

## ***Table of contents***

## 1. General Introduction

1. Plant hormones.....	1
2. Gibberellins.....	2
3. Gibberellin metabolism.....	3
4. Regulation of gibberellin metabolism.....	5
5. Gibberellin signaling.....	5
6. DELLA proteins.....	8
6.1 Structural features of DELLA proteins.....	9
6.2 Mechanisms of action of DELLA proteins.....	10
7. The role of DELLAs in the primary meristems: interaction with TCPs.....	11
7.1 Looking for suitable DELLA interactors regulating meristem activity.....	11
7.2 The TCP family of transcription factors.....	15
8. References.....	18

## 2. Objectives.....27

### 3. Introduction of Chapter I:

#### *DELLAs' role on the vegetative shoot apical meristem*

1. The vegetative shoot apical meristem.....	28
2. The TCP/KNAT1 module of regulation.....	30
3. The role of gibberellin in the vegetative shoot apical meristem.....	35
4. Proposal of the hypothesis: DELLAs function in the SAM.....	36
5. References.....	37

### 4. Results and Discussion Chapter I:

#### *DELLAs regulate the shoot apical meristem through the activity of CIN-TCPs and KNAT1*

1. GAI and RGA interact with CIN-TCP family members.....	41
2. DELLAs do not regulate CIN-TCPs transcriptionally.....	44
2.1. Chemical approach.....	44

2.2 Genetic approach.....	47
<b>3. DELLAs inactivate CIN-TCPs upon interaction.....</b>	<b>48</b>
<b>4. Effect of the interaction in a known target of TCPs in the shoot apical meristem context.....</b>	<b>50</b>
<b>5. Effect of the interaction in a downstream target: a KNOX gene.....</b>	<b>54</b>
<b>6. DELLAs and KNAT1 expression patterns.....</b>	<b>55</b>
<b>7. Localization of KNAT1 and RGA proteins in the vegetative shoot apical meristem.....</b>	<b>58</b>
<b>8. The GA/KNAT1 balance regulates cell expansion in the shoot apical meristem.....</b>	<b>61</b>
<b>9. Unraveling KNAT1 function at the genomic level.....</b>	<b>65</b>
9.1 Comparison with literature data.....	67
9.2 Analysis of the KNAT1 targets found in the RNA-sequencing experiment.....	75
9.3 Supplemental material.....	78
<b>10. GAI and RGA interact with KNAT1.....</b>	<b>79</b>
<b>11. References.....</b>	<b>81</b>

## **5. Introduction of Chapter II:**

### ***DELLAs' role on the germination process***

<b>1. The germination process.....</b>	<b>85</b>
1.1 Seed structure and germination.....	85
1.2 Dormancy and dormancy releasing mechanisms.....	86
<b>2. GA involvement in germination.....</b>	<b>87</b>
2.1 The ABA:GA balance.....	87
2.2 GA implication in the molecular networks regulating germination following seed imbibition.....	88
<b>3. GAs role in cell division in the RAM during germination.....</b>	<b>90</b>
<b>4. Class I TCPs involvement in germination.....</b>	<b>94</b>
<b>5. Proposal of the hypothesis: DELLAs function in the RAM.....</b>	<b>96</b>
<b>6. References.....</b>	<b>96</b>

## **6. Results and Discussion Chapter II:**

### **Regulation of the root apical meristem by DELLAs through Class I-TCPs**

<b>1. TCP14 and TCP15 are required for the promotion of the germination by gibberellins.....</b>	<b>100</b>
<b>2. TCP15 is expressed in developing embryos.....</b>	<b>102</b>
<b>3. DELLAs do not regulate TCP14 and TCP15 transcriptionally.....</b>	<b>104</b>
<b>4. DELLAs interact with TCP14 and TCP15.....</b>	<b>106</b>
<b>5. GAI inactivates TCP14 upon interaction.....</b>	<b>108</b>
<b>6. Role of TCP14 and TCP15 regulating cell division in the root apical meristem.....</b>	<b>110</b>
<b>7. Role of TCP14 and TCP15 regulating root growth in later stages of development.....</b>	<b>113</b>
<b>8. References.....</b>	<b>115</b>

## **7. General Discussion**

<b>1. The DELLA-TCP interaction, an example of cell-type specific signaling..</b>	<b>119</b>
<b>2. DELLA function in meristems: a possible link with the environment.....</b>	<b>120</b>
<b>3. References.....</b>	<b>122</b>

## **8. Conclusions.....**

124

## **9. Material and Methods**

<b>1. Plant material and growth conditions.....</b>	<b>125</b>
<b>2. Genetic engineering.....</b>	<b>126</b>
2.1 Bacteria manipulation.....	126
2.2 Plasmid DNA extraction.....	127
2.3 Plant genomic DNA extraction.....	127
2.4 DNA engineering.....	127
2.4.1 DNA amplification.....	128
2.4.2 DNA digestion, ligation and phosphorylation.....	128

2.4.3 DNA end modification.....	129
2.5 Electrophoresis and fragment purification.....	129
2.6 Gateway Technology.....	129
2.7 Sequencing.....	130
2.8 Constructs and oligos used in the Thesis.....	130
<b>3. Genetic transformation.....</b>	<b>132</b>
<b>4. Genetic crosses.....</b>	<b>134</b>
<b>5. Germination assays.....</b>	<b>135</b>
<b>6. Yeast two hybrid assays.....</b>	<b>135</b>
<b>7. Bimolecular Fluorescence Complementation assay.....</b>	<b>135</b>
<b>8. Co-immunoprecipitation assays.....</b>	<b>136</b>
<b>9. Real-time quantitative RT-PCR.....</b>	<b>137</b>
<b>10. Transactivation assays.....</b>	<b>138</b>
<b>11. Analysis of the <math>\beta</math>-glucuronidase activity.....</b>	<b>138</b>
<b>12. Histological cuts and microscopy.....</b>	<b>140</b>
<b>13. Cell measurements in the shoot apical meristem.....</b>	<b>141</b>
<b>14. Root length and cell measurements in the root apical meristem.....</b>	<b>142</b>
<b>15. RNA-sequencing.....</b>	<b>142</b>
<b>16. In situ hybridization.....</b>	<b>144</b>
<b>17. References.....</b>	<b>146</b>
