0 Background and motivation 23
References 25

1 Numerical solutions of first-order matrix differential equations using cubic splines 27
1 Introduction 27
2 Proposed general method 29
3 Algorithm 32
4 Example: A non-linear vector system 32
5 Example: Sylvester matrix differential equation 35
6 Example: Riccati matrix differential equation 36
7 Conclusions 40
References 41

2 Numerical solutions of second-order matrix differential equations using cubic splines 43
1 Introduction 43
2 Notation and terminology 44
3 Construction of the method 44
4 Algorithm 48
5 Examples 48
5.1 A non-linear differential vector system 48
5.2 Incomplete second-order differential system 51
5.3 Second-order polynomial matrix equation 53
6 Conclusions 53
References 55

3 Approximate solutions of linear matrix differential equations with higher-order splines 57
1 Introduction 57
2 Description of the method 58
3 Examples 62
3.1 Example 1 63
3.2 Example 2 64

4 Conclusions . . . 68
References . . . 70

4 Approximate solutions of first-order matrix differential equations with higher-order splines . . . 73
1 Introduction . . . 73
2 Description of the method . . . 74
3 Numerical Examples . . . 79
3.1 A scalar test problem . . . 79
3.2 A non-linear vector system . . . 79
3.3 Sylvester matrix differential equation . . . 81
3.4 The Hénon-Heiles system . . . 81
4 Conclusions . . . 82
References . . . 82

5 Approximate solutions of second-order matrix differential equations with higher-order splines . . . 87
1 Introduction . . . 87
2 Higher-Order Matrix Splines . . . 88
3 Algorithms and MATLAB functions . . . 93
4 Numerical Examples . . . 94
4.1 A non-linear vector system . . . 95
4.2 Linear second-order differential matrix equations . . . 97
4.3 Incomplete linear second-order differential matrix equations . . . 99
5 Conclusions . . . 100
