Contents	i
List of Figures	v
List of Tables	x
Nomenclature	xi
1 Introduction	1
1.1 General context	1
1.2 Thesis objectives	6
1.3 Thesis outline	7
References	8
2 Fundamentals and literature review	11
2.1 Theoretical aspects of particle formation	11
2.1.1 Precursor formation	13
2.1.2 Soot Particle Inception	14
2.1.3 Surface Growth	15
2.1.4 Coagulation and agglomeration	16
2.1.5 Oxidation	17
2.2 Sources of particle emissions in GDI engines	17
2.2.1 Wall films	18
2.2.2 Insufficient mixing	21
2.2.3 Unvaporized Fuel	23
2.2.4 Fuel Effect	23
2.2.5 Lubrication Oil	24

2.3	Modeling techniques	25
2.3.1	Chemical Kinetics	25
2.3.2	Soot Modeling in GDI Engines	26
2.4	Summary	33
	References	35
3	Resources and tools	47
3.1	Combustion diagnostic tool	47
3.2	3D CFD model	50
3.3	Cantera	53
3.4	Method of moments	54
3.5	SWEEP	59
3.6	Experimental test bench	63
3.6.1	Particle mass concentration	65
3.6.2	Particle number concentration	66
3.7	Summary	68
	References	70
4	Modeling methodology	73
4.1	Gas phase initialization	73
4.1.1	Zone composition	75
4.1.2	Mass flow variable	78
4.2	Conservation equations	79
4.3	Simulation chain	84
4.4	Validation strategy	86
4.5	Summary	88
	References	89
5	Gas-phase heterogeneity	91
5.1	3D-CFD virtual database	91
5.2	1D mixing model development	96
5.2.1	1D Model assumptions and modifications	96
5.2.2	1D model results and calibration	98
5.3	Empirical mixing model	103
5.4	Gas-phase particle formation	106
5.5	Summary	110
	References	113
6	Injector tip wetting	115
6.1	Optical engine experiments	115
6.1.1	Engine characteristics and operating conditions	116

6.1.2	Optical setup	118
6.1.3	Image processing	118
6.1.4	Engine load effect on injector zone soot emissions	120
6.1.5	Injection pressure effect on injector zone emissions	124
6.2	Injector film formation and evaporation	127
6.2.1	Computation of A_s and $F_{\text{corr,pyr}}$	131
6.2.2	Film mass evolution	133
6.2.3	Injector zone mass and volume considerations	134
6.3	Injector induced particle emissions	137
6.3.1	Influence of the temperature correction factor	139
6.3.2	Influence of the fuel concentration	139
6.4	Analysis of gas phase inhomogeneities and injector-induced particles	141
6.5	Summary	143
	References	144
7	Spray-wall interaction	147
7.1	Optical engine experiments	147
7.2	Overview of simplified spray model	149
7.2.1	System of equations	150
7.2.2	Droplet size distribution	155
7.2.3	Spray model validation	156
7.3	Spray-wall impingement	159
7.3.1	Bai-Gosman formulations	160
7.3.2	0D model comparison with CFD	161
7.4	Film evaporation	162
7.4.1	Film evaporation comparison with CFD	166
7.5	PN/PM based on wall film mass computed by CFD and 0D model	167
7.6	Summary	169
	References	171
8	Model sensitivity to parametric variations	175
8.1	Injection timing sweep	175
8.2	Injection pressure sweep	177
8.3	Injector tip temperature sweep	180
8.4	Summary	180
	References	182
9	Conclusions and future works	183

9.1	Summary and conclusions	183
9.2	Future research paths	186
	Global Bibliography	189
