

GENERAL INDEX

1	GENERAL INTRODUCTION	1
1.1	OVERVIEW _____	1
1.2	OBJECTIVES AND STRUCTURE OF THE THESIS _____	2
1.3	STUDY AREA: THE JÚCAR RIVER BASIN DISTRICT _____	4
2	DISTRIBUTION PATTERNS OF WOODY RIPARIAN SPECIES IN MEDITERRANEAN RIVERS. COMPARISON OF REGULATED AND UNREGULATED SITES	13
2.1	ABSTRACT _____	13
2.2	INTRODUCTION _____	14
2.3	STUDY AREA _____	17
2.4	METHODS _____	21
2.4.1	Geo-referenced sampling of vegetation by transects	21
2.4.2	Comparison of observed and predicted ground surface for the trunk of the tree	23
2.4.3	Definition of variables and vegetation data analysis	25
2.4.4	Soil sampling and analysis	28
2.4.5	Multivariate analysis	31
2.5	RESULTS I _____	34
2.5.1	Comparison of observed and predicted ground surface level for the trunk of woody riparian shrubs and trees	34
2.5.2	Vegetation description and comparison intra-sites	35
2.6	RESULTS II _____	94
2.6.1	Comparison inter-sites	94
2.6.2	Distribution patterns and soil characteristics of coincident species	97

2.7	DISCUSSION	107
2.7.1	Riparian vegetation composition and zonation	107
2.7.2	Transverse variation across the floodplain: definition of groups	109
2.7.3	Behavior of woody riparian species in regulated and unregulated sites	111
2.7.4	Importance and uncertainty of the variables in the definition of groups	113
2.7.5	Management implications and further research	118
3	RESPONSE CURVES AND HYDROLOGICAL GUILDS OF WOODY RIPARIAN SPECIES, ORIENTED TO WATER MANAGEMENT IN MEDITERRANEAN RIVERS	123
3.1	ABSTRACT	123
3.2	INTRODUCTION	124
3.3	STUDY SITES	127
3.3.1	Hydrological characterization	128
3.3.2	Riverine characterization	132
3.4	METHODS	135
3.4.1	Geo-referenced sampling of vegetation by transects	135
3.4.2	Dendrometric survey	136
3.4.3	Core samples preparation and definition of growth curves	138
3.4.4	Hydrometry	140
3.4.5	Hydraulic modelling	143
3.4.6	Definition of variables	143
3.4.7	Data analysis	147
3.5	RESULTS	148
3.5.1	Growth functions	148
3.5.2	Boxplots of hydrological variables and definition of hydrological guilds	150
3.5.3	Curves of hydrological response	155
3.6	DISCUSSION	162
3.6.1	Hydrological guilds of woody riparian species	162
3.6.2	Factors affecting the quality and uncertainty of response guilds and curves	164
3.6.3	Implications for management	168

4	ASSESSING HYDROMORPHOLOGICAL AND FLORISTIC PATTERNS ALONG A REGULATED MEDITERRANEAN RIVER: THE SERPIS RIVER	173
4.1	ABSTRACT	173
4.2	INTRODUCTION	175
4.3	METHODS	178
4.3.1	Study area	178
4.3.2	Geographical characterisation	180
4.3.3	Biological data collection	184
4.3.4	Hydromorphological characterisation	185
4.3.5	Human impacts and pressures	187
4.3.6	Variable classification	188
4.3.7	Data analyses	188
4.4	RESULTS	191
4.4.1	Floristic composition and riparian habitat quality	192
4.4.2	Instream habitat characteristics and fluvial habitat heterogeneity	196
4.4.3	Variable reduction	198
4.4.4	Factors controlling riparian habitat quality	199
4.4.5	Factors controlling instream habitat quality	201
4.5	DISCUSSION	203
4.5.1	Riparian and instream habitat quality downstream of the Beniarrés dam	203
4.5.2	Longitudinal variation of the flora and hydromorphological indices	205
4.5.3	Factors controlling riparian and instream habitat quality	207
5	SIX DECADES OF CHANGES IN THE RIPARIAN CORRIDOR OF A MEDITERRANEAN RIVER: A SYNTHETIC ANALYSIS BASED ON HISTORICAL DATA SOURCES	213
5.1	ABSTRACT	213
5.2	INTRODUCTION	214
5.3	STUDY AREA AND SITES	217
5.4	METHODS	220

5.4.1	River flow estimation and characterization of study sites	220
5.4.2	Changes in land cover assessed from aerial images	223
5.4.3	Changes in land cover assessed from field survey	227
5.5	RESULTS	229
5.5.1	Changes in river flow regime	229
5.5.2	Changes in the areal extent and distribution of riparian land cover types	233
5.5.3	Riparian landscape structure	236
5.5.4	Land cover transitions	238
5.5.5	Contemporary data (transects)	241
5.6	DISCUSSION	244
5.6.1	Use of historical information sources	244
5.6.2	Temporal and spatial changes: the utility of indices and metrics	246
5.6.3	Interpreting the observed riparian dynamics	248
5.6.4	Implications for management	253
6	CONCLUSIONS AND FURTHER RESEARCH	257
6.1	CONCLUSIONS	257
6.2	FURTHER RESEARCH	265
7	REFERENCES	269
