

# the night

how does the night sounds like?

high concept video

**the night** is a collage of a night, an artificial representation of it, and is visual music as well.

With different elements that we can find at night life, we will create a mix of sounds, an abstract audio map of how it sounds the night. But also how look these elements. We will use glasses, vinyls, econfeti, mirror-ball, beer, neon light, and wine bottles between others.

what kind of things do we do at night?

why is our behaviour like that?

**how does the night sounds like?**

# visual music

what is visual music?  
here some links to get an idea

# visual music

here some *visual music* videos which  
we will be inspired for

<https://vimeo.com/26625846>

<https://vimeo.com/26633020>

# style frames

this is an idea of how will look our shoots

# moodboard

how will be the atmosphere of the video?  
here some references

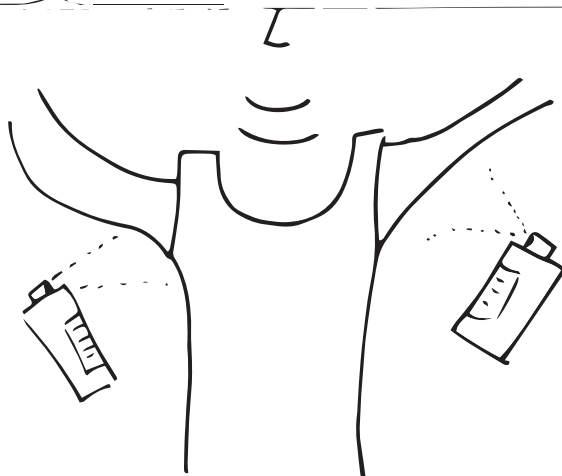

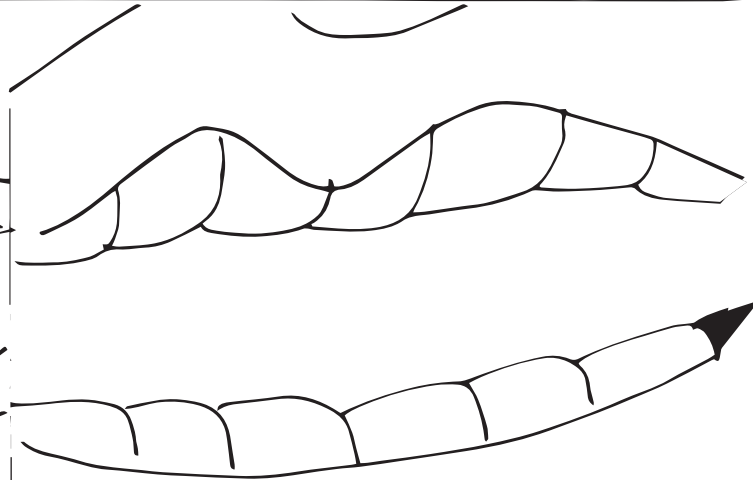

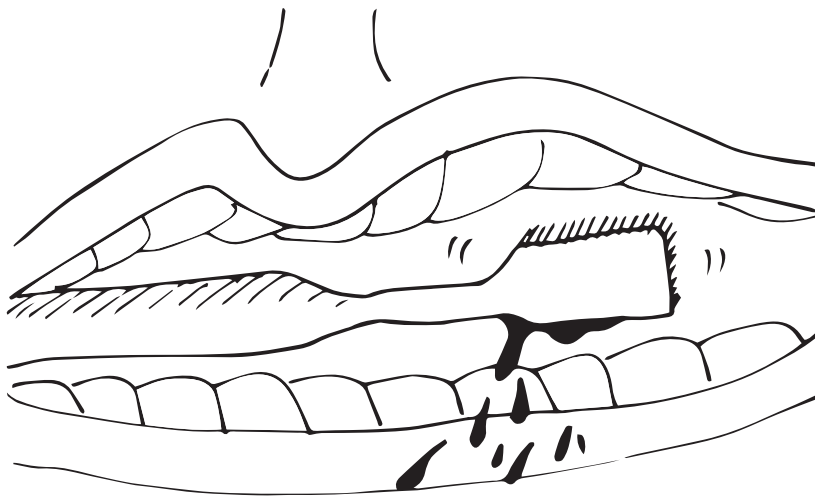

# the storyboard

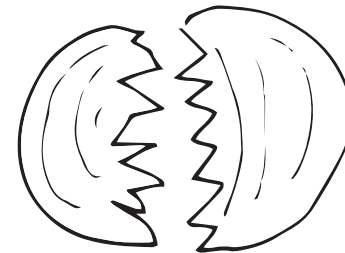

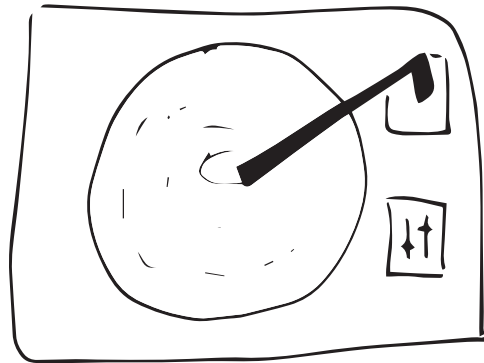

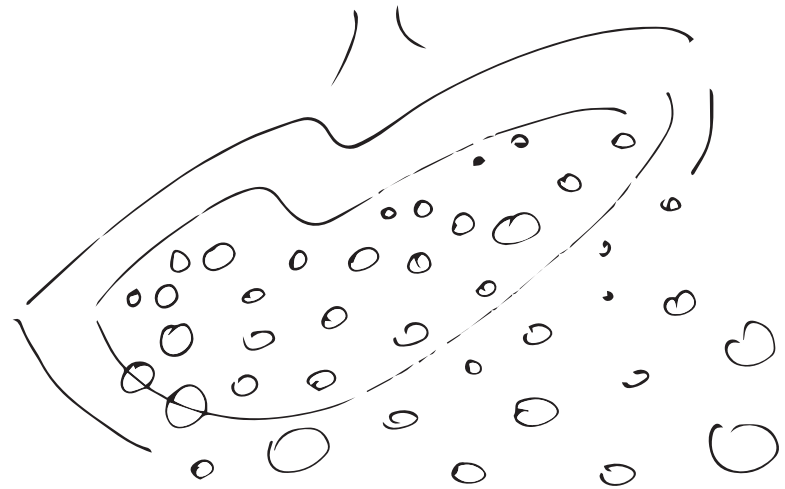

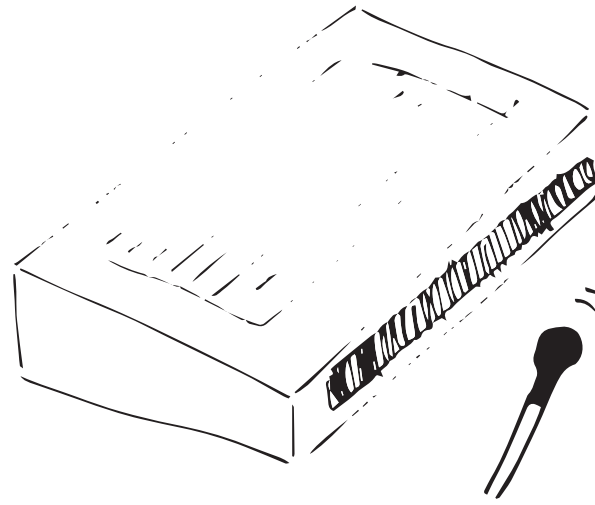

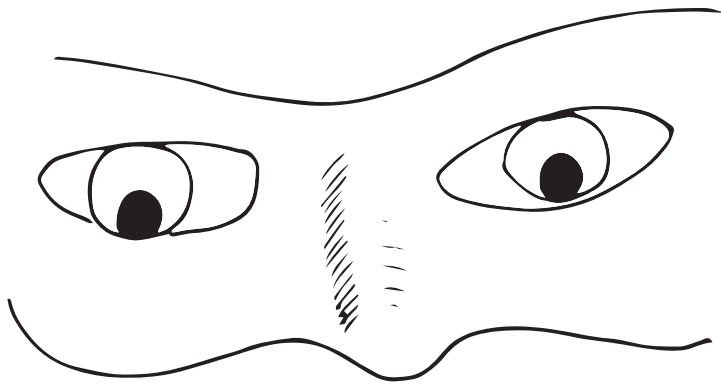

some actions to develop the story

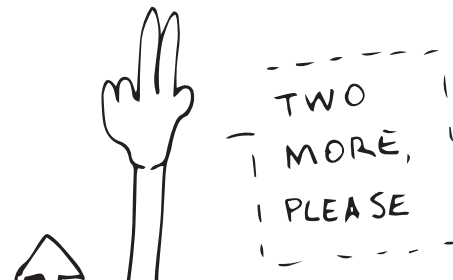

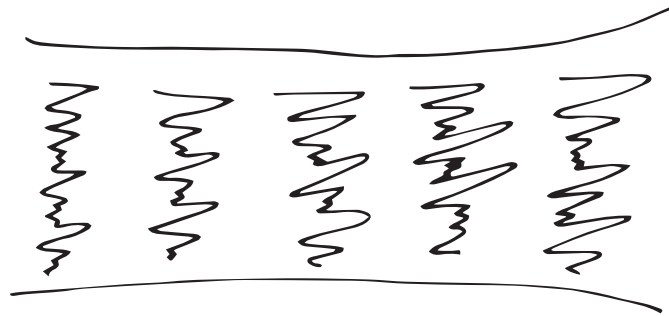

