Contents

CHAPTER 1 INTRODUCTION 1

1.1. Thesis motivation 8
1.2. Objectives 10
1.3. Thesis structure 12

CHAPTER 2 FUNDAMENTALS OF FISHERIES ACOUSTICS 15

2.1. Propagation of acoustic waves in water 16
2.2. Acoustic scattering 19
2.2.1. Target strength 22
2.2.2. Fish target strength 25
2.2.3. Biomass estimation 29
2.2.4. Scattering models 30
2.2.5. Finite Element Method (FEM) 33
2.2.6. Method of Fundamental Solutions (MFS) 35
2.2.7. Boundary conditions 37
2.2.8. Advantages and limitations of FEM and MFS 39
2.3. Acoustic instruments 40
2.3.1. Echosounders 40
2.3.2. Acoustic transducer 42

CHAPTER 3 NUMERICAL SIMULATION AND EXPERIMENTAL VALIDATION OF THE ACOUSTICAL TS OF BLUEFIN TUNA SWIMBLADDERS DERIVED FROM 3D COMPUTED TOMOGRAPHICAL IMAGES 53

3.1. Introduction 55
3.2. Material and methods 56
3.2.1. Tuna samples and computer tomography imagery 56
3.2.2. Numerical simulation: MFS 58
3.2.3. Acoustic data acquisition 60
3.3. Results 61
3.3.1. Computerized axial tomography (CT) 61
3.3.2. Backscattering simulation 63
3.3.3. Comparison of numerical simulation and experimental measurements 64
3.4. Discussion 66
3.5. Conclusions 67

CHAPTER 4 SOUND SPEED AN SOUND ABSORPTION MEASUREMENTS OF BLUEFIN TUNA (THUNNUS THYNNUS) TISSUES AND BONES 69

4.1. Introduction 70
4.2. Material and methods 72
4.2.1. Sound speed measurement 72
4.2.2. Absorption coefficient measurement 77
4.2.3. Density measurement 78
4.3. Results 80
4.3.1. Speed sound measurement 80
4.3.2. Absorption coefficient measurement 82
4.3.3. Density measurement 83
4.4. Discussion 84
4.5. Conclusions and future work 85

CHAPTER 5 ROLE OF MATERIAL PROPERTIES IN ACOUSTICAL TARGET STRENGTH: INSIGHTS FROM TWO SPECIES LACKING A SWIMBLADDER 87

5.1. Introduction 89
5.2. Material and methods 91
5.2.1. Measurement of sound speed 91
5.2.2. Measurement of mass density 94
5.3. The method of fundamental solutions 95
5.4. Application of MFS to TS calculation of MAC and SKJ models 97
5.5. Results 101
5.5.1. Validation of sound speed measurement set-up and time response calibration 101
5.5.2. Sound speed measurement in MAC and SKJ tuna flesh 102
5.5.3. Sound speed measurement in MAC and SKJ tuna backbone 103
5.5.4. Volumetric mass density measurement 104
5.5.5. Numerical estimation of TS for MAC and SKJ tuna models 104
5.6. Discussion 109
5.7. Conclusions and further work 116

CHAPTER 6 NUMERICAL COUPLING BETWEEN FEM AND MFS AS METHOD OF NUMERICAL CALCULATION OF TS 117

6.1. Introduction 118
6.2. Methods and materials 119
6.2.1. FEM+MFS coupling 119
6.2.2. Numerical coupling validation: Fluid-Fluid condition 120

6.2.3. Numerical coupling validation: Fluid-Elastic condition 126
6.2.4. Case study application: Thunnus thynnus 127
6.3. Results 137
6.4. Conclusions and further work 140

CHAPTER 7 ULTRASONIC MONITORING OF EARLY LARVAL DEVELOPMENT OF FISH IN TANKS 143

7.1. Introduction 144
7.2. Materials and methods 146
7.2.1. Biological and environmental data acquisition 147
7.2.2. Acoustic scattering model of gilthead seabream larvae 148
7.2.3. Acoustic data acquisition 150
7.2.4. Acoustic data measurement processing 150
7.3. Results 154
7.3.1. Results from biological sampling 154
7.3.2. Results from numerical simulations of the TS of gilthead seabream 156
7.3.3. Results of measured TS with individual traces 158
7.3.4. Comparison between numerical simulations and TS measurements under control conditions 160
7.3.5. Feasibility of swimbladder inflation detection under production conditions 162
7.3.6. Acoustic monitoring of early gilthead seabream's larval growth 163
7.4. Discussion 165
7.5. Conclusions and further work 167

CHAPTER 8 NUMERICAL STUDY OF TARGET STRENGTH AS A FUNCTION OF PULSE DURATION 169

8.1. Introduction 170
8.2. Materials and methods 171
8.2.1. Pulse duration and range of an echosounder 171
8.2.2. Pulse reconstruction 173
8.3. Results and Discussion 178
8.4. Conclusions and future work 180

CHAPTER 9 GENERAL CONCLUSIONS AND DISCUSSION 183

9.1. Chapters summary 184
9.2. General conclusions and discussion 190

9.3. Future lines 192
9.4. Published papers 194
9.5. Unpublished papers 194
9.6. Conference proceedings 195
