

Contents

1. Introduction	1
1.1 Preliminaries.....	1
2. F-operators	13
2.1 F-criterion and applications.....	16
2.2 Return sets and density.....	27
2.3 Questions.....	37
3. Recurrence properties defined via essential idempotents	39
3.1 Adjoint of multiplication operators.....	45
3.2 Weighted shifts satisfying P_{BD}	46
3.2.1 A multiply recurrent operator which is not E-recurrent.....	46
3.2.2 Further consequences.....	49
3.3 A characterization of reiteratively hypercyclic operators.....	55
3.4 Questions.....	56
4. Disjoint hypercyclicity along filters	59
4.1 Tuple of powers of weighted shifts.....	60
4.1.1 Bilateral weighted shifts.....	62
4.1.2 Unilateral weighted shifts.....	69
4.1.2.1 The non-filter case.....	73
4.2 T an F-operator but (T, T^2) not d-F.....	75
4.3 Reiteratively hypercyclicity vs. d-F tuples.....	80
4.4 Moving from syndetic to reiteratively hypercyclic weighted shifts.....	82
4.5 Questions.....	92
Bibliography	93
