Excavated = 2 \times (18 + 12) \times 200 \times 100 = 120 \text{ m}^3

Temple = 16 \times 10 \times 0.50 = 80 \text{ m}^3

Temple = 2 \times (18 + 12) \times 200 \times 100 = 120 \text{ m}^3

Area = 2 \times (18 + 12) \times 4.30 = 358.40 = 218 \text{ m}^3

Volume of chamber = 4 \times 10 \times 2 = 80 \text{ m}^3

Excavated = 2 \times (18 + 12) \times 200 \times 100 = 120 \text{ m}^3

Excavated = 2 \times (18 + 12) \times 200 \times 100 = 120 \text{ m}^3

Volume of chamber = 4 \times 10 \times 2 = 80 \text{ m}^3

Volume of chamber = 4 \times 10 \times 2 = 80 \text{ m}^3

Volume of chamber = 4 \times 10 \times 2 = 80 \text{ m}^3

Volume of chamber = 4 \times 10 \times 2 = 80 \text{ m}^3

Volume of chamber = 4 \times 10 \times 2 = 80 \text{ m}^3
