Abstract	v
Resumen	ix
Resum	xiii
Acknowledgements	xvii
List of symbols	xxix
Abbreviations and Acronyms	xxxix
1 Introduction and Objectives	1
1.1 Background	3
1.2 Motivation	6
1.3 Objectives	7
1.4 Key Contributions	8
1.5 Organization	10
2 State of the Art	13
2.1 Multiple-Input Multiple-Output Systems	15
2.1.1 The BLAST System	15
2.1.2 Bit-Interleaved Coded-Modulation Systems	19
2.1.3 Iterative Decoding BICM Systems	20
2.1.4 Multiuser Systems	21
2.1.5 Massive MIMO Systems	22
2.2 MIMO Detection	24
2.2.1 Hard-Output MIMO Detection	26
2.2.2 Soft-Output MIMO Detection	35
2.3 Precoding	39
2.4 Performance Comparison	41

3	Efficient Soft-Output Algorithms	43
3.1	Soft MIMO Detection Problem	45
3.1.1	Max-log Soft Detection	46
3.1.2	Partitioned Model	48
3.2	Soft MIMO Detection Algorithms	48
3.2.1	Repeated Tree Search	48
3.2.2	Single Tree Search	50
3.2.3	Soft Fixed Sphere Decoder	51
3.2.4	Subspace Marginalization with Interference Suppression	53
3.2.5	Linear Soft-Output MMSE	55
3.2.6	Analysis of Performance and Complexity	55
3.3	Box Optimization for MIMO Detection	57
3.3.1	Box Optimization to obtain an initial point and an initial radius for SD	58
3.3.2	Radius Bound for SD Search using Box Optimization	59
3.3.3	Probability of being out of the constellation	61
3.4	BOHD Soft-Output Algorithm	65
3.4.1	Analysis and Results	68
3.5	SUMIS-BO	71
3.5.1	Analysis and Results	74
3.6	Conclusions	77
4	Efficient Soft-Input Soft-Output Algorithms	79
4.1	Soft-Input Soft-Output Detection Problem	81
4.1.1	SISO tree search problem	83
4.2	Max-log SISO Algorithms	84
4.2.1	SISO Box Optimization Repeated Tree Search	85
4.2.2	Double Tree Search	86
4.2.3	Analysis and Results	88
4.3	Non-max-log SISO Algorithms	93
4.4	Conclusions	99
5	Precoding	103
5.1	Conventional Precoding Schemes	105
5.1.1	Zero-Forcing Precoding	106
5.1.2	Tomlinson-Harashima Precoding	106
5.1.3	Lattice-Reduction-Aided Precoding	107
5.1.4	Performance and Complexity Analysis	110

5.2	Hybrid Precoding scheme	116
5.3	PINV-LRTHP Precoding	121
5.3.1	First Stage: Block Diagonalization	121
5.3.2	Second Stage: LRAP THP	126
5.4	Conclusions	132
6	Parallel implementations	135
6.1	MIMO Detection in Massive MIMO	138
6.1.1	Proposed Paralelization	142
6.1.2	Multi-threaded Implementation	143
6.1.3	CUDA Implementation	144
6.2	Results	148
6.3	Conclusions	151
7	Conclusions	153
7.1	Summary	155
7.2	Further Work	157
7.3	List of Publications	158
7.4	Institutional Acknowledgements	160
	Bibliography	163