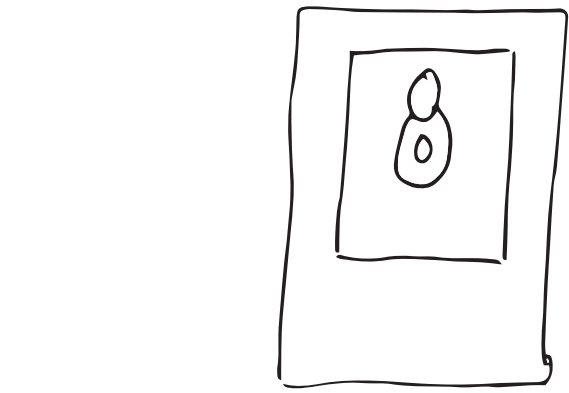

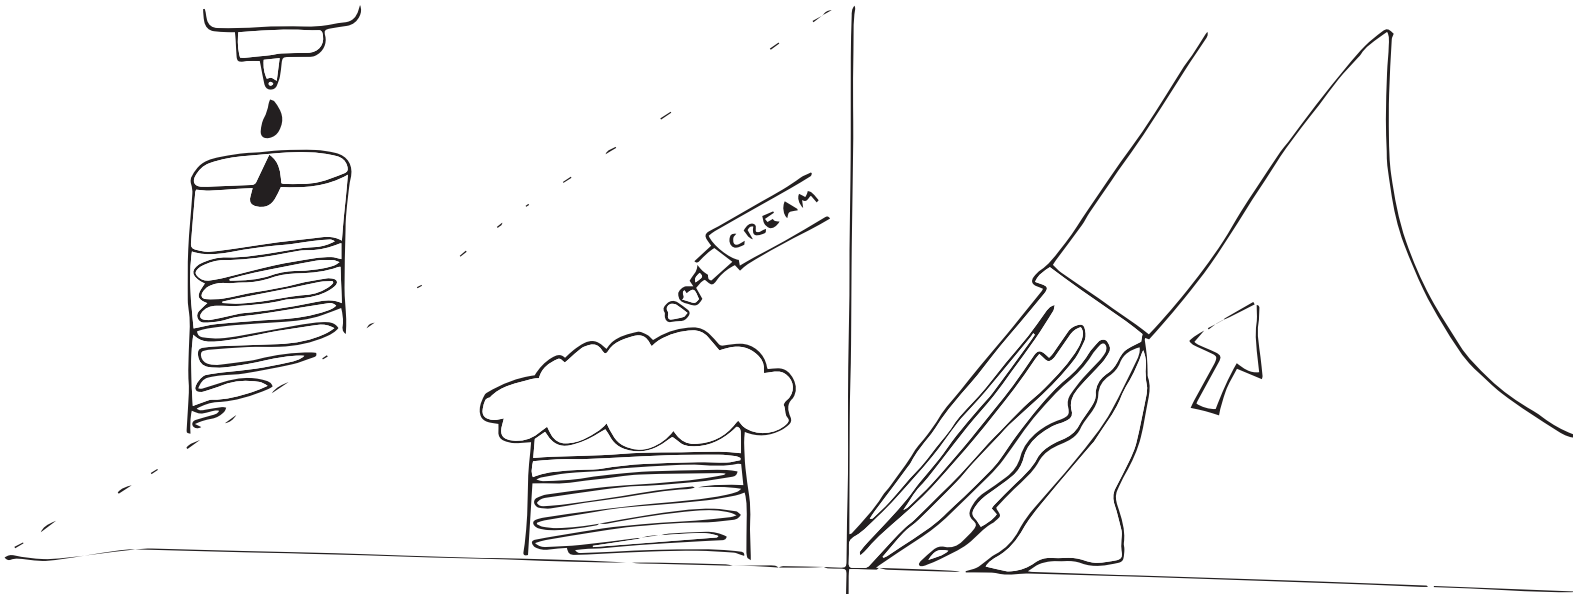

night;

n.

the period of darkness  
between sunset and  
sunrise.

# location

since the topic is the night, we need to  
get a space where the night life is  
really happening in a deep way

**Odonien** it's the space concept we are  
looking for. A collage of art pieces  
and objectsobjects. For separate  
they are abstract,  
but all together make  
an idea of an artistic space; a whole  
concept, creating an artistic  
and underground atmosphere

# when?

we checked Odonien schedule  
and found the proper date

**3rd of July** is taking place the  
**Nachtflohmarkt: Bazar de Nuit**
