Abstract iii

Resumen vii

Resumen ix

Contents xi

1 Introduction 1

1.1 Background and motivation 1

1.2 Objectives 5

1.3 Structure 6

2 Project Finance recent applications and future trend 11

2.1 Introduction 11

2.2 Project Finance overview 12

2.3 Participants 14

2.4 Project finance market: applications and sectors 15

2.5 Literature review 17

2.5.1 Theoretical approaches 21

2.5.2 Case studies 22

2.6 Areas for future research 27

2.7 Concluding remarks 28
3 MCDM in Finance and RE Projects

3.1 Reviewing main MCDM methodologies

3.2 MODM Methods

3.2.1 Goal Programming

3.2.2 Compromise Programming

3.3 MADM Methods

3.3.1 AHP

3.3.2 PROMETHEE

3.3.3 ELECTRE

3.3.4 TOPSIS

3.3.5 MAUT

3.3.6 VIKOR

3.3.7 MPDM

3.4 MCDM in finance

3.4.1 The multicriteria issues of financial decisions

3.4.2 Modelling financial decisions

3.4.3 Evaluation of financial performance

3.5 MCDM in RE Projects

3.5.1 Assessing non-financial factors in RE investments

4 Overview of renewable energies in the world

4.1 Types of renewable energies

4.1.1 Wind power

4.1.2 Hydropower

4.1.3 Solar energy

4.1.4 Biomass

4.1.5 Geothermal energy

4.2 Top countries and regions

4.2.1 EU countries

4.2.2 Non-EU countries

4.3 The case of Spain

4.3.1 Historical trend and current situation

4.3.2 Overall situation for renewable energy technologies

4.3.3 Key renewable energy sources and comparison with other countries

4.4 RE and climate change: key points of Paris COP21
## Contents

4.5 Financing RE Projects ................................................. 106
   4.5.1 Risks in RE projects ........................................... 107
   4.5.2 Impact of the financial crisis ................................ 110
   4.5.3 Sources of capital ............................................. 110
   4.5.4 Completing a transaction ...................................... 114
   4.5.5 An illustrative example ........................................ 115

5 A MCDM approach for PF selection in the RE sector ............. 117
   5.1 Introduction ..................................................... 117
   5.2 Project Finance for RE projects ................................. 119
   5.3 MCDM in RE projects ........................................... 121
   5.4 Evaluating RE projects from lenders perspective ............. 122
      5.4.1 First step. Domination analysis .......................... 125
      5.4.2 Second step: Aggregation weights and scoring .......... 125
   5.5 Illustrative example ............................................ 128
   5.6 Conclusion ..................................................... 129

6 Conclusions and future lines of research ......................... 135
   6.1 Conclusions ..................................................... 135
   6.2 Future lines of research ......................................... 139

Bibliography .......................................................... 141
