PHASE 1_Limits to the field of research

1_ RESEARCH ARTICULATION.....	8
1.1 _ Framing the scientific problem. Building renewal through the enhancement of local resources.....	8
1.2 _ Limitation of the research field. The reconstruction of L'Aquila through the reuse of safety system components to secure existing buildings.....	9
1.3 _ The purposes and objectives	10
1.4 _ The methodology.....	11
1.5 _ The content.....	12
1.6 _ The impact on the territory of L'Aquila	12

PHASE 2_ Preliminary cognitive-analytic phase. International reflections about the potential of wastes.

2_ ELEMENTS AND PARAMETERS FOR THE ENHANCEMENT OF COMPONENTS AT END OF LIFE	16
2.1_ The value of the wastes.....	16
2.2 _ The regulations	17
2.3 _ Best practices in construction	20
3_ ELEMENTS AND PARAMETERS FOR THE ENHANCEMENT OF DEMOLITION OPERATIONS	26
3.1 _ The C&D waste	26
3.2 _ Methods, tools and techniques of demolition	27
3.3 _ Case study: experimentation in the Valencian Community.....	35
Economic assessment.....	37
Environmental assessment.....	38
The convenience of the selective demolition	39

PHASE 3_ Specific analytical learning phase. Characterization of waste elements arising from the selective demolition of safety systems in L'Aquila.

4 _ SAFETY SYSTEMS IN L'AQUILA.....	42
4.1 _ Costs of temporary safety systems.....	42
4.2 _ Classification of temporary safety systems.....	44
Shorings.....	44
Hoopings.....	46
Tie rods.....	47
Jacketings.....	47
Coverings.....	48
4.3 _ Definition and analysis of the safety systems	48
Steel systems	48
Polyester bands	60
Systems in wood.....	61
4.4 _ Sistems to compare.....	62
5_EXAMPLIFYING INTERNATIONAL PROJECTS.....	63
5.1_The situation of international research	63
Gilmour Road, R. Murphy, Edinburgo, 1994.....	64
Centro di arti visive, Joao Mendes Ribeiro, Coimbra, 2003.....	70
Intermediae Matadero Madrid, Franco e Van Teslaar, Madrid, 2007	68
House Rot Ellen Berg, Vylder Vinck Tailieu, Oudenaarde, 2011	70
The difference of Ebitsuka, 403 Architecture, Hamamatsu, 2011	72
Egg 333 Remodeling, Joho Architecture, HwaYang, 2012	74
Padiglione, GJL Architektec, Freiburg, 1998.....	76
Eat house, Atelier Gras, Rotterdam, 2010	78
Studio East Dining, Carmody Groarke, Londra, 2010	80
Les Grandes Table de L'ile, 1024 Architecture, Parigi, 2011	82
The wall of Zudaji, 403 Architecture, Hamamatsu, 2011	84
Pavilion Humanidade, Juacaba, Lessa, Rio de Janeiro, 2012.....	86

PHASE 4_ Research processing phase. Optimization of the reuse of materials resulting from selective demolition of safety systems in L'Aquila.

6 _ WOODEN ELEMENTS: OPTIMIZATION OF REUSE.....	90
6.1 _ Durability of the wood	90
6.2 _ Treatments for the wood.....	94
6.3 _ Analysis of elements in wood arising from selective demolition.....	98
Purposes of the analysis	98
Method and mode of analysis	98
Results and discussion	109
Limits of the research and further developments.....	115
Conclusions	116
6.4 _ Methodological- operative procedure for the reuse.....	116
6.5 _Levels of reuse	120
6.6 _Good practices for construction.....	133

7 _ STEEL ELEMENTS: OPTIMIZATION OF REUSE.....	136
7.1 _ Steel degradation.....	136
7.2 _ Steel treatments	140
7.3 _ Dimension, shape and mass tolerances	149
7.4 _ Methodological- operative procedure for the reuse.....	150
7.5 _ Good practices for construction.....	152

PHASE 5_ Experimental project phase. Endogenous and exogenous reuse in L'Aquila.

8 _ THE TERRITORY OF L'AQUILA: HYPOTHESIS OF DEVELOPMENT.....	158
8.1 _Promoting the local supply chain	158
8.2 _ Procedure for reuse	159
8.3 _ Project of constructive systems with reused elements	161
The technological, thermo-hygrometric and environmental assessments	161
A comparison between the systems	224
8.4 _The temporary endogenous reuse.....	226
The legislation relative to the construction site and the necessary requirements	226
Case study: the predisposition of site areas for common use in the historic centre of L'Aquila.. ..	229
8.5 _The permanent endogenous reuse.....	250
Operative sheets	252
8.6 _The exogenous reuse	270
Methodological operative innovation in the reconstruction	270
Case study: demolition and reconstruction of post-war buildings in L'Aquila..	271
9_ MODALITY FOR THE CALCULATION OF CONVENIENCE TO REUSE.....	284
9.1 _ Reuse management	284
9.2 _ Calculation tools.....	286

PHASE 6_ Conclusions.

10_ CONCLUSIONS	290
10.1 _ General conclusions	290
10.2 _ Specific conclusions specific for the post-earthquake reconstruction in L'Aquila	291
10.3 _ Further developments.....	292
DIGITAL APPENDICES.....	294
BIBLIOGRAFY	295
