Abstract	1
Resumen	3
Resum	5
<b>1.- Introduction to biosensors: transducers, applications and technologies</b>	<b>13</b>
1.1 Introduction	13
1.2 Recognition layer	15
1.3 Transduction mechanisms	16
1.3.1 Electrochemical transducers	16
1.3.2 Mechanical transducers	19
1.3.3 Acoustic transducers	21
1.3.4 Optical transducers	23
1.4 Requirements of a biosensor	30
1.5 Lab-on-a-Chip devices	32
1.5.1 Advantages of LOC devices	34
1.5.2 Drawbacks of LOC devices	35
1.6 Application areas of biosensors and LOC devices	36
1.6.1 Medical diagnosis	36
1.6.2 Environmental control	37
1.6.3 Drug discovery	38
1.6.4 CBRN detection	39
1.6.5 Food Testing	40
1.7 Silicon photonics	41
1.8 Objectives of the thesis	43
1.9 Framework of the thesis	45
1.10 Conclusions	46
References	48

<b>2.- Biochemical surface modification</b>	55
2.1 Introduction	55
2.2 Receptor immobilization using silanes	61
2.2.1 ICPTS-based functionalization	64
2.2.1.1 ICPTS deposition	65
2.2.1.2 Surface characterization of the ICPTS deposition	66
2.2.1.3 BSA attachment	68
2.2.1.4 Immunoassay	69
2.2.1.5 DNA immobilization	69
2.2.2 GOPTS-based functionalization	70
2.2.2.1 GOPTS deposition	71
2.2.2.2 Surface characterization of GOPTS deposition	72
2.2.2.3 DNA immobilization	73
2.2.2.4 Hybridization	75
2.3 Conclusions	75
References	78
<b>3.- Biosensing using photonic crystals</b>	81
3.1 Introduction	81
3.2 Fundamentals of photonic crystals	82
3.2.1 Propagation in homogeneous media	84
3.2.2 1D periodic structure	86
3.2.3 2D periodic structure	89
3.2.4 Vertical confinement	92
3.2.5 Photonic crystal waveguide	93
3.2.6 Slow-light effect	95
3.3 State-of-the-art of PhC-based biosensors	97
3.4 Development of PhC-based sensing structures	106
3.4.1 Photonic crystal configuration and design	106
3.4.2 Fabry-Perot fringes for sensing applications	112
3.4.3 Fabrication of the photonic crystals	117
3.5 Experimental set-up	120
3.5.1 Optical interrogation	120

3.5.2	Fluidic delivery system based on a metallic cavity	123
3.6	Experimental sensing results using PhC-WG	124
3.6.1	Bulk refractive index sensing	124
3.6.2	Antibody sensing	126
3.6.3	DNA sensing	130
3.7	Conclusions	133
	References	134
<b>4.-</b>	<b>Biosensing using ring resonators</b>	138
4.1	Introduction	138
4.2	Fundamentals of ring resonators	140
4.3	State-of-the-art of RR-based biosensors	145
4.3.1	Waveguide cross section	146
4.3.2	Materials	149
4.3.3	Multiplexing approaches	161
4.4	Development of the RR-based sensing structures	158
4.4.1	Ring resonator configuration and layout	158
4.4.2	Fabrication of the ring resonators	161
4.5	Experimental set-up	163
4.5.1	Optical interrogation	163
4.5.2	Microfluidic delivery system based on PDMS	166
4.6	Experimental sensing results using RR	171
4.6.1	Bulk refractive index sensing	172
4.6.2	ICPTS-based functionalization experiments	174
4.6.2.1	Antibody sensing	174
4.6.2.2	DNA sensing	176
4.6.2.3	Other experimental issues	181
4.6.3	GOPTS-based functionalization experiments	186
4.6.3.1	Functionalization process	187
4.6.3.2	DNA sensing	188
4.6.3.3	Chip blocking	192
4.6.3.4	Automated spotting	194
4.6.3.5	Study of different DNA concentrations	197

4.6.3.6 Study of multiple regenerations	198
4.7 Conclusions	200
References	202
<b>5.- Low-cost biosensing using 1D photonic bandgap structures</b>	206
5.1 Introduction	206
5.2 State-of-the-art of non-spectral-based sensing techniques	207
5.3 State-of-the-art of 1D photonic structures for biosensing purposes	210
5.4 Power-based sensing technique using PBG structures	214
5.4.1 Sensitivity	216
5.5 Development of 1D periodic sensing structure	218
5.5.1 Selection of the PBG sensing structure	219
5.5.2 1D periodic structure configuration	221
5.5.3 Fabrication of the corrugated waveguides	228
5.6 Experimental set-up	233
5.6.1 Optical interrogation	233
5.6.2 Fluidic delivery system based on SU8 and PDMS	234
5.7 Experimental sensing results using the power-based technique	236
5.7.1 Bulk refractive index sensing	236
5.7.2 Comparison between power-based and spectral-based interrogation methods	240
5.7.3 Antibody sensing	244
5.8 Conclusions	248
References	250
<b>6.- Conclusions and future trends</b>	252
6.1 Conclusions of the work	252
6.2 Future trends	255
Author contributions	258
List of figures	262
List of tables	273
ANNEX A	275
