

TABLE OF CONTENTS

<u>SUMMARY</u>	1
<u>RESUMEN</u>	3
<u>RESUM</u>	5
<u>GENERAL INTRODUCTION</u>	7
1. <u>A biological overview of goal species</u>	9
1.1 <u>European eel</u>	9
1.2 <u>Pufferfish</u>	11
2. <u>Sperm physiology in fish</u>	12
2.1 <u>Factors determining sperm activation</u>	12
2.2 <u>Role of ions during sperm activation</u>	14
3. <u>Sperm quality in fish</u>	16
3.1 <u>Basic parameters for assessing sperm</u>	17
3.2 <u>New tools to determine sperm quality</u>	18
4. <u>Projects, grants and companies involved in this Thesis</u>	23
<u>OBJECTIVES</u>	25
<u>CHAPTER 1</u> <u>Standardization of European eel (<i>Anguilla anguilla</i>) sperm motility evaluation by CASA software</u>	29
<u>CHAPTER 2</u> <u>Study of the effects of thermal regime and alternative hormonal treatments on the reproductive performance of European eel males (<i>Anguilla anguilla</i>) during induced sexual maturation</u>	47

<u>CHAPTER 3</u>	<u>Intracellular changes in Ca²⁺, K⁺ and pH after sperm motility activation in European eel (<i>Anguilla anguilla</i>)</u>	71
<u>CHAPTER 4</u>	<u>Study of pufferfish (<i>Takifugu niphobles</i>) sperm: development of methods for short-term storage, effects of different activation media and role of intracellular changes in Ca²⁺ and K⁺ in the initiation of sperm motility</u>	83
<u>CHAPTER 5</u>	<u>Relationship between spermatozoa motility parameters, sperm/egg ratio, and fertilization and hatching rates in pufferfish (<i>Takifugu niphobles</i>)</u>	105
	<u>GENERAL DISCUSSION</u>	123
	1. <u>Improvements to the control of European eel reproduction</u>	125
	2. <u>Sperm quality biomarkers: which, how and where to apply?</u>	128
	3. <u>New data about the sperm activation process in marine fish</u>	130
	<u>CONCLUSIONS</u>	133
	<u>REFERENCES</u>	135
