ABSTRACT	7
RIASSUNTO	9
RESUMEN	11
RESUM	13
I. GENERAL INTRODUCTION	17
1. ORIGIN AND GEOGRAPHICAL DISTRIBUTION.....	17
2. TAXONOMY AND MORPHOLOGY	18
2.1 Taxonomy	18
2.2 Morphology	18
3. VEGETATIVE DEVELOPMENT OF AVOCADO	22
4. FLOWERING	24
4.1 Induction and floral differentiation	24
4.2 Reproductive biology	25
5. FRUIT SET AND DEVELOPMENT OF FRUIT	28
5.1 Fertilization	28
5.2 The physiological fruit drop	29
5.3 Vegetative development-fruit development relationship	30
5.4 Alternate bearing	31
5.5 Stimulation techniques of fruit set	33
6. THE ROLE OF CARBOHYDRATES IN SETTING AND FRUIT DEVELOPMENT	34
7. HORMONAL CONTROL OF FRUIT SET AND FRUIT DEVELOPMENT .	35
II. HYPOTHESIS	38
III. MATERIALS AND METHODS	40
1. VEGETAL MATERIAL	40
2. EXPERIMENTAL DESIGN	40
2.1 Intensity of flowering vs. fruit set	40
2.2. The exogenous control of the abscission of reproductive organ	41
2.3. Vegetative development vs. Reproductive development. Hormonal and nutritional control	42
3. ANALYSIS OF CARBOHYDRATES	45
4. HORMONAL ANALYSIS.....	46
5. STATISTICAL ANALYSIS	47
IV. RESULTS	49
1. INTENSITY OF FLOWERING-FRUIT SET	49
1.1 Reduction of the flowers number by applying GA ₃	49
2. VEGETATIVE DEVELOPMENT- REPRODUCTIVE DEVELOPMENT RELATIONSHIP.	
HORMONAL AND NUTRITIONAL CONTROL	52
2.1 The time course of flower abscission	52
2.2 The time course of fruit abscission. Number of fruits per panicle. Influence of the flowers number	53
2.3 Carbohydrate consumption	56
2.3.1 Consumption during flowering	56
2.3.2 Consumption during the initial development of fruit	62
2.4 Endogenous hormonal control	67
2.4.1 During flowering	67
2.4.2 During the initial development of fruit	74
3. EXSOGENUS CONTROL OF THE ABSCISSION OF REPRODUCTIVES ORGANS	80
3.1 Influence of GA ₃ and PBZ on the abscission of flowers and fruits. Action of ringing	80
3.2 Influence of GA ₃ and PBZ on individual panicles.	85

3.2.1 On the vegetative development	85
3.2.2 On the carbohydrate content	88
3.3 Influence of Ringing, GA and PBZ on carbohydrate metabolism	89
3.3.1 Treatment on individual inflorescences	89
3.3.1.1 During flowering.....	89
3.3.1.2 During the initial development of fruit	93
3.3.2 Treatments to the entire tree	98
3.4 Influence of GA ₃ and PBZ during anthesis and fruit set in the hormonal balance	109
V. DISCUSSION	113
VI. CONCLUSIONS	118
VII. REFERENCES	120
