

# Summary

<b>Abstract</b>	<b>i</b>
<b>Resumen</b>	<b>iii</b>
<b>Resum</b>	<b>v</b>
<b>Abbreviations</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Biomaterials and tissue engineering . . . . .	1
1.2 The need for dynamic interfaces . . . . .	2
1.3 Interfaces based on living bacteria as a novel concept . . . . .	4
1.4 Bacterial adhesion . . . . .	4
1.5 Genetic engineering and synthetic biology . . . . .	11
1.6 Cell adhesion . . . . .	19
The extracellular matrix . . . . .	19
Cell adhesion . . . . .	20
Fibronectin structure and functions . . . . .	23
The III <sub>7-10</sub> fragment . . . . .	25
RGD loop structure . . . . .	28
1.7 <i>L. lactis</i> , why and how . . . . .	30
1.8 <i>L. lactis</i> phylogeny, metabolism and physiology . . . . .	33
Phylogeny . . . . .	33
Metabolism . . . . .	36
Lactic acid configuration . . . . .	38
<b>2 Objectives</b>	<b>39</b>

---

<b>3</b>	<b>Materials and methods</b>	<b>41</b>
3.1	Cloning protocols	41
	Endonuclease restriction	41
	Ligation	41
	<i>E. coli</i> transformation	42
	<i>E. coli</i> culture	42
	Polymerase chain reaction (PCR)	42
	Preparation of <i>L. lactis</i> electrocompetent cells	43
	<i>L. lactis</i> electrotransformation	43
	Plasmid isolation from <i>L. lactis</i>	43
	DNA purification from PCR or enzymatic reactions	44
	DNA purification from gel bands	44
	Cell lysis and plasmid purification	45
3.2	Bacterial culture	45
3.3	<i>L. lactis</i> biofilm production	46
3.4	Mammalian cell culture	46
	Fn <sup>-</sup> /Fn <sup>-</sup> murine fibroblasts	47
	NIH3T3	47
	C2C12	47
	hMSC-BM	47
3.5	Immunofluorescence assays	48
	Cell adhesion	48
	Cell differentiation	48
3.6	Protein quantification by Western blot	49
	Membrane localisation of FNIII <sub>7-10</sub>	49
	Expressed FNIII <sub>7-10</sub> fragment	49
	FAK phosphorylation	50
3.7	Enzyme-linked immunosorbent assay (ELISA)	51
	Membrane-bound FNIII <sub>7-10</sub>	51
	ERK 1/2 sandwich ELISA	51
3.8	Image analysis	52
	Cell morphology	53
	Bacterial and cell viability	53
	Biofilm density	54
	Western blot quantification	54
	Differentiation analysis	55
3.9	Materials preparation	55
	PLLA electrospinning	55

## SUMMARY

---

Ethyl acrylate polymerisation . . . . .	56
PEA spin casting . . . . .	56
PLLA spin casting . . . . .	56
<b>4 <i>Lactococcus lactis</i> cloning and characterization</b>	<b>57</b>
4.1 Introduction . . . . .	57
4.2 Materials and methods . . . . .	58
Cloning . . . . .	58
ELISA . . . . .	63
Detection of FNIII <sub>7-10</sub> fragment by Western blot . . . . .	64
Scanning electron microscopy . . . . .	64
Atomic force microscopy . . . . .	65
Confocal laser scanning microscopy . . . . .	65
Bacterial viability . . . . .	65
Image analysis . . . . .	66
4.3 Results . . . . .	66
Biological activity of the FNIII <sub>7-10</sub> fragment . . . . .	67
Biofilm morphology . . . . .	71
Biofilm viability . . . . .	72
Biofilm stability . . . . .	74
4.4 Conclusions . . . . .	78
<b>5 Cell-bacteria co-cultures and cell behaviour</b>	<b>81</b>
5.1 Introduction . . . . .	81
5.2 Material and Methods . . . . .	88
Ethyl acrylate polymerisation . . . . .	88
PEA spin casting . . . . .	88
Biofilm production . . . . .	89
Biofilm viability . . . . .	89
Biofilm metabolism . . . . .	89
Production of biofilms with tunable areal density . . . . .	90
Fn <sup>-</sup> /Fn <sup>-</sup> fibroblasts cell culture . . . . .	90
NIH3T3 cell culture . . . . .	90
C2C12 cell culture . . . . .	91
Human mesenchymal stem cell culture . . . . .	91
Sarcomeric myosin immunostaining . . . . .	91
Vinculin immunostaining . . . . .	92
Image analysis . . . . .	92
FAK phosphorylation analysis by Western blot . . . . .	93

---

ERK1/2 phosphorylation by sandwich ELISA . . . . .	93
Quantitative real-time PCR . . . . .	94
Statistical analysis . . . . .	95
5.3 Results . . . . .	96
Cell adhesion and signalling . . . . .	96
Myogenic differentiation and cell signalling . . . . .	104
Adhesion and differentiation of human mesenchymal stem cells .	106
ERK1/2 phosphorylation analysis . . . . .	107
Differentiation assessment by gene expression analysis . . . . .	109
5.4 Conclusions . . . . .	112
<b>6 Bacterial inclusion in polymeric systems</b>	<b>115</b>
6.1 Introduction . . . . .	115
6.2 Materials and methods . . . . .	118
Myogenic differentiation and cell signalling . . . . .	119
6.3 Results . . . . .	120
Immobilisation in poly-L-lactic acid nanofibres . . . . .	120
Immobilisation in poly-L-lactic acid thin films . . . . .	123
6.4 Conclusions . . . . .	125
<b>7 Future work</b>	<b>127</b>
<b>8 Conclusions</b>	<b>131</b>
