List of Figures V
List of Tables VIII
List of Abbreviations IX
Chapter 1. Overview and context of the research 1
1.1 Feed efficiency in pig production 1
1.2 Traits involved in feed efficiency 2
1.2.1 Inputs: feed intake 2
1.2.2 Output: energy sinks 3
1.3 Computing feed efficiency 6
1.3.1 Traits represented as ratios 6
1.3.2 Residual or regression traits 6
1.4 Main factors affecting feed efficiency 7
1.4.1 Energy content in the diet and digestibility 8
1.4.2 Feeding management 9
1.4.3 Social interactions 9
1.5 Genetics of feed efficiency 9
1.5.1 Estimates of the heritability of feed efficiency and its component traits 9
1.5.2 Genetic correlations of feed efficiency with other traits 10
1.5.3 Molecular mecanishms underlying feed efficiency 11
1.5.4 Effect of microbiota on feed efficiency 11
1.6 Models and methods of genetic evaluation 12
1.6.1 Pedigree based methods 12
1.6.2 Genotype based methods 13
1.6.3 Methods based on artificial intelligence 15
1.7 Selection experiments in pigs 15
1.8 Motivation and objectives 17
1.8.1 Background 17
1.8.2 Objectives 18
1.9 References 19
Chapter 2. Analysis of the causal structure of traits involved in sow lactation feed efficiency 27
2.1 Abstract 27
2.2 Background 27

2.3 Material and Methods 29
2.3.1 Animals and data 29
2.3.2 Statistical analyses 32
2.3.3 Selection strategies 35
2.4 Results 36
2.4.1 Recursive causal structure 36
2.4.2 Quality of fit 37
2.4.3 Variance components and heritabilities 38
2.4.4 Associations between traits 39
2.4.5 Responses to selection 45
2.5 Discussion 46
2.6 Conclusions 50
2.7 Statement 50
2.8 Supplemental material 51
2.9 References 58
Chapter 3. Impact of muti-output and stacking methods on feed efficiency prediction from genotype using machine learning algorithms 61
3.1 Abstract 61
3.2 Background 62
3.3 Material and Methods 63
3.3.1 Animals 63
3.3.2 Phenotypes 63
3.3.3 Genotypes 64
3.3.4 Model fitting and evaluation 65
3.3.5 Predictive performance metrics 67
3.3.6 Feature selection stability 68
3.3.7 Learners 68
3.4 Results 70
3.4.1 Stability of feature selection 70
3.4.2 Prediction performance 71
3.4.3 Prediction performance of the traits involved in the definition of RFI 71
3.4.4 Prediction performance of RFI 73
3.5 Discussion 76
3.6 Conclusions 79
3.7 Statement 79

3.8 Supplemental material 80
3.9 References 83
Chapter 4. Classifying active and inactive states of growing rabbits from accelerometer data using machine learning algorithms 85
4.1 Abstract 85
4.2 Background 86
4.3 Materials and methods 87
4.3.1 Accelerometers 87
4.3.2 Methodology 87
4.3.3 Evaluation of the models 95
4.4 Results 96
4.4.1 Model performance 96
4.4.2 Inference of active/inactive states 98
4.5 Discussion 99
4.6 Conclusions 101
4.7 Statement 101
4.8 Supplemental material 102
4.9 References 105
Chapter 5. Integrating computer vision algorithms and RFID system for identification and tracking of group-housed animals: an example in pigs 107
5.1 Abstract 107
5.2 Background 108
5.3 Material and Methods 110
5.3.1 Animals and video recordings 110
5.3.2 Dataset preparation 111
5.3.3 Training the detection model 112
5.3.4 Tracking-by-detection 113
5.3.5 Assignment for an animal ID to each pig 114
5.3.6 Evaluation of the animal ID assignment 116
5.3.7 Computer hardware setup 116
5.4 Results 116
5.4.1 YOLOv8 finetuned 116
5.4.2 Tracking-by-detection 117
5.4.3 Assignment of the animal ID 119
5.5 Discussion 121

5.6 Conclusions 124
5.7 Statement 125
5.8 References 126
Chapter 6. General discussion 129
6.1 References 135
Chapter 7. General conclusions 139
