Acknowledgments .....	i
Abstract .....	iii
Resum .....	v
Resumen.....	vii
List of figures.....	xiii
List of tables.....	xix
Nomenclature .....	xxi
Chapter 1 Introduction .....	1
1.1 Motivation.....	1
1.2 Conditions for the waste heat recovery and the SHW application .....	4
1.2.1 Waste heat recovery.....	4
1.2.2 SHW application.....	5
1.3 Natural refrigerants for the SHW application .....	7
1.3.1 The transcritical CO <sub>2</sub> cycle.....	8
1.3.2 Propane (R290) for the SHW application.....	12
1.4 Objectives.....	17
Chapter 2 Theoretical analysis.....	19
2.1 Introduction .....	19
2.2 Optimal subcooling.....	25
2.3 Second law analysis.....	31
2.3.1 Introduction.....	31
2.3.2 Results .....	33
2.4 Conclusions .....	35
Chapter 3 Heat pump: concept and designs.....	37
3.1 Subcooling made in the condenser (SMC heat pump) .....	38
3.2 Subcooler in series with condenser (SMS heat pump).....	40

3.3 Heat Pump prototype: the real implementation of the systems .....	41
3.3.1 Compressor .....	43
3.3.2 Condenser .....	44
3.3.3 Subcooler.....	45
3.3.4 Evaporator.....	46
3.3.5 Liquid receiver.....	47
3.3.6 Expansion valve.....	48
3.3.7 Throttling valve.....	50
Chapter 4 Experimental setup and test conditions .....	51
4.1 Experimental setup .....	52
4.1.1 Water loop for the heat source (Evaporator) .....	54
4.1.2 Water loop for the heat sink (Condenser).....	55
4.1.3 Water/glycol loop and chiller working with R410A .....	56
4.2 Sensors and error analysis .....	57
4.3 Performed test.....	58
4.3.1 Test for SMC design .....	59
4.3.2 Test for SMS design .....	59
Chapter 5 Experimental results and discussion.....	63
5.1 Subcooling in the condenser: SMC design.....	63
5.1.1 Results .....	64
5.1.2 Condition with high $T_{w,ei}$ and low $T_{w,ci}$ .....	71
5.1.3 Pinch point analysis.....	74
5.1.4 Conclusions .....	77
5.2 Subcooling in a separate heat exchanger: SMS design .....	79
5.2.1 Results .....	80
5.2.2 Condition with high $T_{w,ei}$ and low $T_{w,ci}$ .....	84
5.2.3 Comparison between the SMS (R290) and the reference CO <sub>2</sub> heat pump for SHW.....	85
5.2.4 Superheat study .....	86
5.2.5 Thermography: Evaporator refrigerant distribution.....	88
5.2.6 Conclusions .....	91

---

Chapter 6 Theoretical comparison between SMS and SMC .....	93
6.1 Model .....	94
6.1.1 Model validation: Subcooling made in the condenser (SMC) .....	94
6.1.2 Model adjustment to the heat pump with subcooler .....	96
6.2 Results .....	96
6.3 Conclusions .....	102
Chapter 7 General conclusions and future work .....	103
7.1 Conclusions .....	103
7.1.1 From the theoretical analysis .....	104
7.1.2 From the experimental results .....	104
7.2 Future work .....	106
7.2.1 Integration in a real system .....	106
7.2.2 Improvement of the heat pump design .....	107
References .....	109
Appendix A The importance of heat pump liquid receiver configuration on the impact during transient behavior. ....	117
A.1 Abstract .....	117
A.2 Introduction .....	118
A.3 Experimental setup .....	119
A.3.1 Refrigerant cycle .....	120
A.3.2 Liquid receiver design .....	121
A.3.3 Test procedure .....	122
A.4 Results .....	122
A.4.1 Inlet elbow downwards .....	122
A.4.2 Inlet elbow upwards .....	124
A.5 Conclusions .....	125
Appendix B Results and error analysis .....	127
B.1 Auxiliary consumption .....	127
B.2 Uncertainty .....	129
B.3 Experimental results for the SMC design .....	130
B.4 Results for the SMS design .....	134
