

TABLE OF CONTENTS

1.	INTRODUCTION	1
1.1.	BACKGROUND	2
1.1.1.	Practical applications	4
1.1.2.	Advantages of SR-CFST columns	6
1.2.	FIRE BEHAVIOUR OF SR-CFST COLUMNS	7
2.	STATE OF THE ART	9
2.1.	GENERAL	10
2.2.	NUMERICAL MODELS	11
2.3.	EXPERIMENTAL INVESTIGATIONS	12
2.3.1.	Post-fire experimental investigations	12
2.3.2.	Thermo-mechanical experimental investigations	14
2.4.	AVAILABLE CALCULATION METHODS	15
3.	AIM AND SCOPE OF THIS THESIS	19
3.1.	AIM OF THIS THESIS	20
3.1.1.	Specific objectives	20
3.2.	SCOPE AND LIMITATIONS OF THIS THESIS	21
4.	EXPERIMENTAL PROGRAM	23
4.1.	SPECIMEN PREPARATION	24
4.2.	POST-FIRE STUB COLUMNS TESTS	25
4.2.1.	Test specimens	25
4.2.2.	Thermal test set-up	26
4.2.3.	Mechanical test set-up	27
4.2.4.	Test procedure	28
4.2.5.	Results	28
4.2.6.	Proposed design procedures	38
4.3.	THERMO-MECHANICAL STUB COLUMN TESTS	42
4.3.1.	Test specimens	42
4.3.2.	Test set-up	44
4.3.3.	Results	46
5.	DEVELOPMENT OF THE NUMERICAL MODEL	55
5.1.	CHARACTERISTICS OF THE NUMERICAL MODEL	56
5.1.1.	Geometry and finite element mesh	56
5.1.2.	Material properties at elevated temperatures	58
5.1.3.	Thermal contacts	59
5.1.4.	Mechanical contacts	60
5.1.5.	Analysis procedure	60
5.2.	SECTIONAL THERMAL MODEL	63
5.2.1.	Validation	63
5.2.2.	Sensitivity analysis	68
5.3.	THREE-DIMENSIONAL THERMO-MECHANICAL MODEL	71

5.3.1.	Validation.....	71
5.3.2.	Sensitivity analysis	74
6.	PARAMETRIC STUDIES.....	81
6.1.	THERMAL PARAMETRIC STUDIES	82
6.1.1.	Cases of the parametric studies.....	82
6.1.2.	Sectional integration for computing plastic resistance and stiffness.....	83
6.1.3.	Analysis of results	83
6.2.	THERMO-MECHANICAL PARAMETRIC STUDIES.....	88
6.2.1.	Cases of the parametric studies.....	88
6.2.2.	Analysis of results	89
7.	DEVELOPMENT OF A SIMPLIFIED CALCULATION METHOD FOR SR-CFST STUB COLUMNS EXPOSED TO FIRE	95
7.1.	REVIEW OF EXISTING DESIGN GUIDANCE	96
7.2.	A NEW THERMAL CALCULATION METHOD FOR FIRE EXPOSED SR-CFST COLUMNS.....	97
7.2.1.	Simplified cross-sectional temperature field proposal for SR-CFST columns	97
7.2.2.	Applicability limits of the proposed method	107
7.3.	A NEW THERMO-MECHANICAL CALCULATION METHOD FOR AXIALLY LOADED SR-CFST STUB COLUMNS EXPOSED TO FIRE	108
7.3.1.	Simplified thermo-mechanical proposal for axially loaded SR-CFST columns.....	108
7.3.2.	Applicability limits of the proposed method	111
8.	CONCLUSIONS.....	113
8.1.	SUMMARY AND GENERAL CONCLUSIONS	114
8.2.	SPECIFIC CONCLUSIONS	115
8.3.	FUTURE WORK.....	117
	REFERENCES	119
	ANNEX I: COMPENDIUM OF PUBLICATIONS.....	129
