

TABLE OF CONTENTS

<u>SUMMARY</u>		1
<u>RESUMEN</u>		4
<u>RESUM</u>		7
<u>GENERAL INTRODUCTION</u>		11
1. Epigenetic factors		15
1.1 Epigenesis		
1.2 Environment and epigenesis		
1.3 Environmental epigenetic effects transmitted trans- generationally		
1.4 Environmental epigenetic factors that affect the development and reproduction		
2. Depuration and purification of waters		23
2.1 Urban water cycle		
2.2 Water for human consumption		
2.3 Wastewater and purification treatments		
2.4 Wastewater discharge to the environment		
2.5 Contaminant substances		
2.6 Analytical methods for emerging environmental contaminants		
3. Zebrafish as bioindicator of water quality		37
<u>OBJECTIVES</u>		41
<u>EXPERIMENTAL PLANNING</u>		45
<u>STUDIES</u>		
<u>STUDY I</u>	Zebrafish (<i>Danio rerio</i>) as a possible bioindicator of epigenetic factors present in drinking water that may affect reproductive function: is chorion an issue?	49
<u>STUDY II</u>	Zebrafish as a possible bioindicator of organic pollutants with effects on reproduction in drinking waters.	63

<u>STUDY III</u>	Zebrafish as a possible bioindicator of organic pollutants in drinking waters with effects on reproduction: are effects cumulative or reversible?	79
<u>STUDY IV</u>	Discrimination of the effects on zebrafish reproduction from pollutants in drinking water via female, via male and/or via fecundation water.	99
	<u>GENERAL DISCUSSION</u>	103
	<u>CONCLUSIONS</u>	119
	<u>REFERENCES</u>	123
