1	Introduction	7
2	Preliminary concepts and definitions	13
2.1	Basic definitions	13
2.2	Fuzzy structures definitions	16
3	The bicompletion of fuzzy quasi-metric spaces	23
3.1	Introduction	23
3.2	The completion of a fuzzy metric space	25
3.3	The bicompletion of a fuzzy quasi-metric space	31
3.4	The bicompletion of a non-Archimedean fuzzy quasi-metric space	43
3.5	The bicompletion of an intuitionistic fuzzy quasi-metric space	45
3.6	Conclusions	48
4	Contraction maps on fuzzy quasi-metric spaces and algo- rithms with two recurrence procedures	49
4.1	Introduction	49
4.2	Application of the Banach fixed point theorem on fuzzy quasi- metric spaces to algorithms with two recurrence equations . .	52

4.2.1	Application of the Banach fixed point theorem on complexity spaces to algorithms with two recurrence equations	59
4.3	Conclusions	66
5	Application of quasi-metric lattice and intuitionistic fuzzy metric structures to optimize information systems based on access locality	69
5.1	Introduction	69
5.2	Starting point: Quasi-metric lattice	72
5.2.1	Quasi-metric lattice framework	76
5.2.2	Empirical Results	79
5.2.3	Conclusions	85
5.3	Model extension in time: Fuzzy metric space	86
5.3.1	Evaluated t-norms	89
5.3.2	Empirical results: Comparison	91
5.3.3	Conclusions	101
5.4	Intuitionistic fuzzy metric space extension	101
5.4.1	Evaluated t-conorms	105
5.4.2	Empirical results: Comparison	107
5.4.3	Conclusions	111
	Bibliography	115
