List of Figures **xi**

List of Tables **xvi**

1 Introduction **1**
1.1 State of the Art . . . 2
1.2 Objectives . . . 5
1.3 Thesis structure . . . 7

2 Theory **9**
2.1 Theory of filters . . . 10
2.1.1 Design theory . . . 10
2.1.2 Coupling Matrix . . . 21
2.2 Multipactor . . . 25
2.2.1 Multipactor basics . . . 25
2.2.2 Factors affecting multipactor threshold prediction . . . 27
2.2.3 Particle simulation prediction . . . 29
2.2.4 Circuit-based predictions . . . 32
2.2.5 Wideband application . . . 37
2.2.5.1 Circuit model approach-wideband . . . 38
2.2.5.2 Particle simulation approach-wideband . . . 39
2.2.6 Narrowband application . . . 43
2.2.6.1 Circuit model approach-narrowband . . . 45
2.2.6.2 Particle simulation approach-narrowband . . . 50
2.2.7 Comparison with experimental results . . . 53
2.2.7.1 Experimental test and procedure . . . 53
2.2.7.2 Results and discussion . . . 54
2.3 PIM . . . 59
2.3.1 Causes of PIM . . . 60
2.3.2 Design rules for PIM mitigation in waveguide technology . . . 62
2.3.3 PIM test beds . . . 64

3 Multipactor RF samples **69**
3.1 Traditional multipactor reference samples 71
3.1.1 Coaxial cable sample 71
3.1.2 Waveguide transformer sample 73
3.2 SIR filter sample for multipactor testing 76
3.2.1 Design of a SIR sample 81

4 Multiplexers for high power test beds **93**
4.1 Specifications 96
4.2 Electromagnetic design 99
4.3 Mechanical design 112
4.4 Manufacturing, tuning and characterisation 127

5 Modified Hybrid Folded Rectangular Waveguide Filters **137**
5.1 MHFRW filters geometry 140
5.1.1 Single stub basic unit 145
5.1.2 Double stub basic unit 148
5.1.3 Other topological variants 154
5.2 Super-elliptic MHFRW filter design 157

6 Conclusions and future work **173**
6.1 Conclusions 173
6.2 Future work 176

A Publications **179**
A.1 Publications in international journals 179
A.2 Participation in conferences and workshops 179

Bibliography **181**
