Acknowledgments	vii
Abstract.....	ix
Resumen.....	xi
Resum.....	xiii
List of Figures.....	xxvii
List of Tables.....	xxxiii
Glossary	xl
Chapter 1. Introduction.....	1
1.1. Context	1
1.2. Objectives.....	4
1.3. Structure of the Document.....	5
Chapter 2. State of the Art	7
2.1. Fiber Reinforced Concrete.....	8
2.1.1. Origin and Concept	8
2.1.2. Types of FRCs	9
2.2. Macrosynthetic Fiber Reinforced Concrete (MSFRC)	11
2.2.1. Types of Synthetic Fibers.....	12
a) Micro vs macro fibers	12
b) Material of the fiber	13
i) PP fibers	14
2.2.2. Fresh and Hardened State Properties of MSFRC	16
a) Fresh state properties	17
b) Hardened state properties	17

i) Tests for the evaluation of flexural strengths in MSFRC.....	18
2.2.3. MSFRC Applications.....	19
2.3. Durability based on the Influence of Extreme Environmental Conditions on the Behavior of MSFRCs.....	21
2.3.1. Influence of Temperature on Synthetic Fibers	22
a) Critical properties	23
b) Durability of PP fibers.....	25
i) Chemical and aggressive agents	25
ii) Creep.....	26
iii) Temperature.....	27
c) Comparison of methodologies.....	28
2.3.2. Influence of Temperature on Plain Concrete and on FRCs	29
a) Compressive strength	29
i) Studies at elevated temperatures.....	29
ii) Studies at low and sub-zero temperatures	30
iii) Studies regarding to humidity content	32
iv) Summary on compressive strength under extreme environmental conditions	32
b) Tensile and flexural strengths	33
i) Studies at elevated temperatures.....	33
ii) Studies at low and sub-zero temperatures	34
iii) Long-term studies at temperatures.....	36
iv) Comparison of methodologies.....	37
v) Summary on tensile and flexural strength at temperatures	40
2.3.3. Influence of Temperature on the Fiber-matrix Interface	40
a) Fiber-matrix interface structure at nano- and micro- scale	41
b) Fiber-matrix interface properties in meso- scale	42
i) Comparison of methodologies.....	44
2.4. Design Specifications of MSFRC	47
2.4.1. Fib Model Code.....	47
2.4.2. International Recommendations, Codes and Standards.....	49

2.5. Critical Summary	49
Chapter 3. Experimental Program and Methodology	51
3.1. Outline of the Research Activity.....	52
3.1.1. First Study: Short-term Exposure	52
3.1.2. Second Study: Long-term Exposure	53
3.2. Experimental Program	54
3.2.1. First Study: Short-term Exposure	54
a) First experimental campaign: single fiber tensile strength.....	54
b) Second experimental campaign: FRC compressive strength.....	55
c) Third experimental campaign: FRC flexural tensile strength	56
d) Fourth experimental campaign: FRC direct tensile strength.....	57
3.2.2. Second Study: Long-term Exposure	57
a) First experimental campaign: FRC compressive strength	58
b) Second experimental campaign: FRC flexural tensile strengths	58
3.3. Materials	59
3.3.1. Fibers used	59
3.3.2. Concrete Mix Design used	61
a) Experimental campaigns on compressive and flexural tensile strengths.....	61
i) Characterization tests	63
b) Experimental campaign on direct tensile strength	64
i) Characterization tests	66
3.4. Methodology	66
3.4.1. Simulation of Extreme Environmental Conditions	66
a) Fiber level.....	66
b) Material level	67
3.4.2. Selection of the Time of Exposure	69
3.4.3. Testing Properties at Temperatures.....	70
a) Fiber level.....	71
b) Material level: compressive, flexural and direct tensile strengths	72
i) Compressive strengths	72

