<b>Abstract</b>	<b>vi</b>
<b>Resumen</b>	<b>viii</b>
<b>Resum</b>	<b>x</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation of the study . . . . .	2
1.2 State of the art . . . . .	3
1.3 Aim of the study . . . . .	7
1.4 Structure of the thesis . . . . .	8
<b>2 Description of the system and analysis of the system performance</b>	<b>9</b>
2.1 Description and characterization of the system . . . . .	10
2.1.1 Geothermal experimental plant. Background . . . . .	10
2.1.2 Geothermal experimental plant. Description . . . . .	10
2.1.3 Data acquisition system . . . . .	22
2.2 Analysis of the system performance . . . . .	24
2.2.1 System variables . . . . .	24
2.2.2 Heat pump control . . . . .	27
2.2.3 Energy efficiency . . . . .	36
2.2.4 Partial load ratio . . . . .	39
2.2.5 Historical performance . . . . .	48
2.2.6 Short-term performance. Analysis of typical days . . . . .	51
2.2.7 Long-term performance. Analysis of yearly evolution . . . . .	64
<b>3 Energy optimization and control algorithms</b>	<b>69</b>
3.1 Introduction to energy optimization and control algorithms . . . . .	70
3.2 Buffer tank sizing . . . . .	70
3.2.1 Theoretical approach . . . . .	72
3.2.2 Manufacturers' guidelines review . . . . .	75

## CONTENTS

---

3.2.3	Results for <i>buffer tank sizing</i> . . . . .	81
3.3	Control sensor and buffer tank position . . . . .	84
3.3.1	Buffer tank position when the control sensor is on the return line . . . . .	85
3.3.2	Control sensor position when the buffer tank is on the supply line . . . . .	86
3.3.3	Results for <i>control sensor and buffer tank position</i> . . . . .	92
3.4	Compressor control . . . . .	93
3.4.1	Supply temperature control with sensor on the return line . . . . .	96
3.4.2	Control board upgrade to control the supply temperature . . . . .	98
3.5	Temperature compensation . . . . .	101
3.5.1	Results for <i>temperature compensation</i> . . . . .	105
3.6	In situ optimization methodology for the water circulation pumps frequency . . . . .	106
3.6.1	Single-stage case . . . . .	108
3.6.2	Multi-stage case . . . . .	114
3.7	Integrated control and optimization strategies . . . . .	125
3.7.1	Temperature compensation and frequency variation: a first approach . . . . .	126
3.7.2	Upgrade to ensure user comfort . . . . .	133
3.7.3	Results for <i>upgrade to ensure user comfort</i> . . . . .	152
3.8	Implementation in the system control board . . . . .	161
<b>4</b>	<b>Conclusions</b> . . . . .	<b>169</b>
4.1	Conclusions of this research work . . . . .	170
4.2	Further research . . . . .	172
	<b>Bibliography</b> . . . . .	<b>173</b>
	<b>Nomenclature</b> . . . . .	<b>179</b>
	<b>Appendixes</b> . . . . .	<b>184</b>
<b>A</b>	<b>Experimental correlations for the GROUND-MED heat pump</b> . . . . .	<b>185</b>
<b>B</b>	<b>Correlations for the effectiveness of the fan coil units</b> . . . . .	<b>187</b>
<b>C</b>	<b>Publications derived from this research work</b> . . . . .	<b>195</b>
C.1	Scientific indexed journals publications . . . . .	195
C.2	Workshops and conferences publications . . . . .	195
