

Table of contents

List of Figures	xvii
List of Tables	xxv
1 Introduction	1
1.1 Objectives of the thesis	6
1.2 Structure of the thesis	7
2 Field modal expansions	9
2.1 Maxwell's equations	9
2.2 Solution of the wave equation: modal expansion	11
2.2.1 Plane wave expansion (PWE)	13
2.2.2 Cylindrical wave expansion (CWE)	14
2.2.3 Spherical wave expansion (SWE)	16
2.2.4 Spheroidal wave expansion (SoWE)	19
2.3 Wave coefficients determination	23
2.3.1 Planar coefficients	24
2.3.2 Spherical coefficients	25
3 Equivalent currents	33
3.1 Introduction	33
3.2 Field equivalence principle	35
3.3 Integral equation methods	38
3.3.1 Equivalent magnetic approach	40
3.4 Modal expansion methods	43
3.4.1 Option 1: Microwave holographic technique	46
3.4.2 Option 2: SWE to PWE transformation	56
3.5 Equivalent currents by means of the spheroidal wave expansion	61

TABLE OF CONTENTS

4	Visible spectrum	65
4.1	Introduction	65
4.2	The inverse source problem and the non-radiating sources . . .	66
4.3	Evanescent waves	68
4.4	Visible spectrum: resolution in the equivalent currents	71
4.5	Improvement of resolution	74
5	High-resolution algorithms	79
5.1	Introduction	79
5.2	Extrapolation techniques	80
5.3	Papoulis-Gerchberg algorithm	83
5.3.1	Spectral periodicity	92
5.3.1.1	Option 1: First PG algorithm and, then, replication of the spectrum	94
5.3.1.2	Option 2: First replication of the spectrum and, then, PG algorithm	95
5.3.2	Restrictive filters	98
5.3.3	Acceleration constant	100
5.4	Extrapolation matrix	105
5.4.1	1-D Extrapolation matrix	105
5.4.2	2-D Extrapolation matrix: rows and columns	109
5.4.3	2-D Generalized extrapolation matrix	117
5.5	Prior discrete Fourier transform	127
5.5.1	Regularization	128
6	Probe calibration	137
6.1	Introduction	137
6.2	Electric Hertzian dipole receiving coefficients	138
6.2.1	Behavior of the calibration factor at large distances . .	142
6.2.2	Gain determination	144
6.2.3	Practical results	145
6.3	Probe pattern calibration: iterative algorithm	148
6.3.1	Transformation of transmitting coefficients into receiving coefficients	151
6.4	Alternative iterative algorithm for probe calibration	153
6.4.1	Case 1: Two identical antennas	153
6.4.2	Case 2: Two different antennas	159
6.4.2.1	Application of the supplied gain	163
6.4.2.2	Use of an additional antenna	168
7	Conclusions	173
7.1	Further work	176

TABLE OF CONTENTS

A Bessel functions	179
A.1 Bessel functions of integer order: Bessel functions	179
A.2 Bessel functions of fractional order: Spherical Bessel functions .	183
B Legendre functions	187
C Rotation and translation coefficients	193
C.1 Rotation of spherical waves	193
C.1.1 Euler angles	193
C.1.2 Rotation of spherical wave functions	194
C.1.3 Rotation coefficients	194
C.1.4 Delta constants	195
C.2 Translation of spherical waves	197
C.2.1 Translation of spherical wave functions	197
C.2.2 Translation coefficients	198
C.2.3 Wigner 3-j symbol	200
D Spheroidal wave functions	203
D.1 Definition	203
D.2 Spheroidal vector wave functions	206
D.2.1 Spheroidal angular functions	207
D.2.2 Spheroidal radial functions	211
D.3 Secondary parameters	214
D.3.1 Determination of the spheroidal eigenvalues	214
D.3.2 Determination of the expansion coefficients	217
References	221
Related publications	235
