| Abstract | iv |
| Acknowledgement | xi |
| Contents | xiii |
| 1 Introduction | 1 |
| 1.1 Objective of the thesis | 3 |
| 1.2 Thesis outline | 3 |
| 1.3 Finite element method | 4 |
| 1.4 Neutron diffusion equation | 5 |
| 1.5 P_N and SP_N Equations | 18 |
| 1.6 Lambda Modes Equation | 21 |
| 1.7 VVER Reactors | 22 |
| 1.8 The deal.II finite element Library | 28 |
| 1.8.1 Interfaces to Other Software | 29 |
| 1.9 The PETSc Library | 30 |
| 1.10 The SLEPc Library | 32 |
| 1.11 Gmsh | 32 |
| 2 Hexagonal Reactors : Static Calculation | 35 |
| 2.1 h - p finite element method | 37 |

| | | |
|-------|---|-----|
| 2.2 | Discretization of the problem | 38 |
| 2.2.1 | Boundary conditions | 41 |
| 2.2.2 | Reference element | 41 |
| 2.2.3 | Lagrange finite elements | 42 |
| 2.2.4 | Eigenvalue solver and postprocess | 44 |
| 2.2.5 | Refinement and error estimator | 45 |
| 2.3 | Numerical Results. | 45 |
| 2.3.1 | 1D Homogeneous eigenvalue problem | 47 |
| 2.3.2 | Homogeneous Reactor | 49 |
| 2.3.3 | Two-dimensional IAEA problem without reflector | 52 |
| 2.3.4 | Two-dimensional IAEA problem with reflector | 55 |
| 2.3.5 | Two-dimensional VVER-1000 Reactor | 57 |
| 2.3.6 | Two-dimensional VVER-440 Reactor | 60 |
| 2.3.7 | Two-dimensional HWR Reactor | 63 |
| 2.3.8 | Three-dimensional VVER-440 Reactor | 66 |
| 3 | Time Dependent Neutron Diffusion Equation | 73 |
| 3.1 | Rod Cusping | 75 |
| 3.1.1 | Approximate Flux Weighting Method | 78 |
| 3.1.2 | Analytical Flux Weighting with Axial Discontinuity Factors Method | 78 |
| 3.1.3 | Bilinear Weighting Method | 79 |
| 3.1.4 | Equivalent Node Method | 79 |
| 3.2 | Moving mesh strategy | 80 |
| 3.3 | Time discretization | 82 |
| 3.3.1 | Mesh Interpolation | 84 |
| 3.4 | Numerical Results. | 87 |
| 3.4.1 | One dimensional problem | 87 |
| 3.4.2 | Small Hexagonal Reactor | 90 |
| 3.4.3 | AER Benchmark -VVER-440 3D | 94 |
| 4 | High order finite element method for the simplified spherical harmonics equations | 99 |
| 4.1 | 1D P_N Equations | 101 |
| 4.1.1 | Boundary Condition | 103 |
| 4.1.2 | P_1 Equations | 104 |
| 4.1.3 | P_3 Equations | 106 |

| | |
|--|---------|
| 4.1.4 P_5 Equations | 107 |
| 4.2 Simplified P_N Equations | 108 |
| 4.2.1 SP_3 Equations | 109 |
| 4.2.2 SP_5 Equations | 110 |
| 4.2.3 Finite Element Discretization | 111 |
| 4.3 Numerical Results. | 113 |
| 4.3.1 Homogeneous slab | 113 |
| 4.3.2 Heterogeneous slab | 117 |
| 4.3.3 Small Reactor | 120 |
| 4.3.4 Two dimensional VVER-1000 reactor. | 122 |
| 4.3.5 Three dimensional VVER-440 reactor | 124 |
| Conclusions | 127 |
| Bibliography | 131 |