ii)	Flexural tensile strengths.....	73
iii)	Influence of an existing pre-crack.....	75
iv)	Direct tensile strength.....	76
3.4.4.	Temperature Control During the Tests.....	79
Chapter 4.	Behavior of MSFRCs under Different Environmental Conditions at Short-term Exposure.....	81
4.1.	Influence of Environmental Conditions on Fiber's Behavior	82
4.2.	Influence of Environmental Conditions on Compressive Strengths	89
4.3.	Influence of Environmental Conditions on Flexural Strengths	93
4.3.1.	Combined Effect of Pre-cracking and Temperature on Flexural Tensile Strengths.....	98
4.3.2.	Effect of Number of Fibers on Flexural Tensile Strengths.....	102
a)	Study of the number of fibers present in the cross-section	102
b)	Effect of number of fibers on flexural strengths at temperature	107
4.4.	Influence of Environmental Conditions on Direct Tensile Strengths	109
4.4.1.	Effect of the Number of Fibers present in the Cross-section on Direct Tensile Strengths at Temperatures	113
4.4.2.	Study on the Fiber Breakage (inside concrete-matrix) at Temperatures	115
4.5.	General Discussion	116
4.5.1.	Single-fiber Level: Discussion.....	116
4.5.2.	Material Level: Discussion	117
a)	Compression behavior	117
b)	Flexural behavior	118
c)	Tensile behavior	121
4.5.3.	Comparison between the Study Levels.....	122
4.5.4.	Summary of the Results.....	123
Chapter 5.	Behavior of MSFRCs after Long-term Exposure under Different Environmental Conditions	125
5.1.	Influence of Environmental Conditions on Compressive Strengths	126
5.1.1.	Compressive Strength's Results after 90 days of exposure... ..	126

5.1.2. Compressive Strength's Results after 180 days of exposure.	128
5.1.3. Analysis of Aging: Comparison between 3, 90 vs 180 Days' Compression Results under Temperatures.....	130
5.2. Influence of Environmental Conditions on Flexural Strengths	133
5.2.1. Effect of Temperature on Flexural Tensile Strengths in Non-Pre-Cracked State at long-term	134
a) Flexural strength's results after 90 days of exposure	134
b) Flexural strength's results after 180 days of exposure	136
c) Analysis of aging: comparison between short- and long-term bending results under extreme environmental conditions.....	141
5.2.2. Combined Effect of Pre-cracking and Temperature on Flexural Tensile Strengths at long-term	144
a) Flexural strength's results after 90 days of exposure	144
b) Flexural strength's results after 180 days of exposure	146
c) Comparison between non-pre-cracked and pre-cracked state bending results under extreme environmental conditions.....	149
5.2.3. Effect of Number of Fibers on Flexural Tensile Strengths at Extreme Environmental Conditions	151
a) Study of the number of fibers present in the fracture surface...	152
b) Flexural strength's results considering N after 90 days of exposure	156
c) Flexural strength's results considering N after 180 days of exposure	157
d) Analysis of aging: comparison between short- and long-term residual flexural results (considering N) under extreme environmental conditions	159
5.3. General Discussion	170
5.3.1. Compressive Behavior	170
5.3.2. Flexural Behavior	171
5.3.3. Aging.....	174
5.3.4. General Summary	179
Chapter 6. Statistical Analysis of the Results of the FRC Flexural Behavior under extreme environmental conditions over time	181
6.1. Introduction to the Exploratory Data Analysis performed.....	181

6.2. Statistical Study of the Influence of “State” factor on Flexural Strengths of FRCs at Extreme Environmental Conditions	184
6.2.1. f_{R3}	184
6.2.2. f_{R3}/N	185
6.2.3. Summary of Results of Statistical Analysis for State.....	185
6.3. Statistical Study of Flexural Strengths of MSFRC (PF1) at Extreme Environmental Conditions.....	185
6.3.1. f_{LOP}	186
a) Inter-groups variability – short-term vs. long-term effects	186
b) Inter-groups variability – temperature effects	187
6.3.2. f_{R1}	188
a) Inter-groups variability – short-term vs. long-term effects	189
6.3.3. f_{R1}/N	189
a) Inter-groups variability – short-term vs. long-term effects	190
6.3.4. f_{R3}	191
a) Inter-groups variability – short-term vs. long-term effects	191
b) Inter-groups variability – temperature effect.....	191
6.3.5. f_{R3}/N	192
a) Inter-groups variability – short-term vs. long-term effects	193
b) Inter-groups variability – temperature effects	193
6.3.6. Summary of Results of Statistical Study for MSFRC-PF1.....	194
6.4. Statistical Study of Flexural Strengths of MSFRC (PF2) at Extreme Environmental Conditions.....	195
6.4.1. f_{LOP}	196
a) Inter-groups variability – temperature effects	196
6.4.2. f_{R1}	197
a) Inter-groups variability – temperature effects	197
6.4.3. f_{R1}/N	198
6.4.4. f_{R3}	198
a) Inter-groups variability – temperature effect.....	199
6.4.5. f_{R3}/N	199

