Abstract	ix
<i>Resumen</i>	xi
<i>Resum</i>	xiii
List of Figures	xv
List of Tables	xix
Abbreviations and Acronyms	xxi
1 Introduction	1
1.1 Motivation and Justification	2
1.1.1 Topologies	3
1.1.1.1 Direct Topologies	3
1.1.1.2 Indirect Topologies	5
1.1.1.3 Other Topologies	7
1.1.2 Routing Algorithms	8
1.1.2.1 Classifying Destinations into VCs	10
1.1.3 Fault Tolerance	13
1.2 Goals and Methodology of this Thesis	14
1.3 Thesis Outline	14
2 Summary of Publications	17
2.1 KNS topology	17
2.2 Fault tolerance in KNS topology	18
2.3 HoL-blocking reduction routing	18
3 A New Family of Hybrid Topologies for Large-Scale Interconnection Networks	21
3.1 Introduction	22
3.2 Direct and Indirect Topologies	23
3.3 Related Work	25
3.4 The New Family of Hybrid Topologies	26
3.4.1 Description of the family	27
3.5 Routing Algorithms for the new Family of Topologies	29
3.5.1 Routing in k_n -ary n_n -direct 1-indirect topologies	30
3.5.1.1 Deterministic routing	30
3.5.1.2 Adaptive routing	30

3.5.2	Routing in k_n -ary n_n -direct m_n -indirect topologies	31
3.6	Evaluation	32
3.6.1	Network Model	32
3.6.2	Evaluation Results	32
3.6.3	Cost–performance analysis	35
3.6.4	Fault–tolerance	39
3.7	Conclusions	40
4	The k-ary n-direct s-indirect Family of Topologies for Large-Scale Interconnection Networks	41
4.1	Introduction	42
4.2	Direct and Indirect Topologies	44
4.3	The KNS Family of Hybrid Topologies	48
4.3.1	Description of the family	49
4.4	Routing Algorithms for the KNS Family of Topologies	53
4.4.1	Routing in k_h -ary n_h -direct 1-indirects	53
4.4.2	Routing in k_h -ary n_h -direct s_h -indirects	55
4.5	Evaluation	57
4.5.1	Network Model	57
4.5.2	Performance Results	58
4.5.3	Cost–performance analysis	63
4.5.4	Fault–tolerance	68
4.6	Related Work	70
4.7	Conclusions	72
5	A New Fault-Tolerant Routing Methodology for KNS Topologies	73
5.1	Introduction	74
5.2	Related Work	75
5.3	Preliminaries	76
5.4	Fault-Tolerant Routing Methodology	78
5.4.1	One Intermediate Node	80
5.4.2	Multiple Intermediate Nodes	82
5.4.3	Extension To Other Indirect Subnetworks	84
5.5	Experimental Evaluation	84
5.5.1	Simulation Model	85
5.5.2	Fault Analysis	85
5.5.3	Performance Analysis	86
5.6	Conclusions	88
6	A Fault-Tolerant Routing Strategy for KNS Topologies Based on Intermediate Nodes	91
6.1	Introduction	92
6.2	Related Work	93
6.3	The k -ary n -direct s -indirect (KNS) topology	94
6.4	Description of the Fault-Tolerant Routing Methodology	96
6.4.1	One Intermediate Node	100
6.4.2	Multiple Intermediate Nodes	102
6.4.3	Extension To Any Indirect Subnetwork	104

6.5	Evaluation Results	105
6.5.1	Simulation Model	105
6.5.2	Fault Analysis	106
6.5.3	Performance Analysis	108
6.6	Conclusions	112
7	IODET: A HoL-blocking-aware Deterministic Routing Algorithm for Direct Topologies	113
7.1	Introduction	114
7.2	Direct topologies	115
7.3	A HoL-blocking-aware Deterministic Routing Algorithm	116
7.4	Experimental Evaluation	116
7.4.1	Performance analysis	117
7.5	Conclusions	118
8	Deterministic Routing with HoL-Blocking-Awareness for Direct Topologies	119
8.1	Introduction	120
8.2	Direct topologies	121
8.3	A HoL-blocking-aware Deterministic Routing Algorithm	122
8.4	Experimental Evaluation	123
8.5	Conclusions	125
9	HoL-blocking Avoidance Routing Algorithms in Direct Topologies	127
9.1	Introduction	128
9.2	Routing in Direct Topologies	129
9.3	HoL-Blocking-Aware Deterministic Routing Algorithms	130
9.3.1	XORDET: XOR DETerministic Routing	133
9.3.2	Implementation issues	134
9.4	Experimental Evaluation	135
9.4.1	Performance analysis	136
9.4.2	Switch Cost Analysis	140
9.5	Conclusions	143
10	XORAdap: A HoL-blocking aware adaptive routing algorithm	145
10.1	Introduction	146
10.2	Routing in Direct Topologies	148
10.3	HoL-Blocking-Aware Deterministic Routing Algorithms	148
10.4	XORADAP: XOR ADAPtive Routing	150
10.5	Experimental Evaluation	152
10.6	Conclusions	155
11	XOR-based HoL-blocking reduction Routing Mechanisms for Direct Networks	157
11.1	Introduction	158
11.2	Background	160
11.2.1	Direct Topologies	160
11.2.2	Related Work	161
11.3	XOR-based HoL-blocking Reduction Routing	165
11.3.1	XORDET: XOR DETerministic Routing	165

11.3.2 XORADAP: XOR ADAPTive Routing	167
11.3.3 Implementation issues	170
11.4 Experimental Evaluation	171
11.4.1 Performance analysis	172
11.4.1.1 XORDET evaluation	172
11.4.1.2 XORADAP evaluation	177
11.4.2 Switch Cost Analysis	183
11.5 Conclusions	186
12 General Discussion of Results	189
12.1 k_h -ary n_h -direct s_h -indirect (KNS) topology	189
12.1.1 Description of the family	190
12.1.2 Routing Algorithms for the KNS Family of Topologies	194
12.1.2.1 Routing in k_h -ary n_h -direct 1-indirects	195
12.1.2.2 Routing in k_h -ary n_h -direct s_h -indirects	196
12.2 Fault tolerance for k_h -ary n_h -direct s_h -indirect	198
12.2.1 One Intermediate Node	201
12.2.2 Multiple Intermediate Nodes	202
12.2.3 Extension To Any Indirect Subnetwork	203
12.3 Reducing the HoL-blocking effect in Direct Topologies	203
12.3.1 IODET: In Order DETerministic Routing	204
12.3.2 XOR-based HoL-blocking Reduction Routing	205
12.3.2.1 XORDET: XOR DETerministic Routing	205
12.3.2.2 XORADAP: XOR ADAPTive Routing	207
12.3.2.3 Implementation issues	210
12.4 Evaluation Results	211
12.4.1 Network Model	212
12.4.2 k_h -ary n_h -direct s_h -indirect (KNS) topology	212
12.4.2.1 Performance Results	212
12.4.2.2 Cost-performance analysis	216
12.4.3 Fault tolerance for k_h -ary n_h -direct s_h -indirect topologies	218
12.4.3.1 Fault Analysis	218
12.4.3.2 Performance Analysis	220
12.4.4 Reducing the HoL-blocking effect in Direct Topologies	222
12.4.4.1 Deterministic routing algorithms evaluation	222
12.4.4.2 XORADAP evaluation	226
13 Conclusions	231
13.1 Future Directions	233
13.2 Other Publications	235
13.3 Funding Acknowledgments	236
References	237
