

Chapter 1: Introduction.....	1
1.1.    Chemical structure of bile acids.....	1
1.2.    Biosynthesis of the bile acids .....	4
1.3.    Enterohepatic circulation.....	6
1.4.    Photophysics and photochemistry .....	8
1.4.1.    Basic concepts .....	8
1.4.2.    Specific photophysical and photochemical processes of interest in this Thesis.....	10
1.5.    Recent studies based on bile acids .....	19
Chapter 2: Objectives .....	23
Chapter 3: Radical–Mediated Dehydrogenation of Bile Acids.....	25
3.1. Introduction .....	25
3.2. Results and discussion .....	28
3.3. Conclusions .....	37
3.4. Experimental .....	38
3.4.1. Synthesis .....	38
3.4.2. Preparative irradiation of CAMe in the presence of Bzp.....	42
3.4.3. Preparative irradiation of CA in the presence of KPMe.....	49
3.5. Supplementary material .....	49
3.5.1. Instrumentation .....	49
3.6.3. Additional NMR spectra .....	50
Chapter 4: Through–Bond Energy Transfer and Exciplex Formation Processes .....	55
4.1. Introduction .....	55
4.2. Synthesis .....	59
4.3. Results and discussion .....	61
4.4. Conclusions .....	72

Outline

---

4.5. Scope of the through-bond energy transfer process.....	72
4.5.1. Introduction .....	72
4.5.2. Synthesis .....	74
4.5.3. Results and discussion .....	75
4.5.4. Conclusions .....	79
4.6. Experimental .....	79
4.6.1. Synthesis and characterization.....	79
4.7. Supplementary material .....	114
4.7.1. UV-Vis characterization.....	114
4.7.2. Instrumentation .....	114
4.7.3. Additional NMR spectra .....	115
Chapter 5: Photosensitized Thymine Dimerization <i>via</i> Triplet Exciplexes .....	127
5.1. Introduction .....	127
5.2. Synthesis .....	131
5.3. Results and discussion .....	133
5.3.1. Photophysics .....	133
5.3.2. Photochemistry.....	135
5.4. Related systems with different Bzp/Thy/Thy or Thy/Thy combinations .....	140
5.4.1. Introduction .....	140
5.4.2. Synthesis .....	141
5.4.3. Results and discussion .....	146
5.5. Conclusions .....	155
5.6. Experimental .....	155
5.6.1. Synthesis and characterization.....	155
5.6.2. Preparative irradiations .....	202
5.7. Supplementary material .....	219

5.7.1. Determination of $\tau_T$ of Bzp by energy transfer to Npt .....	219
5.7.2. UPLC analysis of the irradiated samples .....	220
5.7.3. Instrumentation .....	222
5.7.4. Additional NMR spectra .....	223
Chapter 6: Instrumentation .....	261
6.1. Chemicals .....	261
6.2. Equipment .....	262
Chapter 7: Conclusions .....	265
Chapter 8: References.....	267
