Declaration of Authorship	iii
Abstract	vii
Resumen	ix
Resum	xi
Acknowledgements	xiii
1 Introduction	1
1.1 Motivation and rationale	1
1.2 Type 2 Diabetes Mellitus	2
1.2.1 Pathophysiology and diagnose	2
1.2.2 Prevalence and impact	2
1.2.3 Leading causes	3
1.2.4 Management and Treatments	4
1.2.5 Screening strategies	6
1.3 Risk Scores for Type 2 Diabetes Mellitus	7
2 State of the Art	9
2.1 Detection of TD2M and pre-diabetic stages	9
2.1.1 Standard diagnose	9
2.1.2 Early detection for delaying or preventing T2DM onset	10
2.1.3 Risk scores to predict or detect T2DM	10
2.2 Data Sharing Platforms and Services	14
2.3 Integration of statistical engines	17
2.3.1 R software	18
2.3.2 Matlab software	18
2.4 Software architectures to support risk modeling	20
3 Hypothesis and Objectives	23
3.1 Study hypothesis	23
3.2 Objectives	23
3.2.1 Primary Objective	24
3.2.2 Secondary Objectives	24
4 Materials and Methods	27
4.1 Context of the study	27
4.2 Study data	28
4.3 T2DM risk scores	31
4.3.1 Assessment of risk scores performance	34
4.4 Clinical scenarios for T2DM risk assessment	35

4.4.1	Scenario 1: Risk stratification	36
4.4.2	Scenario 2: Supporting 2h-OGTT decision	36
4.4.3	Recommendations based on expected risk	37
4.4.4	Assessment of usability	38
4.5	Software infrastructure to execute T2DM risk scores	39
4.5.1	The business context	39
4.5.2	Quality Metrics	41
4.5.3	Business environment	42
4.5.4	Service collaboration pattern	43
4.5.5	Functional view	44
4.5.6	Model Host Component	48
4.5.7	Security Component	49
4.5.8	Track Component	50
4.6	Study design	52
4.6.1	Safety and withdrawals	53
4.6.2	Study Population	53
4.6.3	Outcome measurements	54
4.6.4	End-points	55
5	Results	57
5.1	Clinical Outcomes	57
5.1.1	Evaluation of prediction risk scores for T2DM performance	60
5.1.2	Support on detecting T2DM	61
5.1.3	Clinical advice for high risk subjects	64
5.1.4	Missing data influence on risk score outcome	65
	Prediction analysis	65
	Detection analysis	67
5.2	Usability Analysis	70
5.3	System Technical Evaluation	72
5.3.1	Map of evaluations	73
5.3.2	Verification of the models execution	74
	Model Integration	74
5.3.3	Technical Assessment	77
6	Discussion	81
6.1	Advancing the prediction and diagnose of T2DM	81
6.2	Prediction and detection of T2DM in clinical settings	82
6.3	Future Work	84
7	Conclusion	87
7.1	Study Objectives Revision	87
7.2	Objectives	87
7.2.1	Clinical Evaluation	87
7.2.2	Usability Evaluation	88
7.2.3	Technical Evaluation	88
7.3	Scientific contribution	88
7.3.1	Journal Publications	88
7.3.2	International Conferences	89
7.3.3	International Seminar	89
7.4	Contributions to the professional development	90
7.5	Impact: Awards and media	91

A	Appendix A: Study Data Descriptive Analysis	93
A.1	Prediction Data Description	93
A.2	Detection Data Description	95
B	Appendix B: Usability questionnaires	99
B.1	AttrakDif questionnaire	99
B.2	SUS questionnaire	100
	Bibliography	101
