Contents

1 Introduction **1**
- 1.1 Context of medical imaging . . . 1
  - 1.1.1 Medical imaging modalities . . . 1
- 1.2 Computed tomography image reconstruction review . . . 7
- 1.3 Motivation . . . 9
- 1.4 Objectives . . . 10

2 Introduction to linear systems **13**
- 2.1 Systems of linear equations . . . 13
  - 2.1.1 Triangular systems . . . 14
  - 2.1.2 Overdetermined systems . . . 15
  - 2.1.3 Sensitivity of linear systems . . . 15
- 2.2 The least squares problem . . . 16
  - 2.2.1 Sensitivity of the least squares problem . . . 18

3 The CT image reconstruction as a linear system **19**
- 3.1 Modeling the CT . . . 20
  - 3.1.1 X-ray source . . . 20
  - 3.1.2 X-ray detection . . . 20
  - 3.1.3 X-ray attenuation . . . 21
  - 3.1.4 The CT reconstruction problem . . . 22
  - 3.1.5 Computation of the volume intersection . . . 25
- 3.2 Properties of the CT linear system . . . 35
- 3.3 Exploiting symmetries . . . 38

4 Implementation of data structures **41**
- 4.1 Sparse matrix data structures . . . 41
- 4.2 Binary search tree . . . 44
  - 4.2.1 Balanced Binary search tree . . . 48
- 4.3 Implementation of the BST sparse matrix . . . 50
  - 4.3.1 Performance improvements . . . 53

5 Implementation of the QR algorithm 55
5.1 The QR algorithm . . . 55
5.2 Rotations and reflections . . . 56
5.2.1 Householder reflections . . . 56
5.2.2 Givens rotations . . . 58
5.3 Implementation . . . 59
5.3.1 Givens rotations . . . 60
5.3.2 Givens QR decomposition . . . 62
5.3.3 Q storage . . . 66

6 Fill-in in the QR decomposition 71
6.1 Standard fill-in reduction . . . 71
6.1.1 Standard fill-in reduction strategies . . . 73
6.1.2 Standard fill-in reduction performance . . . 74
6.2 Fill-in reduction alternative . . . 79
6.2.1 Heuristic strategy . . . 80
6.2.2 Heuristic implementation . . . 81
6.2.3 Heuristic performance . . . 87

7 Parallelization of the QR algorithm 93
7.1 Fine-grained subtasks . . . 93
7.2 Coarse-grained subtasks . . . 96
7.3 Parallelization of the backward substitution process . . . 99

8 The QR solution of the linear system 101
8.1 Image quality . . . 101
8.2 Standard deviation noise analysis . . . 114
8.3 Sharpness analysis . . . 121
8.3.1 *In vivo* performance . . . 133
8.4 Noise power spectrum analysis . . . 138
8.4.1 Multidimensional NPS framework . . . 138
8.4.2 NPS results . . . 140
8.5 Time complexity of the QR solution . . . 147

9 Conclusions 149
