ECUACIONES	35
ABREVIATURAS Y TÉRMINOS	37
ABREVIATURAS Y TÉRMINOS	37
LISTADO DE FIGURAS.....	43
LISTADO DE TABLAS.....	49
I. INTRODUCCIÓN	53
I.1. BIOPOLÍMEROS EN INGENIERÍA.....	54
I.1.1. Polímeros de origen petroquímico biodegradables.....	56
I.1.2. Polímeros de origen renovable, biodegradables y no biodegradables.	57
I.2. TECNOLOGÍA DE ÁCIDO POLILÁCTICO (PLA).....	60
I.2.1. Obtención de ácido poliláctico.	62
I.2.2. Propiedades generales del ácido poliláctico.	66
I.2.2.1. Procesado.	66
I.2.2.2. Degradación.....	67
I.2.2.3. Propiedades mecánicas.	69
I.2.2.4. Propiedades barrera.....	70
I.2.3. Usos de ácido poliláctico en Ingeniería.....	71
I.2.3.1. Sector médico.	71
I.2.3.2. Sector envase-embalaje.....	72
I.2.3.3. Fibras textiles.	74
I.2.3.4. Sector de cultivos.	74
I.2.3.5. Otras aplicaciones.	75
I.3. TECNOLOGÍAS DE MODIFICACIÓN DE FORMULACIONES DE POLÍMERO.....	76
I.3.1. Mezclado físico o “blending”	76
I.3.2. Plastificación.....	77
I.3.2.1. Definiciones y clasificación	77
I.3.2.2. Tipos de plastificantes según su acción.....	80
I.3.2.3. Tipos de plastificantes según su estructura.	81

I.3.2.4. Fenómenos de plastificación.....	82
I.3.3. Incorporación de cargas.....	83
I.3.4. Otras modificaciones.....	85
I.4. TECNOLOGÍAS DE PLASTIFICACIÓN EN POLÍMEROS BASE PLA.....	86
I.4.1. Mecanismos de plastificación de PLA.....	86
I.4.2. Aceites vegetales modificados.....	88
I.5. TECNOLOGÍAS DE MEZCLADO FÍSICO EN POLÍMEROS BASE PLA.....	93
I.6. TECNOLOGÍAS DE INCORPORACIÓN DE CARGAS EN POLÍMEROS BASE PLA.....	95
REFERENCIAS	97
II. OBJETIVOS.....	111
II.1. OBJETIVOS GENERALES.....	112
II.2. OBJETIVOS ESPECÍFICOS.....	112
III. RESULTS AND DISCUSSION	115
SUMMARY.....	116
Chapter III.1. Effect of miscibility on mechanical and thermal properties of poly(lactic acid)-poly(caprolactone) blends.	119
Abstract.....	123
Introduction.....	124
Experimental.....	126
Materials.	126
Mechanical characterization of PLA/PCL blends.	126
Characterization of surface morphology of PLA/PCL blends.....	128
DMTA of PLA/PCL blends.	128
Thermal characterization of PLA/PCL blends.	128
Degradability under composting conditions.	129
Results and discussion.....	130
Effect of PCL on mechanical properties of PLA/PCL binary blends.	130
Effect of PCL content on thermal and thermomechanical properties of PLA/PCL blends.	
.....	136

<i>Morphology of PLA/PCL blends.....</i>	141
<i>Disintegration under composting.....</i>	145
Conclusions.....	147
Acknowledgements.....	148
References.....	149
Chapter III.2. 1. Poly(lactic acid) formulations with improved toughness by physical blending with thermoplastic starch.....	155
Abstract.....	159
Introduction.....	160
Experimental.....	161
<i>Materials.</i>	161
<i>Preparation of PLA/TPS blends.....</i>	162
<i>Mechanical characterization of PLA/TPS blends.....</i>	163
<i>Morphology characterization by FESEM.</i>	163
Results and discussion.....	164
<i>Influence of TPS content on mechanical properties of PLA/TPS blends.....</i>	164
<i>Effect of TPS content on thermal properties of PLA/TPS blends.....</i>	167
<i>Effect of TPS content on dynamic-mechanical thermal behaviour of PLA/TPS blends.</i>	171
<i>Effect of TPS content on the morphology of PLA/TPS blends.</i>	174
Conclusions.	176
Acknowledgements.....	177
References.....	178
Chapter III.3. Plasticizing effect of biobased epoxidized fatty acid esters on mechanical and thermal properties of poly(lactic acid).....	185
Abstract.....	189
Introduction.....	190
Experimental.....	192
<i>Materials.</i>	192
<i>Processing of OES-plasticized PLA.</i>	192
<i>Mechanical characterization of OES-plasticized PLA.</i>	193
<i>Thermo-mechanical characterization of OES-plasticized PLA.</i>	194
<i>Thermal characterization of OES-plasticized PLA.</i>	194
<i>Oxygen permeability measurement of OES-plasticized PLA.</i>	195
<i>Wettability of OES-plasticized PLA.</i>	195

