Acknowledgements **v**

Abstract **vii**

List of Figures **xv**

List of Tables **xvi**

1 Introduction **1**
1.1 Context 2
1.2 Objectives 3
1.3 Thesis structure 3

2 Background **5**
2.1 Introduction 5
2.2 Wireless Connectivity Technologies 8
2.3 Operating Systems 11
2.4 Devices 14
2.5 Protocols and middleware 14
2.6 Frameworks 20
2.7 Mobility 21

3 State of the Art **27**
3.1 Protocols Comparison and Evaluation 27
3.2 Architectural Solutions 34
3.3 Summary 36

4 Performance Evaluation of Message Oriented Middleware Protocols **39**
4.1 Testbed Scenario 41
4.2 Methodology of the experiments 43
4.3 Experimental Results 45
4.4 Queueing Model Based on Network Handovers 51
4.5 Summary 54

5 Improving MQTT data delivery in mobile scenarios **57**
5.1 Intermediate Buffering proposal 58
5.2 Methodology of the experiments 60
5.3 Results and Evaluation 63
5.4 Summary 72

6 A Disruption Tolerant Architecture **75**
6.1 Experimental Set-up Evaluation Methodology 76
6.2 Analysis of the Results 80
6.3 Summary 86

7 Conclusions, Publications and Future Work **87**
7.1 Publications 88
7.2 Future work 89
