

INDEX

Abstract.....	iii
Resumen.....	vii
Resum.....	xi
1. INTRODUCTION.....	1
1.1. Food industry byproducts as source of phenolic compounds.....	3
1.2. Olive oil industry.....	6
1.2.1. Oil extraction systems and byproducts.....	7
1.2.2. Olive phenolic compounds.....	9
1.3. Drying.....	13
1.3.1. Fundamentals.....	13
1.3.2. Impact on phenolic content.....	18
1.4. Extraction of phenolic bioactive compounds.....	21
1.4.1. Conventional methods.....	22
1.4.2. New technologies.....	23
1.5. Use of natural phenolic extracts in the food industry.....	26
1.6. Extracts stability.....	28
1.7. Conclusions.....	29
2. OBJECTIVES.....	33
3. METHODOLOGY.....	37
3.1. Working plan.....	39
3.2. Raw material.....	43
3.2.1. Olive leaves.....	43
3.2.2. Olive pomace.....	44
3.3. Methodology.....	45
3.3.1. Raw material pretreatments.....	45
3.3.2. Phenolic compounds extraction.....	46
3.3.3. Storage and <i>in vitro</i> digestion.....	47
3.3.4. Infusion of phenolic compounds.....	47

3.3.5. Analysis of antioxidant potential, enzymatic activity and microstructure.....	47
4. RESULTS AND DISCUSSION.....	51
4.1. Chapter 1. Processing of raw material.....	53
“Influence of freezing and dehydration of olive leaves (var. Serrana) on extract composition and antioxidant potential”.....	55
“Influence of air temperature on drying kinetics and antioxidant potential of olive pomace”.....	83
4.2. Chapter 2. Phenolic extraction.....	115
“Kinetic and compositional study of phenolic extraction from olive leaves (var. Serrana) by using power ultrasound”.....	117
4.3. Chapter 3. Extracts stability.....	151
“Influence of olive leaf processing on the bioaccessibility of bioactive polyphenols”.....	153
“Drying and storage of olive leaf extracts. Influence on polyphenols stability”.....	183
4.4. Chapter 4. Prospective applications.....	207
“Influence of drying on the retention of olive leaf polyphenols infused into dried apple”.....	209
“The role of microstructure and enzymatic activity on the phenolic content of impregnated dried apple”.....	243
5. GENERAL DISCUSSION.....	269
6. CONCLUSIONS.....	279
7. RECOMMENDATIONS.....	287
8. SCIENTIFIC CONTRIBUTION.....	293
9. REFERENCES.....	299
