|---|----------|
| ACKNOWLEDGMENTS .....   | I        |
| ABSTRACT .....  | III      |
| RESUMEN .....   | V        |
| RESUM .....   | VII      |
| LIST OF ABBREVIATIONS .....   | IX       |
| LIST OF SYMBOLS.....  | XI       |
| LIST OF TABLES .....  | XVII     |
| LIST OF FIGURES.....  | XIX      |
| <b>Chapter 1. INTRODUCTION.....</b>   | <b>1</b> |
| 1.1. The Glass Transition.....  | 8        |
| 1.1.1. General Aspects.....   | 8        |
| 1.1.1.1. Factors affecting the glass transition .....                                 | 12       |
| 1.1.1.2. Structural Relaxation .....  | 13       |
| 1.1.1.3. Properties of the Structural Relaxation.....                                 | 14       |
| 1.1.2. Experimental determination of the Glass transition.<br>Molecular Mobility..... | 15       |
| 1.1.2.1. Glass transition. $\alpha$ Relaxation .....                                  | 17       |

|                   |  |           |
|-------------------|--|-----------|
| 1.1.2.2.          | Local motions. Secondary Relaxations. ....                       | 22        |
| 1.2.              | Polarization and Dielectric Spectroscopy .....                   | 22        |
| 1.2.1.            | Polarization.....  | 23        |
| 1.2.1.1.          | Polarization mechanisms .....                                    | 25        |
| 1.2.2.            | Phenomenological description of the dielectric measurements..... | 28        |
| 1.2.2.1.          | The Debye Model .....  | 30        |
| 1.2.2.2.          | Complex Systems. Distribution of the<br>relaxation times. ....   | 33        |
| 1.2.2.3.          | The Coupling Model.....  | 39        |
| <b>Chapter 2.</b> | <b>OBJECTIVES</b> .....  | <b>42</b> |
| 2.1.              | General and specific objectives .....                            | 45        |
| <b>Chapter 3.</b> | <b>MATERIALS AND METHODS</b> .....                               | <b>49</b> |
| 3.1.              | Materials .....  | 51        |
| 3.1.1.            | Synthesis of VP/BA Copolymers .....                              | 52        |
| 3.1.2.            | Synthesis of EG-PUPH Composites.....                             | 55        |
| 3.2.              | Experimental Techniques .....                                    | 58        |
| 3.2.1.            | Sample hydrophilicity characterization .....                     | 59        |
| 3.2.2.            | Fourier Transform Infrared Measurements .....                    | 59        |
| 3.2.3.            | Thermogravimetric Analysis .....                                 | 61        |
| 3.2.4.            | Morphological analysis .....                                     | 63        |

|                   |   |            |
|-------------------|---|------------|
| 3.2.5.            | X-ray characterization .....                            | 65         |
| 3.2.6.            | Differential Scanning Calorimetry Measurements .....    | 66         |
| 3.2.7.            | Broadband Dielectric Relaxation Spectroscopy .....      | 71         |
| 3.2.8.            | Mechanical Properties .....                             | 79         |
| <b>Chapter 4.</b> | <b>CHARACTERIZATION OF CROSS-LINKED</b>                 |            |
|                   | <b>VINYLPYRROLIDONE/BUTYL ACRYLATE COPOLYMERS .....</b> | <b>87</b>  |
| 4.1.              | Introduction .....                                      | 91         |
| 4.2.              | Results and discussion .....                            | 93         |
| 4.2.1.            | Sample hydrophilicity characterization .....            | 93         |
| 4.2.2.            | Fourier Transform Infrared Measurements .....           | 95         |
| 4.2.3.            | Thermogravimetric analysis .....                        | 100        |
| 4.2.4.            | Differential scanning calorimetry measurements .....    | 103        |
| 4.2.5.            | Dielectric measurements .....                           | 107        |
| 4.2.6.            | Mechanical properties .....                             | 140        |
| 4.3.              | Conclusions .....                                       | 148        |
| <b>Chapter 5.</b> | <b>EFFECT OF CROSS-LINKING ON THE MOLECULAR</b>         |            |
|                   | <b>DYNAMICS OF THE VINYLPYRROLIDONE-BUTYL ACRYLATE</b>  |            |
|                   | <b>COPOLYMERS .....</b>                                 | <b>151</b> |
| 5.1.              | Introduction .....                                      | 155        |
| 5.2.              | Results and Discussion .....                            | 158        |

|  |            |
|--|------------|
| 5.2.1. Sample hydrophilicity characterization .....  | 158        |
| 5.2.2. MDSC Measurements .....   | 158        |
| 5.2.3. Mechanical properties .....   | 162        |
| 5.2.4. DRS measurements .....  | 162        |
| 5.3. Conclusions .....   | 182        |
| <b>Chapter 6: CHARACTERIZATION OF EXPANDED GRAPHITE-<br/>POLYCARBONATEDIOL POLYURETHANE COMPOSITES .....</b> | <b>185</b> |
| 6.1. Introduction .....  | 189        |
| 6.2. Results and Discussion .....  | 194        |
| 6.2.1. Fourier Transform Infrared Spectroscopy .....   | 194        |
| 6.2.2. Morphological Analysis .....  | 196        |
| 6.2.3. X-ray Diffraction .....   | 199        |
| 6.2.4. Thermogravimetric Analysis .....  | 200        |
| 6.2.5. Differential Scanning Calorimetry Measurements .....  | 202        |
| 6.2.6. Dynamic Mechanical Analysis .....   | 205        |
| 6.2.7. Dielectric Measurements .....   | 206        |
| 6.3. Conclusions .....   | 224        |
| <b>Chapter 7: CONCLUSIONS AND FUTURE LINES OF RESEARCH .....</b>   | <b>227</b> |
| 7.1. Conclusions .....   | 229        |
| 7.2. Research Limitations & Future Lines of Research.....  | 232        |

|  |            |
|--|------------|
| 7.2.1. Cross-linked VP/BA Copolymers ..... | 233        |
| 7.2.2. PUPH/EG Composites.....             | 235        |
| <b>REFERENCES</b> .....                    | <b>237</b> |