Results and discussion.....	196
<i>Mechanical properties of OES-plasticized PLA.....</i>	196
<i>Thermo-mechanical properties of OES-plasticized PLA.....</i>	199
<i>Thermal properties of OES-plasticized PLA.....</i>	201
<i>Oxygen permeability measurement of OES-plasticized PLA films.....</i>	203
<i>Surface wettability of OES-plasticized PLA films.....</i>	203
Conclusions	204
Acknowledgements.....	205
References	206
Chapter III.4. The effect of maleinized linseed oil as biobased plasticizer in poly(lactic acid)-based formulations	213
Abstract.....	217
Introduction.....	218
Experimental.....	223
<i>Materials.</i>	223
<i>Preparation of PLA formulations plasticized with MLO.....</i>	223
<i>Mechanical characterization of PLA formulations plasticized with MLO.....</i>	224
<i>Morphology of PLA formulations plasticized with MLO.....</i>	225
<i>Thermal analysis of PLA formulations plasticized with MLO.....</i>	225
Results and Discussion.....	226
<i>Effect of MLO on mechanical properties of plasticized PLA formulations.....</i>	226
<i>Effect of MLO on thermal properties of plasticized PLA formulations.....</i>	232
<i>Dynamical mechanical behaviour of plasticized PLA formulations with different content of maleinized linseed oil (MLO).</i>	234
<i>Morphology of PLA formulations plasticized with MLO.....</i>	237
Conclusions	238
Acknowledgments.....	239
References	240
Chapter III.5. The effect of maleinized linseed oil (MLO) on mechanical performance of poly(lactic acid)-thermoplastic starch (PLA-TPS) blends	251
Abstract.....	255
Introduction.....	256
Experimental.....	259
<i>Materials.</i>	259

<i>Preparation and compatibilization of PLA-TPS blends</i>	259
<i>Mechanical characterization</i>	260
<i>Microstructural characterization</i>	261
<i>Thermal characterization</i>	261
Results and discussion	262
<i>Effect of MLO on mechanical properties of PLA-TPS blends</i>	262
<i>Effect of MLO on thermal properties of PLA-TPS blends</i>	265
<i>Effect of MLO on dynamic mechanical thermal properties of PLA-TPS blends</i>	268
<i>Effect of MLO on morphology of PLA-TPS blends</i>	270
Conclusions	273
Acknowledgements	274
References	275
Chapter III.6. The effect of beta-tricalcium phosphate on mechanical and thermal performance of poly(lactic acid)	283
Abstract	287
Introduction	288
Experimental	291
<i>Materials</i>	291
<i>Composite manufacturing</i>	291
<i>Mechanical characterization of PLA/β-TCP composites</i>	292
<i>Microscopic characterization of PLA/β-TCP composites</i>	292
<i>Dynamic mechanical characterization of PLA/β-TCP composites</i>	293
<i>Thermal analysis of PLA/β-TCP composites</i>	293
Results and discussion	293
<i>Effect of weight % β-TCP on mechanical properties of PLA/β-TCP composites</i>	293
<i>Effect of weight % β-TCP on thermal properties of PLA/β-TCP composites</i>	299
Conclusions	302
Declaration of conflicting interests	303
Funding	303
References	304
Chapter III.7. Manufacturing and characterization of poly(lactic acid) composites with hydroxyapatite	311
Abstract	315
Introduction	316

Experimental.....	319
<i>Materials.</i>	319
<i>Manufacturing of PLA-HA composites.....</i>	320
<i>Mechanical characterization of PLA-HA composites.....</i>	320
<i>Microscopic characterization of PLA-HA composites.....</i>	321
<i>Thermal analysis of PLA-HA composites.</i>	321
Results and Discussion.....	323
<i>Effect of hydroxyapatite content on mechanical properties of PLA-HA composites.</i>	323
<i>Effect of hydroxyapatite content on thermal properties of PLA-HA composites.....</i>	329
Conclusions.	334
Acknowledgments.....	334
References.	335
IV. CONCLUSIONES	341
