Resumen.....	i
Resum	iii
Abstract	v
Index	vii
1. Introduction.....	1
1.1. Zeolites.....	3
1.1.1. The acidity and shape selectivity of zeolites.....	5
1.1.2. Application of zeolites	7
1.2. SAPO-34 and ZSM-5	8
1.3. MTO.....	9
1.4. Mechanism of MTO	11
1.5. Modification of zeolites.....	14
1.5.1. Extra-large zeolites	15
1.5.2. Nano particle zeolites	15
1.5.3. Hierarchical zeolites.....	16
1.6. Phosphorus modified ZSM-5	19
Reference	20
2. The objective of this thesis.....	33
3. Methanol to olefins: activity and stability of nanosized SAPO-34 molecular sieve and control of selectivity by silicon distribution	37
3.1. Introduction	39
3.2. Experimental.....	41
3.2.1. Synthesis of materials	41
3.2.2. Characterization	42
3.2.3. Catalytic experiments	43
3.3. Results and discussion	45
3.3.1. Catalyst characterization.....	45
3.3.2. Catalytic experiments	56
3.4. Conclusions	66

References	67
4. Conversion of methanol to olefins: Stabilization of nanosized SAPO-34 by hydrothermal treatment.....	75
4.1. Introduction	77
4.2. Experimental.....	78
4.2.1. Synthesis of materials	78
4.2.2. Characterization	78
4.2.3. Catalytic experiments	79
4.3. Results and discussion	79
4.3.1. Crystallinity and acidity of SAPO-34 samples	79
4.3.2. Solid NMR characterization	84
4.3.3. Catalytic activity	87
4.4. Conclusions	95
References	95
5. Synthesis of nano-SSZ-13 and the application in the reaction of methanol to olefins.....	102
5.1. Introduction	104
5.2. Experimental.....	105
5.2.1. Catalyst synthesis	105
5.2.2. Characterization	106
5.2.3. Catalytic experiments	106
5.3. Results and discussion	107
5.3.1. Characterization	107
5.3.2. Catalytic performance.....	112
5.4. Conclusion	117
Reference	118
6. Desilication of ZSM-5 by the treatment of NaOH and NaOH/TPA solution and the application in the reaction of methanol to olefins	124
6.1. Introduction	126
6.2. Experiment.....	128
6.2.1. Catalyst preparation.....	128
6.2.2. Characterization.	129
6.2.3. Catalytic experiment	129

6.3. Result and discussion	129
6.3.1. Characterization	129
6.3.2. Catalytic performance.....	140
6.4. Conclusion	149
Reference	150
7. Hydrothermal stabilization of mesoporous high Si/Al ZSM-5 by phosphorus addition and its effect on the activity of methanol to olefins.....	154
7.1. Introduction	156
7.2. Experiment.....	157
7.2.1. Catalyst preparation.....	157
7.2.2. Characterization	158
7.2.3. Catalytic experiments	158
7.3. Results and discussions	158
7.3.1. Characterization	158
7.3.2. Catalytic performance.....	166
7.4. Conclusion	171
Reference	171
8. Conclusion.....	176
Index of Figures	180
Index of scheme.....	188
Index of Table.....	192
Acknowledgement	196
