. In vitro cell culture with HepG2 cells .....</b>	<b>74</b>
3.1. Culture of HepG2 cells in Gel-HA hydrogels.....	74
3.2. Live-dead staining .....	75
3.3. Hepatic functionality of HepG2 cells .....	75
3.3.1. Urea synthesis .....	75
3.3.2. Albumin secretion by ELISA assay .....	76
3.3.3. Hydrogel enzymatic degradation for DNA extraction .....	79

3.3.4. DNA quantification by PicoGreen assay .....	79
<b>4. <i>In vitro assays with primary human hepatocytes</i></b> .....	80
4.1. Gel-HA scaffold sterilization .....	80
4.2. Isolation and culture of primary human hepatocytes .....	80
4.3. Primary human hepatocyte functionality .....	81
4.3.1. Phase I enzyme (Cytochrome P450) activity .....	81
4.3.2. Phase II enzyme (UDP-glucuronosyltransferase) activity .....	82
4.4. Immunofluorescence.....	83
<b>5. <i>In vivo experimentation on ALF model with SCID rodents</i></b> .....	83
5.1. Animals and induction of ALF by APAP overdose.....	83
5.2. Intraperitoneal transplantation of Gel-HA scaffolds containing hepatocytes into mice with ALF .....	84
5.3. Transaminases levels (ALT/AST) determination .....	84
5.4. Histology of liver tissue by haematoxylin-eosin staining .....	85
5.5. Determination of ophthalmic acid levels by mass spectrometry .....	85
5.6. Cytokine determination by magnetic multiplex assay .....	86
<b>6. Generation of 3D models for bioprinting</b> .....	86
<b>7. Printability and uniformity</b> .....	88
<b>8. <i>In vitro experiments with extruded HepG2 within Gel-HA bioinks</i></b> .90	90
<b>9. Miscibility of Gel-HA hydrogels formed by the enzymatic inks Gel and HA for co-culture experiments</b> .....	91
<b>10. Statistical analysis</b> .....	93
<b>Chapter 1. Physicochemical properties of injectable Gel-HA hydrogels and scaffolds.</b> .....	94
1. Quantitative tyramine grafting evaluation by UV.....	94
2. Qualitative tyramine grafting evaluation by ATR-FTIR.....	96
3. Rheology of Gel-HA hydrogels .....	98
4. Estimation of Young's moduli of hydrogels in the swollen state.....	102
5. Rheology and swelling properties of Gel-HA (20-80) scaffolds. ....	103
<b>Discussion</b> .....	107
<b>Chapter 2. Biological performance of Gel-HA hydrogels and scaffolds.</b> .111	111
1. Optimisation of Gel-HA hydrogels for hepatic cell culture with a hepatoma cell line (HepG2) .....	111

2. Gel-HA scaffolds increase the functionality of primary human hepatocytes <i>in vitro</i> .....	114
3. Transplantation of Gel-HA scaffolds seeded with PHH rescues mice with APAP-induced liver failure. ....	118
4. Transplantation of Gel-HA scaffolds with PHH results in a reduction of liver oxidative stress and decreased inflammatory response induced by APAP. ....	120
<b>Discussion.....</b>	122
<b>Chapter 3. Gel-HA bioprinted 3D constructs towards scale up and automatise culture of hepatic cells.....</b>	127
1. Rheological characterization of Gel-HA bioinks.....	127
1.1. Viscosity of Gel-HA bioinks.....	127
1.2. Mechanical properties of Gel-HA bioinks.....	130
2. Printability of Gel-HA bioinks .....	132
2.1. Extrudability of Gel-HA bioinks .....	133
2.2. Uniformity (U) and Pore Factor (PF) of Gel-HA bioinks. ....	134
3. Bioprinting of HepG2 cells in Gel-HA bioinks.....	137
4. Miscibility experiment for concentric individual compartments of Gel-HA bioinks.....	142
<b>Discussion.....</b>	146
<b>General discussion.....</b>	149
<b>Conclusions .....</b>	152
<b>Future perspectives.....</b>	154
<b>Co-culture by bioprinting: Continuing double ring 3D constructs. ....</b>	154
<b>Contributions .....</b>	156
1. Publications in scientific journals .....	156
2. International conferences.....	157
3. National conferences .....	158
4. Other contributions.....	158
4.1. R&D Competitive Projects. ....	158
4.2. Awards .....	158
4.3. Supervision of bachelor and master thesis. ....	159
