## Contents

1 Introduction 1
   1.1 Thesis objectives and structure 3

2 The multipactor phenomenon 7
   2.1 Secondary Electron Emission effect 11
   2.2 Saturation 16
   2.3 Single-carrier and multi-carrier signals 18
   2.4 State of the art 20
      2.4.1 Necessary conditions 20
      2.4.2 Techniques against Multipactor 20
      2.4.3 Multipactor design and test 22
         2.4.3.1 Multipactor prediction 22
         2.4.3.2 Multipactor test 24

3 Article index 29
   3.1 Long-term multipactor discharge in multicarrier systems 29
      3.1.1 Bibliographic record 29
      3.1.2 Abstract 29
   3.2 RF breakdown prediction for microwave passive components
      in multi-carrier operation 30
      3.2.1 Bibliographic record 30
      3.2.2 Abstract 30
   3.3 Non-stationary Statistical Theory for Multipactor 31
      3.3.1 Bibliographic record 31
      3.3.2 Abstract 31
   3.4 Multipactor theory for multi-carrier signals 31
      3.4.1 Bibliographic record 31
      3.4.2 Abstract 32
3.5 Prediction of Multipactor Breakdown for Multi-carrier Applications: The Quasi-stationary Method 32
3.5.1 Bibliographic record 32
3.5.2 Abstract 33

4 Article list
4.1 Long-term multipactor discharge in multicarrier systems 35
4.1.1 Introduction 35
4.1.2 Multipactor multipactor basics 37
4.1.3 SEY model 39
4.1.4 Accumulation model 41
4.1.5 Numerical results 47
4.1.5.1 Single carrier signal 47
4.1.5.2 Pulsed signal 48
4.1.5.3 Multicarrier signal 50
4.1.6 Conclusions 51

4.2 RF breakdown prediction for microwave passive components in multi-carrier operation 53
4.2.1 Introduction 53
4.2.2 Multipactor Basics 53
4.2.3 Field Analysis of Microwave Devices 54
4.2.4 Electron Motion and Space Charge Computation 56
4.2.5 Results 58
4.2.6 Conclusions 60

4.3 Non-stationary Statistical Theory for Multipactor 61
4.3.1 Introduction 61
4.3.2 Limitations of the current theories 62
4.3.3 Non-stationary Statistical Multipactor 65
4.3.3.1 Equations of motion 66
4.3.3.2 Definitions and conventions 67
4.3.3.3 Statistical development 68
4.3.3.4 Theoretical Analysis 75
4.3.4 Numerical Simulations 76
4.3.5 Results 77
4.3.6 Conclusions 81

4.4 Multipactor theory for multi-carrier signals 83
4.4.1 Introduction 83
4.4.2 Multi-carrier signal analysis 85
4.4.3 Multipactor theory for multi-carrier signals 91
4.4.3.1 Equations of motion 91
4.4.3.2 Multipactor theory for multi-carrier signals 93
