

PROJECT FORMULATION

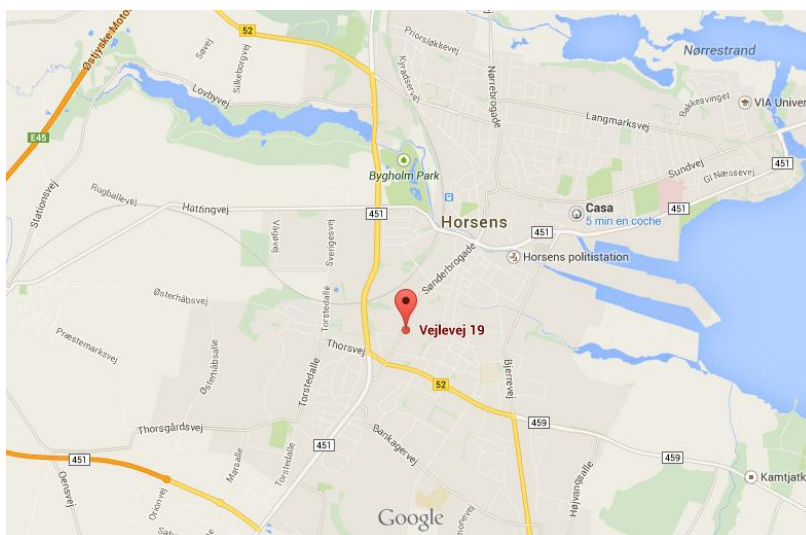

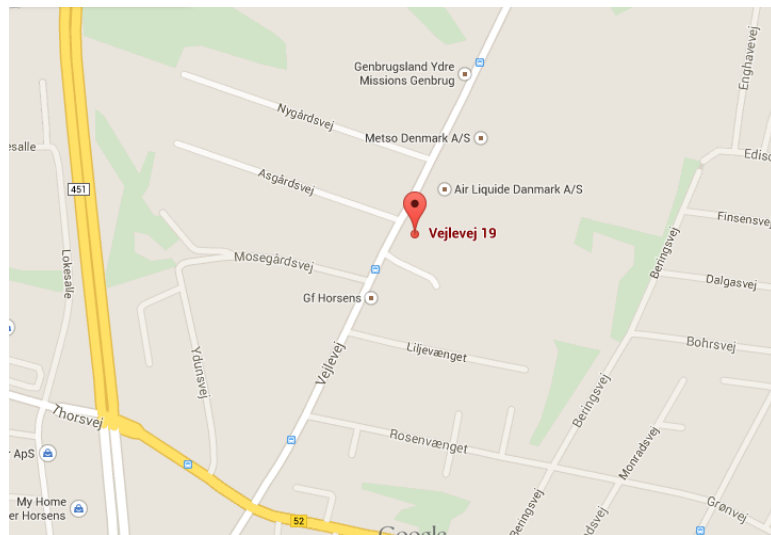

Student name: María García Lloris

Student number: 204091

Project: Air liquide Office Building in Vejlevej 19, 8700 Horsens

Client: BBH1 ApS, c/o Svanen Development A/S, Gødvad Bakke 4, 8600 Silkeborg

Consultant: Benny Leon Olsen

1. Description of the project:

The project is about a construction in Vejlevej 19, 8700 Horsens, region Midtjylland in Denmark. According to the documents it was built in 2006 and is composed by an office building with two floors and a basement. The two floors are offices areas and the basement is composed by two archives, installation rooms, a depot, a mail room and other spaces.

2. Description of the task:

I will work as a main contractor, which means that I will be the responsible of the construction and organization of the project. As well as this, I will work on the main trades:

- Sewer works
- Ground works
- Ground consolidation works
- Concrete works
- Concrete element mounting works

And I will use subcontractors for the next trades:

- Landscape grading works
- Masonry works
- Carpentry works
- Joinery works
- Ironmongery works
- Floor covering works
- Roofing works
- Water drainage and sanitary works
- Heating system
- Ventilation system
- Technical insulation
- Electrical works
- Elevator works

3. Time schedule
