

Contents

1	Introduction and basic concepts	1
1.1	Topological dynamics	1
1.2	Hypercyclic and chaotic operators	4
1.3	Hypercyclic criteria	7
1.4	Weighted shifts	10
1.5	C_0 -semigroups	18
1.6	Frequent Hypercyclicity	22
1.7	Pettis Integral	24
2	The specification property for backward shifts	27
2.1	Introduction	27
2.2	Strong specification property for backward shift operators	29
2.3	Examples	34
2.3.1	Weighted backward shift operators on ℓ^p	34
2.3.2	Differentiation operator on Hilbert spaces	34
3	Cantor Sets, Bernoulli Shifts and Linear Dynamics	37
3.1	Introduction	38
3.2	Notation and preliminaries	40
3.3	Cantor sets and the Strong Specification Property	42
3.4	Mixing measures and Bernoulli shifts	46
4	Operators with the specification property	53
4.1	Introduction	53
4.2	Basic properties	57

4.3	Connections with other dynamical properties	61
4.4	Families of operators with the OSP	66
4.5	Concluding remarks	67
5	The specification property for semigroups	71
5.1	Introduction	72
5.2	Specification property for C_0 -semigroups	75
5.3	SgSP and other dynamical properties of C_0 -semigroups .	76
5.4	Applications and examples	80
	Bibliography	87