a) Inter-groups variability – temperature effects	200
6.4.6. Summary of Results of Statistical Analysis for MSFRC-PF2..	200
6.5. Statistical Study of Flexural Strengths of MSFRC (PF3) at Extreme Environmental Conditions.....	201
6.5.1. f_{LOP}	201
a) Inter-groups variability – temperature effects	202
6.5.2. f_{R1}	202
a) Inter-groups variability – temperature effects	203
6.5.3. $f_{R1/N}$	203
a) Inter-groups variability – temperature effects	204
6.5.4. f_{R3}	204
a) Inter-groups variability – temperature effect.....	205
6.5.5. $f_{R3/N}$	205
a) Inter-groups variability – temperature effects	206
6.5.6. Summary of Results for MSFRC-PF3	206
6.6. Statistical Study of Flexural Strengths of SFRC at Extreme Environmental Conditions.....	207
6.6.1. f_{LOP}	207
a) Inter-groups variability – short-term vs. long-term effects.....	207
b) Inter-groups variability – temperature effects	208
6.6.2. f_{R1}	209
a) Inter-groups variability – short-term vs. long-term effects.....	209
6.6.3. $f_{R1/N}$	210
a) Inter-groups variability – short-term vs. long-term effects.....	211
6.6.4. f_{R3}	211
6.6.5. $f_{R3/N}$	212
6.6.6. Summary of Results for SFRC-SF	212
6.7. General Summary of the Statistical Study of Flexural Strengths of FRCs at Extreme Environmental Conditions over Time.....	212
6.7.1. Effects of Extreme Environmental Conditions (temperature) .	213
6.7.2. Other effects	213

6.8. Proposal of Simple Numerical Equations for Flexural Behavior of FRCs under Different Extreme Environment Conditions	214
6.8.1. Numerical Equations for Flexural Behavior of MSFRC-PF1 ..	215
a) f_{LOP}	215
b) f_{R1}	216
c) f_{R1}/N	217
d) f_{R3}	217
e) f_{R3}/N	218
6.8.2. Numerical Equations for Flexural Behavior of MSFRC-PF2 ..	219
a) f_{LOP}	219
b) f_{R1}	219
b) f_{R1}/N	220
d) f_{R3}	221
e) f_{R3}/N	221
6.8.3. Numerical Equations for Flexural Behavior of MSFRC-PF3 ..	222
a) f_{LOP}	222
b) f_{R1}	223
c) f_{R1}/N	223
d) f_{R3}	224
e) f_{R3}/N	225
6.8.4. Numerical Equations for Flexural Behavior of SFRCs	225
a) f_{LOP}	225
b) f_{R1}	226
c) f_{R1}/N	227
d) f_{R3}	227
e) f_{R3}/N	228
6.9. General Summary of the Regression Study	229
6.9.1. Response Surfaces.....	231
Chapter 7. Conclusions and Future Research	239
7.1. Conclusions.....	239

7.1.1. Conclusions Derived from Short-term Experimental Campaigns	239
7.1.2. Conclusions Derived from Long-term Experimental Campaigns	241
7.1.3. Conclusions Derived from the Statistical Analysis	242
7.2. Future Research	243
7.3. Publications Derived from this Thesis	244
References	247
