INDEX

INTRODUCTION
Antimicrobial edible films and coatings for fruit and vegetables. A review 3

OBJECTIVES 61

CHAPTER 1
Inhibition of Penicillium digitatum and Penicillium italicum by hydroxypropyl methylcellulose-lipid edible composite films containing food additives with antifungal properties 65

CHAPTER 2
Curative and preventive activity of hydroxypropyl methylcellulose-lipid edible composite coatings containing food additives to control citrus postharvest green and blue molds 97

CHAPTER 3
Effect of antifungal of hydroxypropyl methylcellulose (HPMC)-lipid edible composite coatings on postharvest decay development and quality attributes of cold-stored ‘Valencia’ oranges 125

CHAPTER 4
Effect of antifungal hydroxypropyl methylcellulose (HPMC)-lipid edible composite coatings on penicillium decay development and postharvest quality of cold-stored ‘Ortanique’ mandarins 153

Submitted to Journal Agricultural Food Chemistry.
CHAPTER 5
Performance of hydroxypropyl methylcellulose (HPMC)-lipid edible composite coatings containing food additives with antifungal properties during cold storage of ‘Clemenules’ mandarins

Submitted to *Food Research International.*

CHAPTER 6
Efecto del recubrimiento con quitosano en el control de las podredumbres verde y azul de los cítricos

GENERAL DISCUSSION

GENERAL CONCLUSIONS AND FUTURE WORK

APPENDICES

A 1. APPENDIX PHOTOGRAPHIC
