

CONTENTS

1	Introduction	1
1.1	Nonlinear dynamics	1
1.1.1	Higher Harmonic Generation	2
1.1.2	Solitary waves	2
1.1.3	Sub-harmonic Generation	4
1.2	Object and Motivation	4
2	Nonlinear dispersive waves in a repulsive lattice	7
2.1	Introduction	7
2.2	Theoretical model	10
2.2.1	Equation of motion	10
2.2.2	Dispersion Relation	12
2.2.3	Analytical solutions	13
2.3	The lattice of magnetic dipoles	15
2.4	Experimental setup	17
2.5	Dispersion relation	19
2.6	Higher harmonic generation	20
2.7	Chain dilatation	22
2.8	Subharmonic Generation	24
2.8.1	Resonance Frequency	26
2.8.2	The effect of the excitation amplitude	26
2.8.3	Modulational Instability	28
2.9	Solitary waves and Kinks	29
2.9.1	Approximate Analytical solution	32
2.9.2	Numerical Simulation	33
2.9.3	Kinks without Substrate Potential	35
2.9.4	Kink Velocity	35
2.9.5	Kinks with Substrate Potential	36
2.10	Conclusion	37
3	Nonlinear propagation in phononic superlattices	41
3.1	Introduction	41
3.2	Models	43
3.2.1	The medium and its dispersion relation	43

3.2.2	Nonlinear constitutive model	46
3.2.3	Westervelt Equation	49
3.2.4	Nonlinear wave equation	51
3.3	Harmonic generation in layered media.	52
3.3.1	Nondispersive (Fubini) regime	53
3.3.2	Dispersive regime.	54
3.3.3	Second harmonic in band gap.	58
3.3.4	Fundamental harmonic in band gap	59
3.4	Nonlinear acoustic field management	61
3.4.1	Tuning nonlinearity with dispersion	61
3.4.2	Enhanced second harmonic generation	62
3.4.3	Enhanced third harmonic generation.	64
3.5	Conclusions.	65
4	The chain of coupled pendula as an analogue of gas microbubbles	67
4.1	Introduction	67
4.2	Microbubble Dynamics	69
4.2.1	Motivation: Ultrasound Contrast Agents (UCAs).	69
4.2.2	The free gas bubble: Rayleigh-Plesset Equation	71
4.2.3	Nonlinear Behavior of Microbubble	75
4.2.4	Vibration modes of a microbubble	76
4.2.5	Modelling of nonspherical oscillations of microbubbles	77
4.3	The parametrically driven chain of coupled pendula	80
4.3.1	The discrete lattice	81
4.3.2	Continuous description	83
4.3.3	Analogy	84
4.4	Experiments	85
4.4.1	Experimental setup.	85
4.4.2	Calibration	86
4.4.3	Breathing Mode.	88
4.4.4	Shape oscillations in the macrobubble	90
4.5	Conclusions.	92
	Bibliography	95
	Appendices	109
	A List of Publications	111
	B List of Conferences	113
	List of Figures	117
