

Table of contents	5
Abbreviations	9
Abstract	15
Introduction	25
1. Flowering	27
1.1. The flower bud induction, flower bud initiation and flower bud differentiation	27
1.2. Molecular events at the shoot apex: FT-FD complex and floral signalling pathways	30
1.3. The right moment to flower: flowering pathways	32
1.3.1. Pathways that promote floral transition	33
1.3.1.1. Photoperiodic pathway	33
1.3.1.2. GA pathway	34
1.3.2. Pathways that enable the floral transition	35
1.3.2.1. Vernalization pathway	35
1.3.2.2. Autonomous pathway	36
2. Flowering in woody perennial plants	37
2.1. Flowering in woody Rosaceae fruit trees	38
3. Environmental factors regulating flowering in woody species	41
3.1. Photoperiodic control of flowering	41
3.2. Temperature control of flowering	42
3.2.1. Chilling and heat requirement in fruit trees	44
4. Plant hormones regulating flowering	46
5. Hypothesis and objectives	51
Materials and methods	53
1. Plant material and experimental design	55
1.1. Section 1. Determination of the effect of current shoot apex removal on floral bud differentiation of premature shoots	55
1.2. Section 2. Determination of the effect of summer temperature in floral bud differentiation	56
1.3. Section 3. Determination of floral bud differentiation by means of molecular and microscopic analysis.	60
2. Methods	61
2.1. Gene expression analysis by qRT-PCR	61

2.2. Hormone isolation, purification and quantification	62
2.3. Model parameterization	63
2.4. Microscopic analysis	63
2.5. Statistical analysis	64
Results	65
1. Section 1. The influence of the time of shoot apex removal on the floral bud differentiation of premature shoots	67
1.1. Flowering genes expression in apices from current shoots and secondary shoots arose in July and August	69
1.2. Hormonal content in apices from current shoots and from secondary shoots arose in July and August	72
2. Section 2. The effect of summer temperature on floral bud differentiation	77
2.1. Flowering gene expression and hormonal content under different temperature conditions during floral bud differentiation	78
2.2. Identification of temperature heat requirements for loquat flower bud differentiation. A phenological model	92
3. Section 3. Floral bud differentiation: molecular and hormonal contents, heat requirement and microscopic analysis	95
Discussion	99
Conclusions	109
Appendix	113
References	117
